Five Practices of Fruitful Congregations Bishop Robert Schnase, 2018-05-15 Over the past ten years, thousands of church leaders have successfully transformed congregations with the principles from the original Five Practices: Radical Hospitality, Passionate Worship, Intentional Faith Development, Risk-Taking Mission and Service, and Extravagant Generosity. However, much has changed in the world and the Church. Leaders have discovered new ways to implement the Five Practices in settings that were not imagined when the original book was released. This revised and updated edition of the ministry leadership classic includes a significant amount of new material. How are the Practices being used now, in new types of congregations? How has each Practice changed in the last decade? What new issues or concerns do leaders need to consider in relation to each Practice? This revision provides leaders with a 'next step' look at the original practices. Schnase gathered ideas and other content from ministry leaders who have been using the Five Practices, and explains how those ideas work, how leaders adapted the principles to their own settings, and how they expanded them. A new preface redefines 'Congregations' given their evolving nature. When the original book was written, the new forms of Christian community either did not exist or were barely known. The Five Practices are, however, just as essential to the new types of congregations as they were to the traditional church. Since the original book, there is more variety, diversity, and experimentation in worship. The revised Five Practices includes material based on these new forms. Small group study has always been important for intentional faith development. But since the original book, the nature of those groups has transformed to include secular settings and a wide variety of affinities profoundly affecting how faith leaders approach issues of faith development, and in many cases radically changes what they offer in their communities. Imagine the topic of Risk-Taking Mission and Service before Black Lives Matter, the Syrian refugee crisis, and the Trump administration. This new version gives instruction and specific ideas for how we might best serve today's world.

Marking Time Nicole R. Fleetwood, 2020-04-28 A powerful document of the inner lives and creative visions of men and

women rendered invisible by America's prison system. More than two million people are currently behind bars in the United States. Incarceration not only separates the imprisoned from their families and communities; it also exposes them to shocking levels of deprivation and abuse and subjects them to the arbitrary cruelties of the criminal justice system. Yet, as Nicole Fleetwood reveals, America's prisons are filled with art. Despite the isolation and degradation they experience, the incarcerated are driven to assert their humanity in the face of a system that dehumanizes them. Based on interviews with currently and formerly incarcerated artists, prison visits, and the author's own family experiences with the penal system, *Marking Time* shows how the imprisoned turn ordinary objects into elaborate works of art. Working with meager supplies and in the harshest conditions—including solitary confinement—these artists find ways to resist the brutality and depravity that prisons engender. The impact of their art, Fleetwood observes, can be felt far beyond prison walls. Their bold works, many of which are being published for the first time in this volume, have opened new possibilities in American art. As the movement to transform the country's criminal justice system grows, art provides the imprisoned with a political voice. Their works testify to the economic and racial injustices that underpin American punishment and offer a new vision of freedom for the twenty-first century.

Art and Merchandise in Keith Haring's Pop Shop Amy Raffel, 2020-12-30 As one of the first academic monographs on Keith Haring, this book uses the Pop Shop, a previously overlooked enterprise, and artist merchandising as tools to reconsider the significance and legacy of Haring's career as a whole. Haring developed an alternative approach to both the marketing and the social efficacy of art: he controlled the sales and distribution of his merchandise, while also promulgating his belief in accessibility and community activism. He proved that mass-produced objects can be used strategically to form a community and create social change. Furthermore, looking beyond the 1980s, into the 1990s and 2000s, Haring and his shop prefigured artists' emerging, self-aware involvement with the mass media, and the art world's growing dependence on marketing and commercialism. The book will be of interest to scholars or students studying art history, consumer culture, cultural studies, media studies, or market studies, as well as anyone with a curiosity about Haring and his work, the 1980s art scene in New York, the East Village, street art, art activism, and art merchandising.

