Mrs. Rorer's Philadelphia Cook Book Sarah Tyson Rorer, 2008-06 Sarah Tyson (Heston) Rorer is considered to be the first dietitian in America. In 1882, she founded the Philadelphia Cooking School. By 1895, she had become so famous that she gave her cooking lectures at Madison Square Garden. This book was the first of over 50 cookbooks Rorer published.

Forgotten Towns of Southern New Jersey Henry Charlton Beck, 1983 Composed, for the most part, from sketches that were published in the Courier-Post newspapers of Camden, New Jersey, Beck provides us with a series of stories of towns too tiny or uncertain for today's maps. Together, these sketches help to create a more complete picture of the history of New Jersey. A connecting skein of untold or little known wartime history--the Revolution, the War of 1812, and the conflict of North against South--runs through most of the sketches. Many of the sketches concern the pine towns and their people, the pineys who lived in the Jersey pine barrens.

The Intersectional Environmentalist Leah Thomas, 2022-04-07 'Essential brain food' Condé Nast Traveler 'As much a manifesto as a guide' Los Angeles Times 'Read this book and save the planet' Soho House Notes One of Business Insider's Most Anticipated Non-fiction Books of 2022 We cannot save the planet without uplifting the voices of its people - especially those most often unheard. Leah Thomas coined the term 'intersectional environmentalism' to describe the inextricable link between climate change, activism, racism and privilege. The fight for the planet should go hand in hand with the fight for civil rights. In fact, one cannot exist without the other. This book is a call to action, a guide to instigating change for all and a pledge to work toward the empowerment of all people and the betterment of the planet - an indispensable primer for activists

looking to create meaningful, inclusive and sustainable change. Driven by Leah's expert voice and complemented by the words of young activists from around the globe, it is essential reading on the issue - and the movement - that will define a generation.

Hype Nina Shapiro, MD, Kristin Loberg, 2018-05-01 A Publisher's Weekly Best Book of 2018 A straightforward appraisal of why health myths exist, dispelling many of them, and teaching readers how to navigate the labyrinth of health advice and the science and misinformation behind it. Hype is Dr. Nina Shapiro's engaging and informative look at the real science behind our most common beliefs and assumptions in the health sphere. There is a lot of misinformation thrown around these days, especially online. Headlines tell us to do this, not that—all in the name of living longer, better, thinner, younger. Dr. Shapiro wants to distinguish between the falsehoods and the evidence-backed truth. In her work at Harvard and UCLA, with more than twenty years of experience in both clinical and academic medicine, she helps patients make important health decisions every day. She's bringing those lessons to life here with a blend of personal storytelling and science to discuss her dramatic new definition of “a healthy life.” Hype covers everything from exercise to supplements, alternative medicine to vaccines, and medical testing to media coverage. Shapiro tackles popular misconceptions such as toxic sugar and the importance of drinking eight glasses of water a day. She provides simple solutions anyone can implement, such as drinking 2% milk instead of fat free and using SPF 30 sunscreen instead of SPF 100. This book is as much for single individuals in the prime of their lives as it is for parents with young children and the elderly. Never has there been a greater need for this reassuring, and scientifically backed reality check.

Men of Mark William J. Simmons, Henry McNeal Turner, 1887 TO PRESUME to multiply books in this day of excellent writers and learned book-makers is a rash thing perhaps for a novice. It may even be a presumption that shall be met by the production itself being driven from the market by the keen, searching criticism of not only the reviewers, but less noted objectors. And yet there are books that meet a ready sale because they seem like Ishmaelites--against everybody and everybody against them. Whether this work shall ever accomplish the design of the author may not at all be determined by its sale. While I hope to secure some pecuniary gain that I may accompany it with a companion illustrating what our women have done, yet by no means do I send it forth with the sordid idea of gain. I would rather it would do some good than make a single dollar, and I echo the wish of Abou Ben Adhem, in that sweet poem of that name, written by Leigh Hunt. The angel was writing at the table, in his vision. The names of those who love the Lord. Abou wanted to know if his was there--and the angel said No. Said Abou, I pray thee, then, write me as one that loves his fellow-men. That is what I ask to be recorded of me. The angel wrote and vanished. The next night It came again, with a great awakening light. And showed the names whom love of God had blessed. And lo! Ben Adhem's name led all the rest. I desire that the book shall be a help to students, male and female, in the way of information concerning our great names. I have noticed in my long experience as a teacher, that many

