The Care of Strangers Charles E. Rosenberg, 1995-03-01 A history of the American hospital system, from the time of Jefferson's administration when they were largely charitable institutions working for the poor, through to the 20th century when hospitals became centres of learning and the primary care site for most citizens.

Wanamaker's Michael J. Lisicky, 2018-11-12 An "informative and entertaining" history of the famed Philadelphia department store, with photos included (Montgomery News). Philadelphia was once the proud home of Wanamaker's, a department store founded by the retail giant John Wanamaker in 1861. Its name was synonymous with service, and Philadelphians still fondly remember the massive bronze eagle in the Grand Court, concerts from the world's largest pipe organ, and the spectacular Christmas festivities. In this book, Philadelphia native Michael J. Lisicky takes a nostalgic journey through the history of the store, from its beginnings as a haberdashery to its growth into New York and Delaware and the final poignant closing of its doors. Lisicky brilliantly combines interviews with store insiders, forgotten recipes, and memories from local celebrities such as Trudy Haynes and Sally Starr to bring readers back to the soft glow of the marble atrium and the quiet elegance of the Crystal Tea Room that was Wanamaker's. "A wonderfully affectionate look at the Market St. store whose name, for generations, was symbolic of Philly."—Philadelphia Daily News

Philadelphia's Lost Waterfront Harry Kyriakodis, 2011-07-21 The wharves and docks of William Penn's city that helped build a nation are gone lost to the onslaught of over 300 years of development. Yet the bygone streets and piers of Philadelphia's central waterfront were once part of the greatest trade center in the American colonies. Local historian Harry Kyriakodis chronicles the history of the city's original port district from Quaker settlers who first lived in caves along the Delaware and the devastating yellow fever epidemic of 1793 to its heyday as a maritime center and then the twentieth century that saw much of the historic riverfront razed. Join Kyriakodis as he strolls Front Street, Delaware Avenue, and Penn's Landing to rediscover the story of Philadelphia's lost waterfront.

Revitalizing America's Smaller Legacy Cities Torey Hollingsworth, Alison Goebel, 2017 This report examines the unique challenges of smaller American legacy cities -- older industrial centers with populations of less than 200,000, located primarily in the Midwest and Northeast. These cities are critical sites for a number of global economic and demographic transformations, and must fundamentally reconsider how to rebuild and sustain strong economies, housing markets, and

workforces. This report identifies replicable strategies that have assisted smaller legacy cities weather these transformations, find their competitive edge, and transform into thriving, sustainable communities.

Natural Lives, Modern Times Bruce Stutz, 1998-07-29 The Delaware River flows out of New York's Catskill Mountains and winds its way through woodland and rural farmland, through the great Water Gap ravine, and finally past one of the world's most industrialized riverfronts. Yet it remains one of the country's last undammed rivers, with a natural life as rich and varied as its human history. In *Natural Lives, Modern Times*, Bruce Stutz has written a thoroughly modern natural history, blending keen observations of the nature of the Delaware's enduring complex of river, glacial streams, marshlands, and forest with glimpses of history and folklore and with luminous portraits of those whose lives are sustained by the river. The Delaware was the waterway of the nation's first mercantile, philosophical, scientific, cultural, and industrial heartland, hosting immigrants from Europe, Africa, and the Mediterranean, all looking for new lives along the ancient river. In this always entertaining and often haunting intertwining of human and natural history, Bruce Stutz discovers those who regret what has been lost and those passionate about preserving what remains. Most of all, however, he lets us see what's at stake in a wonderfully diverse world. Not since Mark Twain has anyone taken such a freewheeling river journey.

White Space, Black Hood Sheryll Cashin, 2021-09-14 A 2021 C. Wright Mills Award Finalist Shows how government created “ghettos” and affluent white space and entrenched a system of American residential caste that is the linchpin of US

inequality—and issues a call for abolition. The iconic Black hood, like slavery and Jim Crow, is a peculiar American institution animated by the ideology of white supremacy. Politicians and people of all colors propagated “ghetto” myths to justify racist policies that concentrated poverty in the hood and created high-opportunity white spaces. In *White Space, Black Hood*, Sheryll Cashin traces the history of anti-Black residential caste—boundary maintenance, opportunity hoarding, and stereotype-driven surveillance—and unpacks its current legacy so we can begin the work to dismantle the structures and policies that undermine Black lives. Drawing on nearly 2 decades of research in cities including Baltimore, St. Louis, Chicago, New York, and Cleveland, Cashin traces the processes of residential caste as it relates to housing, policing, schools, and transportation. She contends that geography is now central to American caste. Poverty-free havens and poverty-dense hoods would not exist if the state had not designed, constructed, and maintained this physical racial order. Cashin calls for abolition of these state-sanctioned processes. The ultimate goal is to change the lens through which society sees residents of poor Black neighborhoods from presumed thug to presumed citizen, and to transform the relationship of the state with these neighborhoods from punitive to caring. She calls for investment in a new infrastructure of opportunity in poor Black neighborhoods, including richly resourced schools and neighborhood centers, public transit, Peacemaker Fellowships, universal basic incomes, housing choice vouchers for residents, and mandatory inclusive housing elsewhere. Deeply researched and sharply written, *White Space, Black Hood* is a call to action for repairing what white supremacy still breaks. Includes historical photos, maps, and charts that illuminate the history of residential segregation as an institution and a tactic of racial oppression.

