The Linux Command Line, 2nd Edition William Shotts,2019-03-05 You've experienced the shiny, point-and-click surface of your Linux computer--now dive below and explore its depths with the power of the command line. The Linux Command Line takes you from your very first terminal keystrokes to writing full programs in Bash, the most popular Linux shell (or command line). Along the way you'll learn the timeless skills handed down by generations of experienced, mouse-shunning gurus: file navigation, environment configuration, command chaining, pattern matching with regular expressions, and more. In addition to that practical knowledge, author William Shotts reveals the philosophy behind these tools and the rich heritage that your desktop Linux machine has inherited from Unix supercomputers of yore. As you make your way through the book's short, easily-digestible chapters, you'll learn how to:

- Create and delete files, directories, and symlinks
- Administer your system, including networking, package installation, and process management
- Use standard input and output, redirection, and pipelines
- Edit files with Vi, the world's most popular text editor
- Write shell scripts to automate common or boring tasks
- Slice and dice text files with cut, paste, grep, patch, and sed

Once you overcome your initial shell shock, you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be surprised if your mouse starts to gather dust.

How to Avoid a Climate Disaster Bill Gates, 2021-02-16 #1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

Whistleblowing for Change Tatiana Bazzichelli,2021-11-30 The courageous acts of whistleblowing that inspired the world over the past few years have changed our perception of surveillance and control in today's information society. But what are the wider effects of whistleblowing as an act of dissent on politics, society, and the arts? How does it contribute to new courses of action, digital tools, and contents? This urgent intervention based on the work of Berlin's Disruption Network Lab examines this growing phenomenon, offering interdisciplinary pathways to empower the public by investigating whistleblowing as a developing political practice that has the ability to provoke change from within.

Living the Faith James Leonard, 2012-09-14 Who is Tom Monaghan? Is he the four-year-old kid whose father died on Christmas Eve and whose mother sent him to an orphanage and then a juvenile detention home? Is he the entrepreneurial genius who built Domino's Pizza from a hole-in-the-wall pizzeria in Michigan into an American brand as world-conquering as

Ford or Coke? Is he the religious visionary who sold Domino's for \$1 billion to create an orthodox Catholic university, law school, and special interest law firm with the goal of transforming America to reflect his conservative values? He's all that and more. With extensive interviews with friends and enemies plus unprecedented access to the man himself, but wholly without his authorization, *Living the Faith* illuminates Tom Monaghan, the man and the myth. *Living the Faith* is the much-needed, definitive biography of one of the most fascinating and controversial figures in the realms of American business and religion. Through eighteen hard-boiled chapters, journalist James Leonard follows Monaghan on his path from a heartbroken kid who climbed into his father's coffin to the business tycoon who purchased the world-champion Detroit Tigers and spent a fortune on his own air force, navy, and island to the religious visionary who founded a university to make saints and a public interest law firm to overturn evolution. A sympathetic but critical perspective of the man and his works, this book is for believers, nonbelievers, and agnostics; for conservatives, liberals, and independents; for the rich, the poor, and the shrinking middle class. Mainly, however, this book is for those who want the facts about Tom Monaghan---and the truth about the effect religion had on one man and the effect that man had on the world.

Fission-track Thermochronology and Its Application to Geology Marco G. Malusà, Paul G. Fitzgerald, 2019 This book is focused on the basics of applying thermochronology to geological and tectonic problems, with the emphasis on fission-track thermochronology. It is conceived for relatively new practitioners to thermochronology, as well as scientists experienced in the various methods. The book is structured in two parts. Part I is devoted to the fundamentals of the fission-track method, to its integration with other geochronologic methods, and to the basic principles of statistics for fission-track dating and sedimentology applied to detrital thermochronology. Part I also includes the historical development of the technique and thoughts on future directions. Part II is devoted to the geological interpretation of the thermochronologic record. The thermal frame of reference and the different approaches for the interpretation of fission-track data within a geological

framework of both basement and detrital studies are discussed in detail. Separate chapters demonstrate the application of fission-track thermochronology from various perspectives (e.g., tectonics, petrology, stratigraphy, hydrocarbon exploration, geomorphology), with other chapters on the application to basement rocks in orogens, passive continental margins and cratonic interiors, as well as various applications of detrital thermochronology.

Look at Me! Orville G Brim, 2010-04-23 Four million adults in the United States say that becoming famous is the most important goal in their lives. In any random sampling of one hundred American adults, two will have fame as their consuming desire. What motivates those who set fame as their priority, where did the desire come from, how does the pursuit of fame influence their lives, and how is it expressed? Based on the research of Orville Gilbert Brim, award-winning scholar in the field of child and human development, *Look at Me!* answers those questions. *Look at Me!* examines the desire to be famous in people of all ages, backgrounds, and social status and how succeeding or failing affects their lives and their personalities. It explores the implications of the pursuit of fame throughout a person's lifetime, covering the nature of the desire; fame, money, and power; the sources of fame; how people find a path to fame; the kinds of recognition sought; creating an audience; making fame last; and the resulting, often damaged, life of the fame-seeker. In our current age of celebrity fixation and reality television, Brim gives us a social-psychological perspective on the origins of this pervasive desire for fame and its effects on our lives. *Look at Me!* is a fascinating in-depth study of society's obsession with fame. If you ever wondered what it's like to be famous, why fame comes to some and is sought by others, it's all here . . . ---Jeffrey L. Bewkes, Chairman and CEO, Time Warner In a voice filled with wisdom and insight, daring and self-reflection, Orville Brim masterfully traces the developmental origins and trajectory of fame. *Look at Me!* lets us see---with new eyes---the cultural priorities and obsessions that feed our individual hunger and appetites. A rare and rewarding book. ---Sara Lawrence-Lightfoot, Emily Hargroves Fisher Professor of Education at Harvard University and author of *Respect* and *The Third Chapter* Orville Gilbert Brim has had a long and distinguished career. He is the former director of the John D. and Catherine T. MacArthur Foundation Research Network on Successful Midlife Development, former president of the Foundation for Child Development, former

president of the Russell Sage Foundation, and author and coauthor of more than a dozen books about human development, intelligence, ambition, and personality. Cover image ©iStockphoto.com/susib
