The Intellectual Education of the Italian Renaissance Artist Angela Dressen,2021-09-02 Scholars have traditionally viewed the Italian Renaissance artist as a gifted, but poorly educated craftsman whose complex and demanding works were created with the assistance of a more educated advisor. These assumptions are, in part, based on research that has focused primarily on the artist's social rank and workshop training. In this volume, Angela Dressen explores the range of educational opportunities that were available to the Italian Renaissance artist. Considering artistic formation within the history of education, Dressen focuses on the training of highly skilled, average artists, revealing a general level of learning that was much more substantial than has been assumed. She emphasizes the role of mediators who had a particular interest in augmenting artists' knowledge, and highlights how artists used Latin and vernacular texts to gain additional knowledge that they avidly sought. Dressen's volume brings new insights into a topic at the intersection of early modern intellectual, educational, and art history.

World Development Report 2017 World Bank Group,2017-01-23 Why are carefully designed, sensible policies too often not adopted or implemented? When they are, why do they often fail to generate development outcomes such as security, growth, and equity? And why do some bad policies endure? World Development Report 2017: Governance and the Law addresses these fundamental questions, which are at the heart of development. Policy making and policy implementation do not occur in a vacuum. Rather, they take place in complex political and social settings, in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests. The process of these interactions is what this Report calls governance, and the space in which these interactions take place, the policy arena. The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness. However, who bargains, who is excluded, and what barriers block entry to the policy arena determine the selection and implementation of policies and, consequently, their impact on development outcomes. Exclusion, capture, and

clientelism are manifestations of power asymmetries that lead to failures to achieve security, growth, and equity. The distribution of power in society is partly determined by history. Yet, there is room for positive change. This Report reveals that governance can mitigate, even overcome, power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security, growth, and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes, and taking into account the interests of previously excluded participants. These changes can come about through bargains among elites and greater citizen engagement, as well as by international actors supporting rules that strengthen coalitions for reform.

Knights at Court Aldo Scaglione, 2023-11-10 *Knights at Court* is a grand tour and survey of manners, manhood, and court life in the Middle Ages, like no other in print. Composed on an epic canvas, this authoritative work traces the development of court culture and its various manifestations from the latter years of the Holy Roman Empire (ca. A.D. 1000) to the Italian Renaissance of the fifteenth and sixteenth centuries. Leading medievalist and Renaissance scholar Aldo Scaglione offers a sweeping sociological view of three geographic areas that reveals a surprising continuity of courtly forms and motifs: German romances; the lyrical and narrative literature of northern and southern France; Italy's chivalric poetry. Scaglione discusses a broad number of texts, from early Norman and Flemish baronial chronicles to the romances of Chrétien de Troyes, the troubadours and Minnesingers. He delves into the *Nibelungenlied*, Dante, Petrarch, Boccaccio, and an array of treatises on conduct down to Castiglione and his successors. All these works and Scaglione's superior scholarship attest to the enduring power over minds and hearts of a mentality that issued from a small minority of people—the courtiers and knights—in central positions of leadership and power. *Knights at Court* is for all scholars and students interested in the civilizing process. This title is part of UC Press's *Voices Revived* program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1991.

Innovation and Transition in Law: Experiences and Theoretical Settings , This book features a discussion on the modernisation of law and legal change, focusing on the key concepts of innovation and transition. These concepts both appear to be relevant and poorly defined in contemporary legal science. A critical reflection on the heuristic value of these categories seems appropriate, particularly considering their dyadic value. While innovation is increasingly appearing in the present day as being the category in which one looks at the modernisation of law, the concept of transition also seems to be the privileged place of occurrence for such dynamics. This group of Italian and Brazilian scholars contributing to this volume intends to investigate such problems through an interdisciplinary prism. It includes points of view both internal to legal studies - such as the history of law, theory of law, constitutional law, private law and commercial law - and external, such as

political philosophy and history of justice and political institutions.

Down These Mean Streets Piri Thomas,1991 A linguistic event. Gutter language, Spanish imagery and personal poetics . . . mingle into a kind of individual statement that has very much its own sound. --The New York Times Book Review Thirty years ago Piri Thomas made literary history with this lacerating, lyrical memoir of his coming of age on the streets of Spanish Harlem. Here was the testament of a born outsider: a Puerto Rican in English-speaking America; a dark-skinned morenito in a family that refused to acknowledge its African blood. Here was an unsparing document of Thomas's plunge into the deadly consolations of drugs, street fighting, and armed robbery--a descent that ended when the twenty-two-year-old Piri was sent to prison for shooting a cop. As he recounts the journey that took him from adolescence in El Barrio to a lock-up in Sing Sing to the freedom that comes of self-acceptance, faith, and inner confidence, Piri Thomas gives us a book that is as exultant as it is harrowing and whose every page bears the irrepressible rhythm of its author's voice. Thirty years after its first appearance, this classic of manhood, marginalization, survival, and transcendence is available in an anniversary edition with a new Introduction by the author.

