State and Crafts in the Qing Dynasty (1644-1911) Christine Moll-Murata, 2018 This book, full of quantitative evidence and limited-circulation archives, details manufacturing and the beginnings of industrialisation in China from 1644 to 1911. It thoroughly examines the interior organisation of public craft production and the complementary activities of the private sector. It offers detailed knowledge of shipbuilding and printing. Moreover, it contributes to the research of labour history and the rise of capitalism in China through its examination of living conditions, working conditions, and wages.

The Oxford Guide to Card Games David Parlett, 1990 Imported from the Mamluks of Egypt, card games first hit Europe around 1371 and within ten years had spread from Spain and Italy to France and Germany. By 1420, German and Swiss cardmakers were producing packs by the thousands (first by stencil, later by metal engraving) marked with a bewildering array of suits, including hounds, bears, parrots, roses, helmets, banners, and bells. Games proliferated as well, and by 1534, Rabelais could name 35 different card games in Chapter 22 of *Gargantua*. Today, of course, there are thousands of games, from the universally popular Poker and Contract Bridge, to national manias such as Swiss Jass, German Skat, and French Belote. This is a historical guide to cards in Europe and America. This is not primarily a book of rules or hints on how to play better, but a survey of where the games originated, how they have developed over time, and what their rituals and etiquette tell us about the people who play them.

Artisans in Early Imperial China Anthony J. Barbieri-Low, 2021-10-07 Early China is best known for the dazzling material artifacts it has left behind. These terracotta figures, gilt-bronze lamps, and other material remnants of the Chinese past unearthed by archaeological excavations are often viewed without regard to the social context of their creation, yet they were made by individuals who contributed greatly to the foundations of early Chinese culture. With *Artisans in Early Imperial China*, Anthony Barbieri-Low combines historical, epigraphic, and archaeological analysis to refocus our gaze from the glittering objects and monuments of China onto the men and women who made them. Taking readers inside the private workshops, crowded marketplaces, and great palaces, temples, and tombs of early China, Barbieri-Low explores the lives and working conditions of artisans, meticulously documenting their role in early Chinese society and the economy. First published in 2007, winner of top prizes from the Association for Asian Studies, American Historical Association, College Art

Association, and the International Convention of Asia Scholars, and now back in print, *Artisans in Early Imperial China* will appeal to anyone interested in Chinese history, as well as to scholars of comparative social history, labor history, and Asian art history.

Chinese Local Elites and Patterns of Dominance Joseph W. Esherick, Mary Backus Rankin, 2018-04-20 This important volume affords a panoramic view of local elites during the dramatic changes of late imperial and Republic China. Eleven specialists present fresh, detailed studies of subjects ranging from cultivated upper gentry to twentieth-century militarists, from wealthy urban merchants to village leaders. In the introduction and conclusion the editors reassess the pioneering gentry studies of the 1960s, draw comparisons to elites in Europe, and suggest new ways of looking at the top people in Chinese local social systems. *Chinese Local Elites and Patterns of Dominance* lays the foundation for future discussions of Chinese elites and provides a solid introduction for non-specialists. Essays are by Stephen C. Averill, Lenore Barkan, Lynda S. Bell, Timothy Brook, Prasenjit Duara, Edward A. McCord, William T. Rowe, Keith Schoppa, David Strand, Rubie S. Watson, and Madeleine Zelin. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1990.

Technology and Gender Francesca Bray, 2023-07-28 In this feminist history of eight centuries of private life in China, Francesca Bray inserts women into the history of technology and adds technology to the history of women. Bray takes issue with the Orientalist image that traditional Chinese women were imprisoned in the inner quarters, deprived of freedom and dignity, and so physically and morally deformed by footbinding and the tyrannies of patriarchy that they were incapable of productive work. She proposes a concept of gynotechnics, a set of everyday technologies that define women's roles, as a creative new way to explore how societies translate moral and social principles into a web of material forms and bodily practices. Bray examines three different aspects of domestic life in China, tracing their developments from 1000 to 1800 A.D. She begins with the shell of domesticity, the house, focusing on how domestic space embodied hierarchies of gender. She follows the shift in the textile industry from domestic production to commercial production. Despite increasing emphasis on women's reproductive roles, she argues, this cannot be reduced to childbearing. Female hierarchies within the family reinforced the power of wives, whose responsibilities included ritual activities and financial management as well as the education of children.