Käthe Kollwitz Louis Marchesano, 2020-01-07 This collection explores Kollwitz's most creative years, examining her sequences of images, with a focus on the tension between making and meaning. German printmaker Käthe Kollwitz (1867–1945) is known for her unapologetic social and political imagery; her representations of grief, suffering, and struggle; and her equivocal ideas about artistic and political labels. This volume explores her most creative years, roughly the late

1890s to the mid-1920s, highlighting the tension between making and meaning throughout her work. Correlating Kollwitz's obsessive printmaking experiments with the evolution of her images, it assesses the unusually rich progressions of preparatory drawings, proofs, and rejected images behind Kollwitz's compositions of struggling workers, rebellious peasants, and grieving mothers. This selected catalogue of the Dr. Richard A. Simms collection at the Getty Research Institute provides a bird's-eye view of Kollwitz's sequences of images as well as the interrelationships among prints produced over multiple years. The meanings and sentiments emerging from Kollwitz's images are not, as is often implied, unmediated expressions of her politics and emotions. Rather, Kollwitz transformed images with deliberate technical and formal experiments, seemingly endless adjustments, wholesale rejections, and strategic regroupings of figures and forms—all of which demonstrate that her obsessive dedication to making art was never a straightforward means to political or emotional ends.

Building Character Charles L. Davis, 2019-12-17 Winner, 2021 CAAA Charles Rufus Morey Book Award Winner, 2021 On the Brinck Book Award Shortlist, 2020 MSA First Book Prize In the nineteenth-century paradigm of architectural organicism, the notion that buildings possessed character provided architects with a lens for relating the buildings they designed to the populations they served. Advances in scientific race theory enabled designers to think of "race" and "style" as manifestations of natural law: just as biological processes seemed to inherently regulate the racial characters that made humans a perfect fit for their geographical contexts, architectural characters became a rational product of design. Parallels between racial and architectural characters provided a rationalist model of design that fashioned some of the most influential national building styles of the past, from the pioneering concepts of French structural rationalism and German tectonic theory to the nationalist associations of the Chicago Style, the Prairie Style, and the International Style. In *Building Character*, Charles Davis traces the racial charge of the architectural writings of five modern theorists—Eugene Emmanuel Viollet-le-Duc, Gottfried Semper, Louis Sullivan, Frank Lloyd Wright, and William Lescaze—to highlight the social, political, and historical significance of the spatial, structural, and ornamental elements of modern architectural styles.

Gender, Sexuality and Peace Education Laura L. Finley, Robin Cooper, 2018-06-01 This edited volume, authored by scholars, students, and activists, focuses on how peace educators at the collegiate level can more effectively address gender and sexuality. Chapters focus on the classroom and the campus at large, and emphasize the importance of interdisciplinary practice, thoughtful approaches that offer both challenges and safety, and solidarity and support. The volume includes entries on hot and important topics, including trigger warnings, using popular culture in the classroom, sex trafficking, campus sexual assault, and more. Contributors come from a variety of disciplinary areas, making the volume eclectic in nature. Further, most entries include student voices, providing much-needed agency for college youth. While the book does offer a critical perspective, importantly, chapters also offer hope and possibility.

Finns of Michigan's Upper Peninsula The Finnish American Heritage Center, 2018-11-19 On Midsummer Eve, 1865,

more than 30 Finnish and Sami immigrants disembarked from a Great Lakes ship to a place called Hancock, Michigan. At the time, Hancock consisted of nothing more than a small cluster of humble buildings, but it was here, on the outskirts of mid-19th-century civilization, that Finnish settlement in Michigan's Upper Peninsula (UP) took root. Much to the surprise of these new Americans, Midsummer was not a religious holiday marked by feasts in celebration of the season's prolonged sunlight. Rather, the newcomers were immediately hastened into the bowels of the earth to extract copper in pursuit of the American Dream. In short order, hardworking Finnish immigrants became reputable miners, lumberjacks, farmers, maids, and commercial fishermen. A century and a half later, the UP boasts the largest Finnish population outside of the motherland and sustains the determined spirit the Finns call *sisu*--an influence that remains palpable in all 15 UP counties.

Being the Change Peter Kalmus, 2017-08-01 "A plethora of insights about nature and ourselves, revealed by one man's journey as he comes to terms with human exploitation of our planet." —Dr. James Hansen, climate scientist and former director of NASA's Goddard Institute for Space Studies Life on one-tenth the fossil fuels turns out to be awesome. We all want to be happy. Yet as we consume ever more in a frantic bid for happiness, global warming worsens. Alarmed by drastic changes now occurring in the Earth's climate systems, Peter Kalmus, a climate scientist and suburban father of two, embarked on a journey to change his life and the world. He began by bicycling, growing food, meditating, and making other simple, fulfilling changes. Ultimately, he slashed his climate impact to under a tenth of the US average and became happier

in the process. *Being the Change* explores the connections between our individual daily actions and our collective predicament. It merges science, spirituality, and practical action to develop a satisfying and appropriate response to global warming. Part one exposes our interconnected predicament: overpopulation, global warming, industrial agriculture, growth-addicted economics, a sold-out political system, and a mindset of separation from nature. It also includes a readable but authoritative overview of climate science. Part two offers a response at once obvious and unprecedented: mindfully opting out of this broken system and aligning our daily lives with the biosphere. The core message is deeply optimistic: living without fossil fuels is not only possible, it can be better. “In this timely and provocative book, Peter Kalmus points out that changing the world has to start with changing our own lives. It’s a crucial message that needs to be heard.” —John Michael Greer, author of *After Progress* and *The Retro Future*