The Best American Poetry 2021 David Lehman, 2021-09-28 The 2021 edition of the leading collection of contemporary American poetry is guest edited by the former US Poet Laureate Tracy K. Smith, providing renewed proof that this is “a ‘best’ anthology that really lives up to its title” (Chicago Tribune). Since 1988, The Best American Poetry series has been “one of the mainstays of the poetry publication world” (Academy of American Poets). Each volume presents a choice of the year’s most memorable poems, with comments from the poets themselves lending insight into their work. The guest editor of The Best American Poetry 2021 is Tracy K. Smith, the former United States Poet Laureate, whose own poems are, Toi Derricotte’s words, “beautiful and serene” in their surfaces with an underlying “sense of an unknown vastness.” In The Best American Poetry 2021, Smith has selected a distinguished array of works both vast and beautiful by such important voices as Henri Cole, Billy Collins, Louise Erdrich, Nobel laureate Louise Glück, Terrance Hayes, and Kevin Young.

The Tailor and Ansty Eric Cross, 1970 A modern Irish classic about the irrepressible Tailor and his wife Ansty. The models for the book were an old couple who lived in a tiny cottage on a mountain road to the lake at Gorigane Barra.

Landscape as Infrastructure Pierre Belanger, 2016-11-10 As ecology becomes the new engineering, the projection of landscape as infrastructure—the contemporary alignment of the disciplines of landscape architecture, civil engineering, and

urban planning— has become pressing. Predominant challenges facing urban regions and territories today—including shifting climates, material flows, and population mobilities, are addressed and strategized here. Responding to the under-performance of master planning and over-exertion of technological systems at the end of twentieth century, this book argues for the strategic design of infrastructural ecologies, describing a synthetic landscape of living, biophysical systems that operate as urban infrastructures to shape and direct the future of urban economies and cultures into the 21st century. Pierre Bélanger is Associate Professor of Landscape Architecture and Co-Director of the Master in Design Studies Program at Harvard University's Graduate School of Design. As part of the Department of Landscape Architecture and the Advanced Studies Program, Bélanger teaches and coordinates graduate courses on the convergence of ecology, infrastructure and urbanism in the interrelated fields of design, planning and engineering. Dr. Bélanger is author of the 35th edition of the Pamphlet Architecture Series from Princeton Architectural Press, GOING LIVE: from States to Systems (pa35.net), co-editor with Jennifer Sigler of the 39th issue of Harvard Design Magazine, Wet Matter, and co-author of the forthcoming volume ECOLOGIES OF POWER: Mapping Military Geographies & Logistical Landscapes of the U.S. Department of Defense. As a landscape architect and urbanist, he is the recipient of the 2008 Canada Prix de Rome in Architecture and the Curator for the Canada Pavilion and Canadian Exhibition, EXTRACTION, at the 2016 Venice Architecture Biennale (extraction.ca).

The Benjamin Franklin Parkway Harry Kyriakodis, 2014-07-07 The Benjamin Franklin Parkway has sliced through the Logan Square neighborhood of Center City (downtown) Philadelphia since World War I. Named after Philadelphia's favorite son, the mile-long boulevard begins at city hall and heads diagonally towards Logan Circle before reaching the Philadelphia Museum of Art. The postcards and other images in this work show the parkway's development and its role in Philadelphia's civic and cultural life. Despite often serving as a speedway into and out of town, the Ben Franklin Parkway is a triumph in urban planning that has become a treasured part of the City of Brotherly Love.

WHEN HORSES WALKED ON WATER Kevin James Crisman, Arthur B. Cohn, 1998-04-17 Kevin J. Crisman and Arthur B. Cohn show how a confluence of geographic, technological, economic, and social conditions in the United States and Canada turned an ancient idea into a practical alternative to more expensive and dangerous steamboats. Reviewing evidence from travelers' memoirs, regional histories, pictorial records, and the only horseboat ever studied by archaeologists - a wreck on the floor of Lake Champlain's Burlington Bay, in Vermont - the authors trace the evolution of horseboats from early mechanisms that forced the animals to walk in tight circles to endless floor treadmills that resembled modern exercise machines. In a lively narrative interspersed with quotes from passenger accounts, the book charts the rise and demise of

horseboat businesses on the Hudson River, as well as in New York City, St. Louis, and Halifax, Nova Scotia. The authors also describe and record the underwater excavation of the Lake Champlain wreck, revealing a wealth of detail about the construction and operation of a typical treadwheel horseboat of the 1830s and 1840s.
