We Are Here Forever Michelle Gish, 2019-07-30 It's the most adorable apocalypse ever! Based on the popular webcomic, this all-new stand-alone comics collection artfully blends post-apocalyptic sci fi, dry humor, and utter adorability. The human race has vanished replaced by innocent, playful, creatures called the Puramus. In this hilarious and epic graphic novel, short interlocking stories follow the purple pals as they explore their new home, form a mini-monarchy, and develop a modern society on par with 21st-century humans. A final act pulls us across time and space in the search for clues to the origins of the Puramus. Along the way, humor and intrigue abound: Can King defend his village when nobody understands what war is? Will Jingle work up the nerve to read her poetry at open mic night? Will Puffpuff ever stop floating? Based on the webcomic, We Are Here Forever is for fans of post-apocalyptic sci fi blended with dry humor and undeniable adorableness. Colorful and cartoony art will have you rooting for these cute critters through their absurd adventures...but are they really as harmless as they seem?

Science and Technology of Fruit Wine Production Maria R. Kosseva, V.K. Joshi, P.S. Panesar, 2016-11-01 Science and Technology of Fruit Wine Production includes introductory chapters on the production of wine from fruits other than grapes, including their composition, chemistry, role, quality of raw material, medicinal values, quality factors, bioreactor technology, production, optimization, standardization, preservation, and evaluation of different wines, specialty wines, and brandies. Wine and its related products have been consumed since ancient times, not only for stimulatory and healthful properties, but also as an important adjunct to the human diet by increasing satisfaction and contributing to the relaxation necessary for proper digestion and absorption of food. Most wines are produced from grapes throughout the world, however, fruits other than grapes, including apple, plum, peach, pear, berries, cherries, currants, apricot, and many others can also be profitably utilized in the production of wines. The major problems in wine production, however, arise from the difficulty in extracting the sugar from the pulp of some of the fruits, or finding that the juices obtained lack in the requisite sugar contents, have higher acidity, more anthocyanins, or have poor fermentability. The book demonstrates that the application of enzymes in juice extraction, bioreactor technology, and biological de-acidification (MLF bacteria, or de-acidifying yeast like *Schizosaccharomyces pombe*, and others) in wine production from non-grape fruits needs serious consideration. Focuses on producing non-grape wines, highlighting their flavor, taste, and other quality attributes, including their antioxidant

properties Provides a single-volume resource that consolidates the research findings and developed technology employed to make wines from non-grape fruits Explores options for reducing post-harvest losses, which are especially high in developing countries Stimulates research and development efforts in non-grape wines

Luke is one of the shadow children, a third child forbidden by the Population Police. He's lived his entire life in hiding, and now, with a new housing development replacing the woods next to his family's farm, he is no longer even allowed to go outside. Skeleton Man Joseph Bruchac, 2009-04-21 A chilling middle grade novel featuring a brave young girl, missing parents, and a terrifying stranger, based on a Native American legend. R.L. Stine, New York Times bestselling author of the Goosebumps series, raved, "This book gave ME nightmares!" Molly's father, who grew up on the Mohawk Reserve of Akwesasne, always had the best scary stories. One of her favorites was the legend of Skeleton Man, a gruesome tale about a man with such insatiable hunger he ate his own flesh before devouring those around him. But ever since her parents mysteriously vanished, those spooky tales have started to feel all too real. Don't miss *The Legend of Skeleton Man*: a spine-

tingling collection of Skeleton Man and its sequel, The Return of Skeleton Man!

Castaways of the Flying Dutchman Brian Jacques,2003-03-31 Fans of the New York Times bestselling Redwall series will be delighted with Brian Jacques' latest. The legend of the Flying Dutchman, the ghost-ship doomed to sail the seas forever, has been passed down throughout the centuries. But what of the boy, Neb, and his dog, Den, who were trapped aboard that ship? What was to become of them? Sent off on an eternal journey of their own, the boy and his dog roam the earth throughout the centuries in search of those in need. Braving wind and waves and countless perils, they stumble across a 19th-century village whose very existence is at stake. Saving it will take the will and wile of all the people--and a very special boy and dog. The swashbuckling language brims with color and melodrama; the villains are dastardly and stupid; and buried treasure, mysterious clues, and luscious culinary descriptions (generally involving sweets) keep the pages turning. Cork Dork Bianca Bosker,2017-03-28 INSTANT NEW YORK TIMES BESTSELLER AND A NEW YORK TIMES CRITICS' PICK "Thrilling . . . [told] with gonzo élan . . . When the sommelier and blogger Madeline Puckette writes that this book is the Kitchen Confidential of the wine world, she's not wrong, though Bill Buford's Heat is probably a shade closer." —Jennifer Senior, The New York Times Professional journalist and amateur drinker Bianca Bosker didn't know much about wine—until she discovered an alternate universe where taste reigns supreme, a world of elite sommeliers who dedicate their lives to the pursuit of flavor. Astounded by their fervor and seemingly superhuman sensory powers, she set out to uncover what drove their obsession, and whether she, too, could become a "cork dork." With boundless curiosity, humor, and a healthy dose of skepticism, Bosker takes the reader inside underground tasting groups, exclusive New York City restaurants, California mass-market wine factories, and even a neuroscientist's fMRI machine as she attempts to answer the most nagging question of all: what's the big deal about wine? What she learns will change the way you drink wine—and, perhaps, the way you live—forever. "Think: Eat, Pray, Love meets Somm." —theSkimm "As informative as it is, well, intoxicating." —Fortune

