Thinking, Fast and Slow Daniel Kahneman, 2011-10-25 Major New York Times bestseller Winner of the National Academy of Sciences Best Book Award in 2012 Selected by the New York Times Book Review as one of the ten best books of 2011 A Globe and Mail Best Books of the Year 2011 Title One of The Economist's 2011 Books of the Year One of The Wall Street Journal's Best Nonfiction Books of the Year 2011 2013 Presidential Medal of Freedom Recipient Kahneman's work with Amos Tversky is the subject of Michael Lewis's *The Undoing Project: A Friendship That Changed Our Minds* In his mega bestseller, *Thinking, Fast and Slow*, Daniel Kahneman, the renowned psychologist and winner of the Nobel Prize in Economics, takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking.

He offers practical and enlightening insights into how choices are made in both our business and our personal lives—and how we can use different techniques to guard against the mental glitches that often get us into trouble. Winner of the National Academy of Sciences Best Book Award and the Los Angeles Times Book Prize and selected by The New York Times Book Review as one of the ten best books of 2011, *Thinking, Fast and Slow* is destined to be a classic.

The Psychology of Money Morgan Housel, 2020-09-08 Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

A Random Walk Down Wall Street: The Time-Tested Strategy for Successful Investing (Ninth Edition) Burton G. It is about the timing of life, from microsecond movements to evolutionary changes over millions of years. Human consciousness is riveted to seconds, but a split-second time delay in perception means that we are unaware of anything until it has already happened. We live in the very recent past. Over longer timescales, this book examines the lifespans of the oldest organisms, prospects for human life extension, the evolution of whales and turtles, and the explosive beginning of life four billion years ago. With its poetry, social commentary, and humor, this book will appeal to everyone interested in the natural world.

Urban Outlaw Magnus Walker, 2017-06-01 ****THE INTERNATIONAL BESTSELLER**** Magnus Walker is one of life's originals. Serial entrepreneur, fashion designer, TV presenter, motivational speaker and one of the world's most prolific Porsche collectors, the dreadlocked, tattooed hoarder of individual creativity is a very modern incarnation of success. Raised in the urban decay of Thatcher's Britain, Sheffield-born Magnus Walker left school with just two O levels and drifted for several years before buying a one-way ticket to America. Now, 30 years and three successful businesses later, by following his instincts, rejecting convention and pursuing his passions Magnus has succeeded against all the odds. Here, for the first time, is the full story of his journey from a Northern steel town to the bright lights of Hollywood, from a boy with little hope to an anti-establishment hero. Along the way we'll witness his potent combination of inspiration and graft, discover his motivations and his ambitions, and come to understand his philosophy and the keys to his success. Inspiring and exhilarating, *URBAN OUTLAW* is a compelling tale of succeeding through pure instinct and determination by a man who was brave enough to follow his own path.

The Simple Path to Wealth JL Collins, 2021-08-16 In the dark, bewildering, trap-infested jungle of misinformation and opaque riddles that is the world of investment, JL Collins is the fatherly wizard on the side of the path, offering a simple map, warm words of encouragement and the tools to forge your way through with confidence. You'll never find a wiser advisor with a bigger heart. -- Malachi Rempen: Filmmaker, cartoonist, author and self-described ruffian This book grew out of a series of letters to my daughter concerning various things-mostly about money and investing-she was not yet quite ready to hear. Since money is the single most powerful tool we have for navigating this complex world we've created, understanding it is critical. But Dad, she once said, I know money is important. I just don't want to spend my life thinking about it. This was eye-opening. I love this stuff. But most people have better things to do with their precious time. Bridges to build, diseases to cure, treaties to negotiate, mountains to climb, technologies to create, children to teach, businesses to run. Unfortunately, benign neglect of things financial leaves you open to the charlatans of the financial world. The people who make investing endlessly complex, because if it can be made complex it becomes more profitable for them, more expensive for us, and we are forced into their waiting arms. Here's an important truth: Complex investments exist only to profit those who create and sell them. Not only are they more costly to the investor, they are less effective. The simple approach I created for her and present now to you, is not only easy to understand and implement, it is more powerful than any other. Together we'll explore: Debt: Why you must avoid it and what to do if you have it. The importance of having F-you Money. How to think about money, and the unique way understanding this is key to building your wealth. Where traditional investing advice goes wrong and what actually works. What the stock market really is and how it really works. Why the stock market always goes up and why most

