Employees First, Customers Second Vineet Nayar, 2010 Imagine a management philosophy based not upon serving a company's customers, but on serving the company's employees. Vineet Nayar, CEO of HCL Technologies in India, has put such a philosophy into practice with remarkable results. His employee first, customer second mantra has been recognized globally as an example of organizational innovation, and was deemed a new and radical management philosophy ripe for the picking in the Western world by *Business Week*. In this book, Nayar himself describes his blunt refusal to treat the flesh and blood of HCL--its people--as human resource or as intellectual capital or even as an asset like all its other assets--and how his

unique perspective led to an holistic transformation of his organization. By putting employees on top of the organizational pyramid, he argues, your company can fully realize the value created in the interface between customers and employees. This book leads managers and executives through the five core aspects of Nayar's approach, demonstrating how to create a sense of urgency, overhaul incentives and reporting structures, foster transparency in communications and feedback, provide platforms for achievement and personal growth, and finally recognize the potential of every individual in the organization. The Employee First philosophy should be the fulcrum of the transformation journey of any organization.

Harrington, 2019-10-01 Health Care Finance and the Mechanics of Insurance and Reimbursement stands apart from other texts on health care finance or health insurance, in that it combines financial principles unique to the health care setting with the methods and process for reimbursement (including coding, reimbursement strategies, compliance, financial reporting, case mix index, and external auditing). Thoroughly updated for its second edition, this text reflects changes to the Affordable Care Act, Managed Care Organizations, new coding initiatives, new components of the revenue cycle (from reimbursement to compliance), updates to regulations surrounding health care fraud and abuse, changes to the Recovery Audit Contractors (RAC) program, and more.
