About Lawrenceville Mary Frazier Long,2008

Lawrenceville Joann Cantrell and James Wudarczyk,2015 From its founding in 1814 by William Barclay Foster, Lawrenceville has been the center of historic events. During the Civil War, the riverside community became home to the Allegheny Arsenal, where 78 people perished in an explosion in 1862, making it the worst civilian disaster of the war. Lawrenceville evolved into a lively, walkable neighborhood that barely slept because of the high volume of shift workers at places such as Iron City Brewery, St. Francis Hospital, and the steel mills. Businesses, churches, all-night diners, and other gathering places were easily accessible to residents, and families became closely associated with the landmarks where they worked, worshipped, and socialized. Having celebrated its 200th birthday in 2014, Lawrenceville remains a bustling community with a vitality equal to that of the immigrant days, and it continues to be a place of camaraderie where individuals are dedicated to their neighborhood.

The Lorax Dr. Seuss, 2013-09-24 Celebrate Earth Day with Dr. Seuss and the Lorax in this classic picture book about protecting the environment! I am the Lorax. I speak for the trees. Dr. Seuss's beloved story teaches kids to speak up and stand up for those who can't. With a recycling-friendly "Go Green" message, *The Lorax* allows young readers to experience the beauty of the Truffula Trees and the danger of taking our earth for granted, all in a story that is timely, playful and hopeful. The book's final pages teach us that just one small seed, or one small child, can make a difference. Printed on recycled paper, this book is the perfect gift for Earth Day and for any child—or child at heart—who is interested in recycling, advocacy and the environment, or just loves nature and playing outside. Unless someone like you cares a whole awful lot, nothing is going to get better. It's not. "Pretty much all the stuff you need to know is in Dr. Seuss." -President Barack Obama

My Living Will John Trautwein, 2014-12-11 My Living Will is the story of former major league pitcher John Trautwein, and the unbelievable tragedy which befell him and his family when his fifteen-year-old son, Will, took his own life. There had been no warnings, no obvious signs of anxiety, depression, or unhappiness; nothing. A family and a community were left stunned as they pondered how a young man like Will Trautwein, a healthy, happy, popular, athletic, and musical teenager, who came from such a loving home, could lose the will to live. "John Trautwein writes straight from the heart. And his words will save lives. The story Trautwein shares in these pages--a remarkable journey of passion and purpose--will literally save lives." • Jeffrey Marx, Pulitzer Prize winner and author of *Season of Life* "John Trautwein's story inspires hope. It empowers people, and it gives its readers the 'hope for life.' The triumph that this story imparts arouses the goodness in everyone as it drives people toward action." • Joe Girardi, Manager, The New York Yankees "In my twenty-two years of broadcasting, I have told many stories of triumph over tragedy, but the story of Will Trautwein and his family has stayed with me. The loss of such

a vibrant young man and the strength of his family to use their heartache to help has had an impact on how I parent my daughter, and how I report stories of teenage depression and suicide. This is a must-read if you have a teenager in your life.”

• Stephany Fisher, Anchor, CBS News, Atlanta “Ever wonder if a young person in your own home might be at risk? Read this book. In “My Living Will,” John Trautwein takes the emotions of loss and turns them into a message of awareness and hope. A must read for parents and teenagers alike!” • Dan Shaughnessy, The Boston Globe

Celestial Calculations J. L. Lawrence, 2019-05-14 How to predict and calculate the positions of stars, planets, the sun, the moon, and satellites using a personal computer and high school mathematics. Our knowledge of the universe is expanding rapidly, as space probes launched decades ago begin to send information back to earth. There has never been a better time to learn about how planets, stars, and satellites move through the heavens. This book is for amateur astronomers who want to move beyond pictures of constellations in star guides and solve the mysteries of a starry night. It is a book for readers who have wondered, for example, where Saturn will appear in the night sky, when the sun will rise and set, or how long the space station will be over their location. In *Celestial Calculations*, J. L. Lawrence shows readers how to find the answers to these and other astronomy questions with only a personal computer and high school math. Using an easy-to-follow step-by-step approach, Lawrence explains what calculations are required, why they are needed, and how they all fit together. Lawrence begins with basic principles: unit of measure conversions, time conversions, and coordinate systems. He combines these concepts into a computer program that can calculate the location of a star, and uses the same methods for predicting the locations of the sun, moon, and planets. He then shows how to use these methods for locating the many satellites we have sent into orbit. Finally, he describes a variety of resources and tools available to the amateur astronomer, including star charts and astronomical tables. Diagrams illustrate the major concepts, and computer programs that implement the algorithms are included. Photographs of actual celestial objects accompany the text, and interesting astronomical facts are interspersed throughout. Source code (in Python 3, JAVA, and Visual Basic) and executables for all the programs and examples presented in the book are available for download at <https://CelestialCalculations.github.io>.
