**Landscape Ecology for Sustainable Society** Sun-Kee Hong,Nobukazu Nakagoshi,2018-03-23 The research category of the landscape ecology, which researches the structure, functions, and the spatio-temporal changes of the ecological

landscapes, has now been contributing to the human life and the shifts of the socio-economic paradigm. Global warming has been influencing the universal life patterns of the mankind which have been maintained in the past several hundreds of years. And it has been having the influences on the international social problems and economic problems. Although the diverse plans for adapting to the climate changes have been the topics of the conservations among the ecologists internationally, it is the reality that the speed of the changes of the environment has been quicker than the time it takes to complete the solutions. In order to maintain the sustainable earth and the sustainable society, the role of the landscape ecology has been coming to the fore. Especially, the theories and the methodologies of the landscape ecology have been applied to the multidisciplinary researches by going beyond the research category of ecology, including the maximization of the efficiencies of the land spaces, the management of the ecological space (habitats) in which the biological diversity can be maintained, the utilization of the resources that are absolutely needed by the human beings (Here, it is compressed to water, energy, and food), etc. and until reaching the human society. It is considered that, to that extent, the utilizations and the applications of the landscape ecology are very much needed for the diagnoses and the evaluations of the global environmental problems which have been proceeded with rapidly in the modernity. This book is not comprised of any general remarks that explain the theories and the methods of the landscape ecology. Already, based on the basic theories of the landscape ecology, the writers have conducted the investigations on the farm villages, the cities, and the coastal ecosystems. And, through the space analyses and interpretations, the structure and functions of the landscapes were analyzed. Of course, in this book, too, the diverse ecosystems and the landscape ecological methodologies regarding the land use have been presented. However, the core of this book focuses more on what role the landscape ecology must play for the materialization of a sustainable society in the future. At the farm villages, the sustainable agriculture will be presented, and, at the cities, the discussions on the green networks and the energies will be proceeded with. Also, regarding the coasts and the seas, a thesis on the safety of the life zones of the residents adjacent to the sea and on the conservation of the island ecosystems will be presented. The sustainable society is a system that is formed by having the sustainable development as a basis. It is considered to be one aspect within a kind of a sustainable process with regard to which the natural world and the human world coexist and are in a symbiotic relationship harmoniously. In order to maintain the biodiversity, the reasonable adjustments of the human activities, like the use of the resources, are absolutely needed. Without the biological resources, the cultural diversity of the human beings, too, cannot exist. Consequentially, recently and internationally, there are a lot of the case examples that express the biocultural diversity by linking the biological diversity with the cultural diversity. In this book, the role of the landscape ecology as an academic link which can connect the two possible, if possible, is highly expected. It is, indeed, the biocultural landscape. It can be said that this concept, also, is the interconnection of the multidisciplinary spaces that must be dealt with in the modern landscape ecology. Through this book, it is intended to

present a new directionality which can contribute to the sustainable society at the same time as the organization of the theories and the methods of the landscape ecology.

*A Mist Connection* Katrin Kleemann,2023-06-06 In the summer of 1783, an unusual dry fog descended upon large parts of the northern hemisphere. The fog brought with it bloodred sunsets, a foul sulfuric odor, and a host of other peculiar weather events. Inspired by the Enlightenment, many naturalists attempted to find reasonable explanations for these occurrences. Between 8 June 1783 and 7 February 1784, a 27-kilometer-long fissure volcano erupted in the Icelandic highlands. It produced the largest volume of lava released by any volcanic eruption on planet Earth in the last millennium. In Iceland, the eruption led to the death of one-fifth of the population. The jetstream carried its volcanic gases further afield to Europe and beyond, where they settled as a fog, the origin of which puzzled naturalists and laypersons. *A Mist Connection* is an environmental history that documents the Laki eruption and its consequences for Iceland and the wider world. The book combines methods of historical disaster research, climate history, global history, history of science, and geology in an interdisciplinary approach. Icelandic flood lava eruptions of this scale have a statistical recurrence period of 200 to 500 years; it is crucial to understand their nature so that we can prepare for the next one. An eruption of this magnitude would surely be disastrous for our modern, globalized, and interconnected world.