people still lose money investing in it. How to invest in a raging bull, or bear, market. Specific investments to implement these strategies. The Wealth Building and Wealth Preservation phases of your investing life and why they are not always tied to your age. How your asset allocation is tied to those phases and how to choose it. How to simplify the sometimes confusing world of 401(k), 403(b), TSP, IRA and Roth accounts. TRFs (Target Retirement Funds), HSAs (Health Savings Accounts) and RMDs (Required Minimum Distributions). What investment firm to use and why the one I recommend is so far superior to the competition. Why you should be very cautious when engaging an investment advisor and whether you need to at all. Why and how you can be conned, and how to avoid becoming prey. Why I don't recommend dollar cost averaging. What financial independence looks like and how to have your money support you. What the 4% rule is and how to use it to safely spend your wealth. The truth behind Social Security. A Case Study on how this all can be implemented in real life. Enjoy the read, and the journey!

Breath James Nestor, 2020-05-26 A New York Times Bestseller A Washington Post Notable Nonfiction Book of 2020 Named a Best Book of 2020 by NPR “A fascinating scientific, cultural, spiritual and evolutionary history of the way humans breathe—and how we’ve all been doing it wrong for a long, long time.” —Elizabeth Gilbert, author of *Big Magic* and *Eat Pray Love* No matter what you eat, how much you exercise, how skinny or young or wise you are, none of it matters if you’re not breathing properly. There is nothing more essential to our health and well-being than breathing: take air in, let it out, repeat twenty-five thousand times a day. Yet, as a species, humans have lost the ability to breathe correctly, with grave consequences. Journalist James Nestor travels the world to figure out what went wrong and how to fix it. The answers aren’t found in pulmonology labs, as we might expect, but in the muddy digs of ancient burial sites, secret Soviet facilities, New Jersey choir schools, and the smoggy streets of São Paulo. Nestor tracks down men and women exploring the hidden science behind ancient breathing practices like Pranayama, Sudarshan Kriya, and Tummo and teams up with pulmonary tinkerers to scientifically test long-held beliefs about how we breathe. Modern research is showing us that making even slight adjustments to the way we inhale and exhale can jump-start athletic performance; rejuvenate internal organs; halt snoring, asthma, and autoimmune disease; and even straighten scoliotic spines. None of this should be possible, and yet it is. Drawing on thousands of years of medical texts and recent cutting-edge studies in pulmonology, psychology, biochemistry, and human physiology, *Breath* turns the conventional wisdom of what we thought we knew about our most basic biological function on its head. You will never breathe the same again.

It's the book about money for people who don't even want to think about money, until the arrival of that inevitable day when we all realize we must come to terms with this thing called money. Slow River Nicola Griffith, 2003-07-29 Nicola Griffith, winner of the Tiptree Award and the Lambda Award for her widely acclaimed first novel *Ammonite*, now turns her attention closer to the present in *Slow River*, the dark and intensely involving story of a young woman's struggle for survival and independence on the gritty underside of a near-future Europe. She awoke in an alley to the splash of rain. She was naked, a foot-long gash in her back was still bleeding, and her identity implant was gone. Lore Van de Oest was the daughter of one of the world's most powerful families...and now she was nobody. Then out of the rain walked Spanner, an expert data pirate who took her in, cared for her wounds, and gave her the freedom to reinvent herself again and again. No one could find Lore if she didn't want to be found: not the police, not her family, and not the kidnappers who had left her in that alley to die. She had escaped...but she paid for her newfound freedom in crime, deception, and degradation--over and over again. Lore had a choice: She could stay in the shadows, stay with Spanner...and risk losing herself forever. Or she could leave Spanner and find herself again by becoming someone else: stealing the identity implant of a dead woman, taking over her life, and inventing her future. But to start again, Lore required Spanner's talents--Spanner, who needed her and hated her, and who always had a price. And even as Lore agreed to play Spanner's games one final time, she found that there was still the price of being a Van de Oest to be paid. Only by confronting her past, her family, and her own demons could Lore meld together who she had once been, who she had become, and the person she intended to be.... In *Slow River*, Nicola Griffith skillfully takes us deep into the mind and heart of her complex protagonist, where the past must be reconciled with the present if the future is ever to offer solid ground. *Slow River* poses a question we all hope never to need to answer: Who are you when you have nothing left?

How to Avoid a Climate Disaster Bill Gates, 2021-02-16 #1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.
