West Linn Cornelia Becker Seigneur,2009 The largest iron meteorite discovered in the United States, weighing 15.5 tons, was unearthed in West Linn in 1902 and featured in the 1905 World's Fair before journeying to New York's American Museum of Natural History, where it remains. West Linn was carved onto the map years before, when Robert Moore purchased 1,000 acres of land in 1840 from the Wallamut Indians at Willamette Falls. Soon a lumber mill and flour mill were established, and the region was given a new name--Linn City--after free-state advocate Lewis F. Linn. Hugh Burns and the Miller, Fields, and Walling families also figured in early West Linn history. Though an 1861 fire, then flood, destroyed what was Linn City, the falls continued drawing industry. Officially incorporated into Oregon in 1913, West Linn, known for its hills, trees, rivers, and famous meteorite, is a sought-after community in which to raise families and made the 2005 top-100 list of best places to live.

The Paris of Toulouse-Lautrec Henri de Toulouse-Lautrec, Sarah J. S. Suzuki, 2014 Though deeply engaged with painting and drawing, Toulouse-Lautrec's lasting contribution to artistic practice was as a graphic artist. Through his prints and posters, advertisements, and contributions in reviews and magazines, he brought the language of the late-nineteenth-

century French avant-garde to a broad public. He ushered in the first print boom of the modern era; taking advantage of lithography's new potential for colour and scale, he made both posters for the streets of Paris and prints for the new bourgeois collector's living room. During his short career, he created more than 350 prints and 30 posters, as well as lithographed theatre programmes and covers for books and sheet music. The Museum of Modern Art's collection of this material is stellar, encompassing over 100 prints and posters, his most important book projects, and many magazines, journals and other examples of printed ephemera. Featuring an overview essay by Sarah Suzuki, Associate Curator in the Department of Drawings and Prints at MoMA, this publication presents thematically organized groupings of Toulouse-Lautrec's prints from the Museum's collection, each accompanied by an illuminating essay on the theme.

Perilous Policing Thomas Nolan, 2019-03-04 Policing and police practices have changed dramatically since the 9/11 terrorist attacks and those changes have accelerated since the summer of 2014 and the death of Michael Brown at the hands of then-police officer Darren Wilson in Ferguson, Missouri. Since the November 2016 election of Donald Trump as president, many law enforcement practitioners, policy makers, and those concerned with issues of social justice have had concerns that there would be seismic shifts in policing priorities and practices at the federal, state, county, and local and tribal levels that will have significant implications for constitutional rights and civil liberties protections, particularly for people of color.

Perilous Policing: Criminal Justice in Marginalized Communities provides a much-needed interrogatory to law enforcement practices and policies as they continue to evolve during this era of uncertainty and anxiety. Key topics include the police and marginalized populations, the use of technology to surveil individuals and groups, the emergence of the Black Lives Matter movement and the erosion of the police narrative, the use of force (particularly deadly force) against people of color, the role of the police in immigration enforcement, the war on cops, and police militarization. Thomas Nolan's critique of current practice and his preliminary conclusions as to how to navigate contemporary policing away from the pitfalls of discredited and counterproductive practices will be of interest to advanced undergraduates and graduate students in Policing, Criminology, Justice Studies, and Criminal Justice programs, as well as to researchers, law enforcement professionals, and police policy makers.