The Sale of Misattributed Artworks and Antiques at Auction Anne Laure Bandle,2016-10-28 The glamour and mystery of the art auction, gathering interested buyers from across the globe, makes it one of the most fascinating marketplaces in existence. 'Sleepers', artworks or antiques that have been undervalued and mislabelled due to an expert's oversight and consequently undersold, appear regularly. This fascinating new book provides the first extensive study of the phenomenon of sleepers through an in-depth analysis of the contractual relationships, liability and remedies that arise in the context of auction sales.

Linked Democracy Marta Poblet,Pompeu Casanovas,Víctor Rodríguez-Doncel,2019-05-28 This open access book shows the factors linking information flow, social intelligence, rights management and modelling with epistemic democracy, offering licensed linked data along with information about the rights involved. This model of democracy for the web of data brings new challenges for the social organisation of knowledge, collective innovation, and the coordination of actions. Licensed linked data, licensed linguistic linked data, right expression languages, semantic web regulatory models, electronic institutions, artificial socio-cognitive systems are examples of regulatory and institutional design (regulations by design). The web has been massively populated with both data and services, and semantically structured data, the linked data cloud, facilitates and fosters human-machine interaction. Linked data aims to create ecosystems to make it possible to browse, discover, exploit and reuse data sets for applications. Rights Expression Languages semi-automatically regulate the use and reuse of content.

Biodiversity Conservation and Poverty Alleviation Dilys Roe,Joanna Elliott,Chris Sandbrook,Matt

Walpole,2012-11-16 Biodiversity conservation and poverty alleviation are both important societal goals demanding increasing international attention. While they may seem to be unrelated, the international policy frameworks that guide action to address them make an explicit assumption that conserving biodiversity will help to tackle global poverty. Part of the Conservation Science and Practice Series published with the Zoological Society of London, this book explores the validity of that assumption. The book addresses a number of critical questions: Which aspects of biodiversity are of value to the poor? Does the relationship between biodiversity and poverty differ according to particular ecological conditions? How do different conservation interventions vary in their poverty impacts? How do distributional and institutional issues affect the poverty impacts of interventions? How do broader issues such as climate change and the global economic system affect the biodiversity - poverty relationship at different scales? This volume will be of interest to policy-makers, practitioners and researchers concerned with understanding the potential - and limitations - of integrated approaches to biodiversity conservation and poverty alleviation.

Out of the Box Gerfried Stocker,Christine Schöpf,Hannes Leopoldseder,2019 Since 1979 Ars Electronica has tracked and analyzed the digital revolution and its multiple impacts. The focus has always been on processes and trends combining art, technology, and society. Results of this artistic and scientific research can be seen in the form of an annual festival in Linz, Austria, where a five-day-long program involves conferences, podium discussions, workshops, exhibitions, performances, interventions, and concerts. The festival is planned, organized, and executed in collaboration with artists and scientists from around the world. A variety of controversial futuristic themes are always the center of attention. Richly illustrated and containing in-depth essays, this book is a companion to the 37th Ars Electronica Festival.00Exhibition: 37th Ars Electronica Festival, Linz, Austria (05.09.09.2019).

Encyclopedia of Education and Information Technologies Arthur Tatnall,2020-05-24 This encyclopedia aims to offer researchers an indication of the breadth and importance of information systems in education, including the way IT is being used, and could be used to enable learning and teaching. The encyclopedia covers all aspects of the interaction between education and information technologies, including IT in kindergartens, primary and secondary schools, universities, training colleges, industry training, distance education and further education. It also covers teaching and computing, the use of IT in many different subject areas, the use of IT in educational administration, and national policies of IT and education.