of my students were wofully ignorant of the work of our great colored men--even ignorant of their names. If they knew their names, it was some indefinable something they had done--just what, they could not tell. If in a slight degree I shall here furnish the data for that class of rising men and women, I shall feel much pleased. Herein will be found many who had severe trials in making their way through schools of different grades. It is a suitable book, it is hoped, to be put into the hands of intelligent, aspiring young people everywhere, that they might see the means and manners of men's elevation, and by this be led to undertake the task of going through high schools and colleges. If the persons herein mentioned could rise to the exalted stations which they have and do now hold, what is there to prevent any young man or woman from achieving greatness? Many, yea, nearly all these came from the loins of slave fathers, and were the babes of women in bondage, and themselves felt the leaden hand of slavery on their own bodies; but whether slaves or not, they suffered with their brethren because of color. That sum of human villainies did not crush out the life and manhood of the race. I wish the book to show to the world--to our oppressors and even our friends--that the Negro race is still alive, and must possess more intellectual vigor than any other section of the human family, or else how could they be crushed as slaves in all these years since 1620, and yet to-day stand side by side with the best blood in America, in white institutions, grappling with abstruse problems in Euclid and difficult classics, and master them? Was ever such a thing seen in another people? Whence these lawyers, doctors, authors, editors, divines, lecturers, linguists, scientists, college presidents and such, in one quarter of a century?

Bioethics Peter A. Clark, 2016-12-29 The main strength of this book is that it examines the challenges facing the field of Bioethics today from medical, ethical and legal perspectives. A critical exchange of ideas from professionals in interdisciplinary fields allows everyone to learn and benefit from the insights gained through others' experiences. Examining, analyzing and understanding these complex medical-ethical-legal issues and cases and how they are resolved will serve as a paradigm for all professionals who will be confronted with these complex bioethical issues now and in the future. The more we face these challenges directly, examine them critically and debate them enthusiastically the more knowledge will be gained and hopefully, we will gain more practical wisdom.

There has been substantial growth in the use of data monitoring committees in recent years, by both government agencies and the pharmaceutical industry. This growth has been brought about by increasing recognition of the value of such committees in safeguarding trial participants as well as protecting trial integrity and the validity of conclusions. This very timely book describes the operation of data monitoring committees, and provides an authoritative guide to their establishment, purpose and responsibilities. * Provides a practical overview of data monitoring in clinical trials. * Describes the purpose, responsibilities and operation of data monitoring committees. * Provides directly applicable advice for those managing and conducting clinical trials, and those serving on data monitoring committees. * Gives insight into clinical data monitoring to those sitting on regulatory and ethical committees. * Discusses issues pertinent to those working in clinical trials in both the US and Europe. The practical guidance provided by this book will be of use to professionals working in and/or managing clinical trials, in academic, government and industry settings, particularly medical statisticians, clinicians, trial co-ordinators, and those working in regulatory affairs and bioethics.

Eating Disorders in Sport Ron A. Thompson, Roberta Trattner Sherman, 2011-01-19 Over the past fifteen years, there has been a great increase in the knowledge of eating disorders in sport and effective means of treatment. In this book, the authors draw on their extensive clinical experience to discuss how to identify, manage, treat, and prevent eating disorders in sport participants. They begin by examining the clinical conditions related to eating problems, including descriptions of

specific disorders and a review of the relevant literature. Special attention is given to the specific gender and sport-related factors that can negatively influence the eating habits of athletes. The second half of the book discusses identification of participants with disordered eating by reviewing symptoms and how they manifest in sport; management issues for sport personnel, coaches, athletic trainers, and healthcare professionals; treatment; and medical considerations, such as the use of psychotropic medications. A list of useful resources is included in an appendix, as well as a glossary of important terms.

The Jesuits and the Arts, 1540-1773 John W. O'Malley, Gauvin A. Bailey, Giovanni Sale, 2005

Strategic Management Stephen J. Porth, 2011-06-27 Good strategic managers are capable of seeing the big picture and managing across the whole organization -- that is the message of *Strategic Management: A Cross-Functional Approach*. This text shows students that successful strategic management requires an ability to see the organization as a whole--to step out of the functional silos that students tend to acquire through previous work experience or prior courses, and see the organization in a new way. To be good strategic thinkers, people from a marketing or HR background need to understand financials and how to use them, and finance and accounting people need to see that customer and employee relationships are the lifeblood of the organization. Strategic Management is unique in covering the research, tools, and theory of strategic management - taking a cross-functional and integrative perspective, by focusing on value creation for customers, employees, and owners/stockholders. This concept, called the customer-employee-owner cycle, is introduced in Chapter 1 and serves as an organizing framework throughout the book. Each chapter is brought to life for students with a focus company, used as a running example to illustrate and enliven the material in the chapter. Focus companies include organizations students are familiar with and interested in, such as Nike, Microsoft, Wal-Mart, John & Johnson, and the Walt Disney Company.

Covocational Church Planting Brad Brisco, 2021-06-08 Rethinking how church planters may choose to work full-time in the marketplace to expand their opportunities to engage the community with the gospel of Jesus as they plant a church. Covocational church planting sees the work of the ministry in the church and in the marketplace equally important in the growth of the Kingdom. Covocational Church Planting draws from the best thinkers and practitioners of missional theology to give the planter the tools needed to start with Jesus, see the Kingdom, exegete the local culture, engage places outside the church, know the residents, practice hospitality, practice missional discipleship, and understand the results.