Prints and Printmaking Antony Griffiths, 1996 Introductory text that touches on the basics of various printmaking techniques and briefly describes the history of each.

The Ancient Egyptian Senet Game Medhananda,Yvonne Artaud,2006-01-01 This book examines the ancient game board of the Egyptian pharaohs with its thirty symbols. Medhananda found that each of these houses or symbols corresponds to a psychological force-field, to an archetype within us. The reader is invited to explore these force-fields in order to discover the many ways of being, to become more conscious of the multifaceted self. Many parts of the ancient hieroglyphic Great Senet Text are translated and interpreted by the author.

State Or Merchant? Helen Dunstan,2006 This book is intended as a contribution to both intellectual and political history. It is partly a study of how Confucian-trained officials thought about the grain trade and the state's role in it.

Controlling from Afar Jane Kate Leonard,1996 When natural disaster threatened the Grand Canal network in the early nineteenth century, the Qing government faced a crisis of colossal proportions. Leonard discusses the Daoguang Emperor's handling of this crisis within the context of the strategic, institutional, and technological imperatives that had long shaped management of the canal. Her lucid explication is accompanied by maps and drawings that clearly illustrate both the setting and the technical details of the canal. Jane Kate Leonard is Professor of Chinese History, University of Akron. Her most recent publications explore Chinese business history of the late imperial period.

Oriental Adventures James Wyatt,2001 This sourcebook provides everything needed to add Asian-style characters to any D&D campaign or to run a fantasy Asian campaign. It includes classes such as Samurai, Shugenja, and Ninja, as well as unique monsters, combat rules, and magic systems. Maps.

Milton's Teeth and Ovid's Umbrella Michael Olmert,1996-06-18 The popular author of The Book of Books offers a delightful look at how historians have plumbed ordinary items and activities to discover fascinating facts about the past. In 50 short, amusing essays, Michael Olmert reveals such things as why toothbrushes were crucial to the Industrial Revolution, the origins of graffiti, and more.

Before and Beyond Divergence Jean-Laurent Rosenthal,R. Bin Wong,2011-04-01 China has reemerged as a powerhouse in the global economy, reviving a classic question in economic history: why did sustained economic growth arise in Europe rather than in China? Many favor cultural and environmental explanations of the nineteenth-century economic divergence between Europe and the rest of the world. This book, the product of over twenty years of research, takes a sharply different tack. It argues that political differences which crystallized well before 1800 were responsible both for China's early and more recent prosperity and for Europe's difficulties after the fall of the Roman Empire and during early industrialization. Rosenthal and Wong show that relative prices matter to how economies evolve; institutions can have a large effect on relative prices; and the spatial scale of polities can affect the choices of institutions in the long run. Their historical perspective on institutional change has surprising implications for understanding modern transformations in China and Europe and for future expectations. It also yields insights in comparative economic history, essential to any larger social science account of

modern world history.

Escaping Poverty Peer Vries, 2013 One of the biggest debates in economic history deals with the Great Divergence. How can we explain that at a certain moment in time (the eighteenth and nineteenth centuries) a certain part of the world (the West) escaped from general poverty and became much richer than it had ever been before and than the rest of the world? Many prominent scholars discussed this question and came up with many different answers. This book provides a systematic analysis of the most important of those answers by means of an analysis of possible explanations in terms of natural resources, labour, capital, the division of labour and market exchange, accumulation and innovation, and as potential underlying determining factors institutions and culture. The author juxtaposes the views of economists / social scientists and of global historians and systematically compares Great Britain and China to illustrate his position. He qualifies the importance of natural resources, accumulation and the extension of markets, points at the importance of factor prices and changes in consumption and emphasizes the role of innovation, institutions - in particular an active developmental state - and culture.
