**Meathead** Meathead Goldwyn, Rux Martin, 2016-05-17 New York Times Bestseller Named 22 Essential Cookbooks for Every Kitchen by SeriousEats.com Named 25 Favorite Cookbooks of All Time by Christopher Kimball Named Best Cookbooks

Of 2016 by Chicago Tribune, BBC, Wired, Epicurious, Leite's Culinary Named 100 Best Cookbooks of All Time by Southern Living Magazine For succulent results every time, nothing is more crucial than understanding the science behind the interaction of food, fire, heat, and smoke. This is the definitive guide to the concepts, methods, equipment, and accessories of barbecue and grilling. The founder and editor of the world's most popular BBQ and grilling website, AmazingRibs.com, "Meathead" Goldwyn applies the latest research to backyard cooking and 118 thoroughly tested recipes. He explains why dry brining is better than wet brining; how marinades really work; why rubs shouldn't have salt in them; how heat and temperature differ; the importance of digital thermometers; why searing doesn't seal in juices; how salt penetrates but spices don't; when charcoal beats gas and when gas beats charcoal; how to calibrate and tune a grill or smoker; how to keep fish from sticking; cooking with logs; the strengths and weaknesses of the new pellet cookers; tricks for rotisserie cooking; why cooking whole animals is a bad idea, which grill grates are best; and why beer-can chicken is a waste of good beer and nowhere close to the best way to cook a bird. He shatters the myths that stand in the way of perfection. Busted misconceptions include: • Myth: Bring meat to room temperature before cooking. Busted! Cold meat attracts smoke better. • Myth: Soak wood before using it. Busted! Soaking produces smoke that doesn't taste as good as dry fast-burning wood. • Myth: Bone-in steaks taste better. Busted! The calcium walls of bone have no taste and they just slow cooking. • Myth: You should sear first, then cook. Busted! Actually, that overcooks the meat. Cooking at a low temperature first and searing at the end produces evenly cooked meat. Lavishly designed with hundreds of illustrations and full-color photos by the author, this book contains all the sure-fire recipes for traditional American favorites and many more outside-the-box creations. You'll get recipes for all the great regional barbecue sauces; rubs for meats and vegetables; Last Meal Ribs, Simon & Garfunkel Chicken; Schmancy Smoked Salmon; The Ultimate Turkey; Texas Brisket; Perfect Pulled Pork; Sweet & Sour Pork with Mumbo Sauce; Whole Hog; Steakhouse Steaks; Diner Burgers; Prime Rib; Brazilian Short Ribs; Rack Of Lamb Lollipops; Huli-Huli Chicken; Smoked Trout Florida Mullet -Style; Baja Fish Tacos; Lobster, and many more.

Oathmark: Battlesworn Joseph A. McCullough, 2020-08-20 A supplement for Oathmark: Battles of the Lost Age, giving players rules for creating elite units of warriors known as battlesworn and charting their progress from battle-to-battle. In the horror and chaos of battle, the outcome can often hang on the briefest of moments. It is at these times that the actions of one unit can make the difference between victory and defeat. Wise kings know this, and realize that it is often prudent to hold back their best units until they can make the greatest difference. These elite units, called the 'battlesworn', are more than just powerful combatants, they are symbols of the glory and honour of a kingdom. All young warriors hope to one day join their ranks and add their oathmarks beside those legendary fighters. This supplement for Oathmark: Battles of the Lost Age contains rules for adding elite units to your armies and charting their progress from battle to battle. Will they grow even more powerful as they gain renown, or be broken in the face of tremendous odds, perhaps someday to be reformed when

their kingdom needs them most? Also included are rules for rivers and boats as well as campaigns, featuring all-new scenarios that will give your battlesworn the chance to lead their kingdom to new heights of power and prestige.

**Publishing as Practice**, 2021-04-06 On the work of three contemporary artist's-book publishers who have developed fresh ways of broaching politics in publishing This book documents Publishing as Practice, a residency at Ulises--a curatorial platform based in Philadelphia--that explores publishing as an incubator for new forms of editorial, curatorial and artistic practice. Over the course of two years, three publishers activated Ulises as an exhibition space and public programming hub, engaging the public through workshops, discussions and projects. Residents included Hardworking Goodlooking, the publishing arm of Philippines-based, social-practice platform The Office of Culture and Design; Dominica, an imprint run by Martine Syms dedicated to exploring Blackness as a topic, reference, marker and audience in visual culture; and Bidoun, a non-profit organization focused on art and culture from the Middle East and its diasporas. The book features a preface by David Senior, an essay by Gee Wesley and Ulises Carrión's 1975 publishing manifesto The New Art of Making Books, alongside documentation of the works produced.

Linguistic Politeness Across Boundaries Ar?n Bayraktaro?lu, Maria Sifianou, 2001 This volume includes 14 papers investigating politeness phenomena in Greece and Turkey, the cultural cross-roads of Europe, Asia and the Middle East. It reflects current research and provides observations of and findings in patterns of linguistic politeness in a geographical area other than the much studied English speaking ones. The book appeals to professionals and students interested in a broader perspective of language use in its social context. Articles in the collection are empirically rather than theoretically oriented and examine realisations of politeness in relation to social parameters. The chapters have been arranged in pairs (Greek/Turkish), treating the following related issues: firstly a more general ethnographic picture of the two societies, the variables of power/status in classroom and other interaction, solidarity in advice-giving and the use of approbatory expressions, service encounters and the differential use of language by males and females, the use of interruptions in television talk, and finally compliments.

**Protein-based Engineered Nanostructures** Aitziber L. Cortajarena, Tijana Z. Grove, 2016-09-27 This book is devoted to the engineering of protein-based nanostructures and nanomaterials. One key challenge in nanobiotechnology is to be able to exploit the natural repertoire of protein structures and functions to build materials with defined properties at the nanoscale using "bottom-up" strategies. This book addresses in an integrated manner all the critical aspects that need to be understood and considered to design the next generation of nano-bio assemblies. The book covers first the fundamentals of the design and features of the protein building blocks and their self-assembly illustrating some of the most relevant examples of nanostructural design. Finally, the book contains a section dedicated to demonstrated applications of these novel bioinspired nanostructures in different fields from hybrid nanomaterials to regenerative medicine. This book provides a comprehensive

updated review of this rapidly evolving field.

*Coronary Vasculature* Robert J. Tomanek, 2012-10-19 Ischemic heart disease is the leading cause of morbidity and mortality in the developed world. The high metabolism and oxygen demand of the cardiac myocardium depends on both a high blood flow and a rich capillary density. For this reason, the growth of the coronary vasculature is vital, not only in early development, but also in the adult faced with various stresses. Novel technologies have enabled the discovery of the molecular mechanisms underlying the growth and assembly of coronary vessels, and this volume covers the hierarchy of the coronary vasculature from its embryonic origins through its postnatal growth, adulthood, and senescence. Chapters address normal coronary development, coronary anomalies and their possible underlying developmental errors, coronary vessel adaptations to exercise training, aging, hypoxia, myocardial ischemia, and cardiac hypertrophy. This comprehensive overview of current research in coronary vessels and myocardial perfusion was written by Dr. Robert J. Tomanek, Emeritus Professor of Anatomy and Cell Biology at the University of Iowa. The book reviews, discusses, and integrates findings from various areas of coronary vasculature research, and as a result, will be a valuable reference source for cardiovascular scientists and physicians for many years to come.