**The Arab-Israeli Conflict** P.R. Kumaraswamy,2023-04-24 This book provides a holistic view of the conflict between Israel and its Arab neighbours and studies the global implications of their fraught relations. Focusing on the conflict from its beginning in the late 19th century, the author provides a well-rounded and balanced narrative by examining its religious,

ideological, ethnic, political, national, regional and international dimensions. The volume covers a wide range of issues, such as the conflicting historical legacy of the city of Jerusalem, Jewish longing for a homeland, the partition of Palestine, various wars and conflicts since 1948, Palestinian resistance, the Arab Boycott of Israel and the Abraham Accords. It also tackles the contested national claims and the refugee question and looks at various peace-making efforts, including the role of external stakeholders such as the US, UK, Russia and India. A comprehensive study of the Arab-Israeli conflict, the book is richly supported by a swath of references to materials, documents, maps and video links. It will be an essential reading for students, academics and teachers of politics and international relations, national security, geopolitics, history, military and strategic studies, Middle East studies, conflict resolution and peace-making.

**The Ufo-Christianity Connection** Fred R. David,2010-11-15 For many centuries, science and religion have remained staunchly independent. Whenever issues have developed that simultaneously touched on both areas, debate often ensued for example, when scientists first proposed that the earth revolved around the sun, or when the theory of evolution was proposed. There has always been a cultural disconnect between science and religion that has caused dissention and distrust. Research conducted by author Fred R. David, however, reveals that the missing link between science and religion may be UFOs or, more specifically, the beings inside those crafts. The UFOChristianity Connection: Fact or Fiction reveals that UFOs played a significant role in how ancient civilizations built megalithic structures and predicted celestial events perfectly; brings to life the close association that ancient civilizations had with ancient astronautswhom they called gods or sky people;

reveals that many events described in ancient writings, including the Bible, involved UFO encounters; gives readers a unique perspective to engage others in discussing angels, God, UFOs, Bigfoot, Satan, giants, the underworld, the flood, Atlantis, and Jesus. The scientific information presented here is vital for people of all faiths on all continents. Explore the missing link that bridges the gap between science and religion.

Shadow Sites Kitty Hauser, 2007-03-29 At certain times of the day - at sunrise, and sunset - the outlines of prehistoric fields, barrows and hill-forts in the British landscape may be thrown into relief. Such 'shadow sites', best seen from above, and captured by an airborne camera, are both examples of, and metaphors for, a particular way of seeing the landscape. At a time of rapid modernisation and urbanisation in mid-twentieth-century Britain, an archaeological vision of the British landscape reassured and enchanted a number of writers, artists, photographers, and film-makers. From John Piper, Eric Ravilious and Shell guide books, to photographs of bomb damage, aerial archaeology, and *The Wizard of Oz*, Kitty Hauser delves into evocative interpretations of the landscape and looks at the affinities between photography as a medium to capture traces of the past as well as their absence.

**Farming While Black** Leah Penniman, 2018 *Farming While Black* is the first comprehensive how to guide for aspiring African-heritage growers to reclaim their dignity as agriculturists and for all farmers to understand the distinct, technical contributions of African-heritage people to sustainable agriculture. At Soul Fire Farm, author Leah Penniman co-created the Black and Latino Farmers Immersion (BLFI) program as a container for new farmers to share growing skills in a culturally relevant and supportive environment led by people of color. *Farming While Black* organizes and expands upon the curriculum of the BLFI to provide readers with a concise guide to all aspects of small-scale farming, from business planning to preserving the harvest. Throughout the chapters Penniman uplifts the wisdom of the African diasporic farmers and activists whose work informs the techniques described--from whole farm planning, soil fertility, seed selection, and agroecology, to using whole foods in culturally appropriate recipes, sharing stories of ancestors, and tools for healing from the trauma associated with slavery and economic exploitation on the land. Woven throughout the book is the story of Soul Fire Farm, a national leader in the food justice movement. --