Hades, Argentina Daniel Loedel, 2022-01-11 VCU CABELL FIRST NOVELIST AWARD FINALIST CENTER FOR FICTION FIRST NOVEL PRIZE LONGLIST “A debut novel as impressive as they come. Tough, wily, dreamlike.” —Seattle Times A decade after fleeing for his life, a man is pulled back to Argentina by an undying love. In 1976, Tomás Orilla is a medical student in Buenos Aires, where he has moved in hopes of reuniting with Isabel, a childhood crush. But the reckless passion that has long drawn him is leading Isabel ever deeper into the ranks of the insurgency fighting an increasingly oppressive regime. Tomás has always been willing to follow her anywhere, to do anything to prove himself. Yet what exactly is he proving, and at what cost to them both? It will be years before a summons back arrives for Tomás, now living as Thomas Shore in New York. It isn’t a homecoming that awaits him, however, so much as an odyssey into the past, an encounter with the ghosts that lurk there, and a reckoning with the fatal gap between who he has become and who he once aspired to be. Raising profound questions about the sometimes impossible choices we make in the name of love, *Hades, Argentina* is a gripping, ingeniously narrated literary debut.

Country Music Broke My Brain Gerry House, 2024-01-09 Nashville is filled with stars and lovers and writers and dreamers. Nashville is also teeming with lunatics and grifters and dip wads and moochers. Gerry House fits easily into at least half of those categories. Someone would probably have to be brain-damaged or really damn talented to try to entertain professional entertainers over a decades-long radio show in Music City, USA. Fortunately, House is little of both. Host of the nationally syndicated, top-rated morning show, “Gerry House & The Foundation for more than 25 years, he has won virtually every broadcasting award there is including a place in the National Association of Broadcasters Hall of Fame. Gerry also spent that time deep inside the songwriting and recording world in Nashville. In *Country Music Broke My Brain*, Gerry tells

his stories from the other side of the microphone. He reveals never-aired, never-before published conversations with country music's biggest names—Johnny Cash, Brad Paisley, and Reba McEntire to name a few—and leaves you with his own crazy antics that will either have you laughing or shaking your head in disbelief. With exclusive celebrity stories, humorous trivia and anecdotes, and broadcasting wisdom, this book is a treat for country music fans or for anyone who wants a good laugh.

Nutritional Composition of Fruit Cultivars Monique Simmonds, Victor R. Preedy, 2015-10-16 Nutritional Composition of Fruit Cultivars provides readers with the latest information on the health related properties of foods, making the documentation of the nutritive value of historical cultivars especially urgent, especially before they are lost and can't be effectively compared to modern cultivars. Because there is considerable diversity and a substantial body of the compositional studies directed towards commercial varieties, this information is useful for identifying traits and features that may be transposed from one variety to another. In addition, compositional and sensory features may also be used for commercialization and to characterize adulteration. Detailed characterization of cultivars can be used to identify super-foods. Alternatively, unmasked historical cultivars may be the focus of reinvigorated commercial practices. Each chapter in this book has sections on the botanical aspects, the composition of traditional or ancient cultivars, the composition of modern cultivars, a focus on areas of research, the specialty of the communicating author of each chapter, and summary points. Presents the botanical aspects and composition of both traditional and modern plants, including in-depth insight into current research, and overall summary points for each fruit for consistent comparison and ease of reference Provides important information in the consideration of preservation, transference, or re-introduction of historical/traditional cultivars into current crop science Provides details on compositional and sensory parameters, from aroma and taste to micro- and macronutrients Includes data on nutraceuticals and novel components that have proven to impact on, or be important in, food quality, storage, processing, storage, and marketing

Lost Crops of Africa National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, 2008-01-25 This book is the third in a series evaluating underexploited African plant resources that could help broaden and secure Africa's food supply. The volume describes 24 little-known indigenous African cultivated and wild fruits that have potential as food- and cash-crops but are typically overlooked by scientists, policymakers, and the world at large. The book assesses the potential of each fruit to help overcome malnutrition, boost food security, foster rural development, and create sustainable landcare in Africa. Each fruit is also described in a separate chapter, based on information provided and assessed by experts throughout the world. Volume I describes African grains and Volume II African vegetables.