Extremism and Violent Extremism in Serbia Valery Perry, 2019-04-30 The topics of extremism, violent extremism, and radicalization leading to terrorism have constituted an increasingly prominent area of policy interest and donor support in recent years, globally and in the western Balkans. Counterterrorism initiatives, as well as efforts to prevent and counter violent extremism (P/CVE), often reveal the need for broader reform, peacebuilding, and democratization strategies. While foreign donors and domestic authorities tend to focus on ISIS-inspired violent jihadism, in many countries in the region, and particularly in the case of Serbia, there are other forms of extremism—namely far-right nationalism, violent hooliganism, and neo-Nazi movements—that are often considered to be more of an imminent threat, particularly as they are often viewed as examples of “normalized” political expression. The dynamics of reciprocal radicalization, in which competing extremisms feed off of, reinforce, and even need one another, can create seemingly intractable conflict spirals of escalation and violence. This volume explores these dynamics in Serbia through original research, taking fresh perspectives that demonstrate that Serbia is vulnerable to many types of extremism, which can best be prevented by achieving the liberal, democratic, rights-based reforms that have remained elusive for more than two decades. This broad and holistic approach is important for Serbia and its neighbors as the security lens through which most research has been focused to date has done little to explain the deep and structural dynamics of radicalization and extremism in the region.

Theoretical Investigations Gerry Stahl, 2022-05-08 Computers have transformed how we think, discuss and learn—as individuals, in groups, within cultures and globally. However, social media are problematic, fostering flaming, culture wars and fake news. This volume presents an alternative paradigm for computer support of group thinking, collaborative learning and joint knowledge construction. This requires expanding concepts of cognition to collectivities, like collaborative groups of networked students. *Theoretical Investigations* explores the conditions for group cognition, supplying a philosophical foundation for new models of pedagogy and methods to analyze group interaction. Twenty-five self-contained investigations document progress in research on computer-supported collaborative learning (CSCL)—both in Stahl’s own research and during the first decade of the CSCL journal. The volume begins with two new reflections on the vision and theory that result from this research. Representing both ethnomethodological and social-constructivist research paradigms, the investigations within this volume comprise a selection of seminal and influential articles and critical commentaries that contribute to an understanding of concepts and themes central to the CSCL field. The book elaborates an innovative theory of group cognition and substantiates the pedagogical potential of CSCL. *Theoretical Investigations: Philosophical Foundations of Group Cognition* is essential as a graduate text for courses in educational theory, instructional design, learning and networked technologies. The investigations will also appeal to researchers and practitioners in those areas.

Deep Future Curt Stager, 2011-03-15 A Kirkus Reviews Best Nonfiction of 2011 title A bold, far-reaching look at how our actions will decide the planet's future for millennia to come. Imagine a planet where North American and Eurasian navies are

squaring off over shipping lanes through an acidified, ice-free Arctic. Centuries later, their northern descendants retreat southward as the recovering sea freezes over again. And later still, future nations plan how to avert an approaching Ice Age... by burning what remains of our fossil fuels. These are just a few of the events that are likely to befall Earth and human civilization in the next 100,000 years. And it will be the choices we make in this century that will affect that future more than those of any previous generation. We are living at the dawn of the Age of Humans; the only question is how long that age will last. Few of us have yet asked, What happens after global warming? Drawing upon the latest, groundbreaking works of a handful of climate visionaries, Curt Stager's *Deep Future* helps us look beyond 2100 a.d. to the next hundred millennia of life on Earth.

Creating Significant Learning Experiences L. Dee Fink, 2003-06-17 Dee Fink poses a fundamental question for all teachers: How can I create courses that will provide significant learning experiences for my students? In the process of addressing this question, he urges teachers to shift from a content-centered approach to a learning-centered approach that asks What kinds of learning will be significant for students, and how can I create a course that will result in that kind of learning? Fink provides several conceptual and procedural tools that will be invaluable for all teachers when designing instruction. He takes important existing ideas in the literature on college teaching (active learning, educative assessment), adds some new ideas (a taxonomy of significant learning, the concept of a teaching strategy), and shows how to systematically combine these in a way that results in powerful learning experiences for students. Acquiring a deeper understanding of the design process will empower teachers to creatively design courses for significant learning in a variety of situations.

The Soul's Logical Life Wolfgang Giegerich, 2020 C. G. Jung's psychology was based on an authentic notion of soul, but this notion was only intuitive, implicit, not conceptually worked out. His followers forfeit his heritage, often turning psychology either into pop psychology or into a scientific, clinical enterprise. It is the merit of James Hillman's archetypal psychology to have brought back the question of soul to psychology. But as imaginal psychology it cannot truly overcome psychology's positivistic, personalistic bias that it set out to overcome. Its «Gods» can be shown to be virtual-reality type gods because it avoids the question of Truth. Through what logically is the movement of an «absolute-negative interiorization», alchemically a «fermenting corruption», and mythologically a Dionysian dismemberment, one has to go beyond the imaginal to a notion of soul as logical life, logical movement. Only then can psychology be freed from its positivism and cease being a subdivision of anthropology, and can the notion of soul be logically released from its attachment to the notion of the human being.