With advice on every aspect of life as a lesbian, gay, bisexual, or queer woman—from your first Pride to confronting discrimination in the workplace—there is guidance for some of the most major parts of living in a world that can vacillate between supportive and cruel. “Lindsay King-Miller is the cool, queer aunt you never had but always wanted—she is unrelentingly kind, totally funny, and no subject is off limits. *Ask a Queer Chick* is essential reading.” —Jolie Kerr, author of *My Boyfriend Barfed In My Handbag...And Other Things You Can't Ask Martha*

Reclaiming Lives Joan Treppa, 2021-06-15 ONE AVERAGE BUT DETERMINED WOMAN SETS OUT TO SHAKE UP THE JUSTICE SYSTEM IN THE NAME OF SIX WRONGFULLY CONVICTED MEN. The 1992 death of mill worker, Tom Monfils, and the resulting trial of six men accused of his murder shocked a community. In 2009, Joan read a factual book about the case which sent her on a mission to seek justice for these men. Realizing a deep emotional connection to them, she ignites the interest of a retired crime scene expert/private investigator who initiates a reinvestigation. *Reclaiming Lives* provides an uncomplicated examination of our nation's criminal justice system. Its overall message validates truths in the face of adversity, delivers hope where there was none, and demonstrates the capacity to overcome insurmountable obstacles. As of April 30, 2021, the National Registry of Exonerations reports that some 2,776 actually innocent, but wrongly convicted,

individuals in the U.S. have been exonerated since 1989. As *Reclaiming Lives* painfully reveals, however, this number represents only a fraction of the total number of actually innocent people who have been wrongly convicted since 1989, but not yet exonerated. Joan Treppa's dedicated, years-long effort to obtain justice for the Monfils Six defendants is testament to the inherent difficulty in overturning wrongful convictions, even when the evidence of actual innocence compellingly refutes the prosecution's case. *Reclaiming Lives* teaches the reader why it is not only critical to prevent wrongful convictions from occurring in the first instance but also why the criminal justice system must be far more willing than it has often been to correct these injustices after they are shown to have occurred. - Steve Kaplan, former post-conviction counsel for Keith Kutska.

These individuals can be found working in brothels, factories, mines, farm fields, restaurants, construction sites and private homes: many have been tricked by human traffickers and lured by false promises of good jobs or education, some are forced to work at gunpoint, while others are trapped by phony debts from unscrupulous moneylenders. The SAGE Handbook of Human Trafficking and Modern-Day Slavery provides a comprehensive, interdisciplinary and global look at the diverse issues surrounding human trafficking and slavery in the post-1945 environment. Covering everything from history, literature and politics to economics, international law and geography, this Handbook is essential reading for academics and researchers, as well as for policy-makers and non-governmental organisations

Psychology and Climate Change Susan Clayton, Christie Manning, 2018-06-05 Psychology and Climate Change: Human Perceptions, Impacts, and Responses organizes and summarizes recent psychological research that relates to the issue of climate change. The book covers topics such as how people perceive and respond to climate change, how people understand and communicate about the issue, how it impacts individuals and communities, particularly vulnerable communities, and how individuals and communities can best prepare for and mitigate negative climate change impacts. It addresses the topic at multiple scales, from individuals to close social networks and communities. Further, it considers the role of social diversity in shaping vulnerability and reactions to climate change. Psychology and Climate Change describes the implications of psychological processes such as perceptions and motivations (e.g., risk perception, motivated cognition, denial), emotional responses, group identities, mental health and well-being, sense of place, and behavior (mitigation and adaptation). The book strives to engage diverse stakeholders, from multiple disciplines in addition to psychology, and at every level of decision making - individual, community, national, and international, to understand the ways in which human capabilities and tendencies can and should shape policy and action to address the urgent and very real issue of climate change. Examines the
