Choose FI Chris Mamula,Brad Barrett,Jonathan Mendonsa,2019-10 Now available for Pre-Order! A common resolution set at the beginning of a new year is to get my financial house in order. But how can you build a house, let alone pour any kind of foundation, without a blueprint? There are dozens of books and gurus trying to push their advice and tell you how to spend and invest your money. And then, there are three suburban dads just trying to make the world a little bit better. Meet Brad Barrett and Jonathan Mendonsa of the award-winning ChooseFI podcast and Chris Mamula of the popular blog Can I Retire Yet?. They have walked the talk and now want to share their knowledge with you. Together, these three regular guys will show you how they did something extraordinary. They are all financially independent and doing meaningful work that fulfills them. All three left their corporate 9 to 5 jobs and are reaping the benefits of extra time with their families. Mirroring the format of the popular ChooseFI podcast, this book pulls from the collective knowledge of those who have decided to build a lifestyle around their passions instead of allowing their finances to dictate their future. These stories demonstrate universal principles, giving you the opportunity to pick the elements that are the most applicable to your financial situation and choose your own adventure. The book covers a wide range of topics that will help you build a strong financial foundation: Developing a growth mindset Defining your values and aligning them with your spending Cutting years from your estimated retirement date Questioning the status quo on required expenses Cutting travel expenses and putting family vacations within your reach Learning how to earn more and live with abundance Updating the commonly accepted wisdom on college education and the debt associated with it Cutting through the noise on investing to discover strategies that work Showing how to implement investment strategies that enable the lifestyle you desire while controlling downside risk FI or Financial Independence is the new debt-free and getting back to 0 is just the beginning of a wonderful journey. Whether you have mountains of debt now or are recently debt free and wondering what to do next, Choose FI: Your Blueprint to Financial Independence will give you the information to guide your next move.

Totality Mark Littmann,Fred Espenak,Ken Willcox,2008-07-17 A total eclipse of the Sun is the most awesome sight in the heavens. Totality: Eclipses of the Sun takes you to eclipses of the past, present, and future, and lets you see - and feel - why people travel to the ends of the Earth to observe them. Totality: Eclipses of the Sun is the best guide and reference book on solar eclipses ever written. It explains: how to observe them; how to photograph and videotape them; why they occur; their

history and mythology; and future eclipses - when and where to see them Totality also tells the remarkable story of how eclipses shocked scientists, revealed the workings of the Sun, and made Einstein famous. And the book shares the experiences and advice of many veteran eclipse observers. Totality: Eclipses of the Sun is profusely illustrated with stunning photographs (many in color) and more than a hundred maps and diagrams. It can be read by lay people and astronomers with ease and enjoyment.

Nicaragua International Monetary Fund,2004-03-18 The government has fully complied with all the elements of the fourth floating completion point condition, which calls for the implementation of reforms to develop human capital and social protection. Investment in human capital development represents the second pillar of Nicaragua's Poverty Reduction Strategy Paper (PRSP). The policy and reform conditions for reaching the completion point were met by end-2003, except for one condition pertaining to the divestiture of the generating units of the power utility, for which a waiver is recommended.

End-Of-life Management International Renewable Energy Agency,2016-06 Solar photovoltaic (PV) deployment has grown at unprecedented rates since the early 2000s. As the global PV market increases, so will the volume of decommissioned PV panels, and large amounts of annual waste are anticipated by the early 2030s. Growing PV panel waste presents a new environmental challenge, but also unprecedented opportunities to create value and pursue new economic avenues. This report, prepared jointly by the International Renewable Energy Agency (IRENA) and the International Energy Agency Photovoltaic Power Systems Programme (IEA-PVPS), is the first-ever projection of PV panel waste volumes to 2050. It highlights that recycling or repurposing solar PV panels at the end of their roughly 30-year lifetime can unlock an estimated stock of 78 million tonnes of raw materials and other valuable components globally by 2050. If fully injected back into the economy, the value of the recovered material could exceed USD 15 billion by 2050.

Chris Ofili Minna A. Moore Ede,Chris Ofili,Gabriele Finaldi,2017-05 Two and a half years in the making, 'The Caged Bird's Song' is a monumental tapestry by the celebrated British artist, Chris Ofili. Accompanying 'Chris Ofili: Weaving Magic', the artist's ambitious presentation of the tapestry within a specially conceived environment in the Sunley Room at the National Gallery, this publication tells the story of the work's evolution and documents the close collaboration between Ofili and master weavers who have interpreted his designs with astonishing nuance. A suite of previously unseen preparatory watercolours and works on paper and a revealing essay by the exhibition's curator, Minna Moore Ede, further illuminate this extraordinary project by one of the most acclaimed artists working today.

Solar Panels and Photovoltaic Materials Beddiaf Zaidi,2018-07-11 Despite their wide availability and relatively low prices, the conventional energy sources have harmful consequences on the environment and are exhaustible. In order to

circumvent these negative effects, the renewable energies in general and the photovoltaic energy in particular are becoming more and more attractive. Solar cell is an electrical device that converts light into electricity at the atomic level. These devices use inorganic or organic semiconductor materials that absorb photons with energy greater than their bandgap to promote energy carriers into their conduction band. They do not pollute the atmosphere by releasing harmful gases, do not require any fuel to produce electricity, and do not move parts so they are rugged. Solar panels have a very long life and do not need much maintenance.

The Social Justice Torah Commentary Rabbi Barry Block, 2021-12-01 What does the Torah have to say about social justice? As the contributors to *The Social Justice Torah Commentary* demonstrate, a great deal. A diverse array of authors delve deeply into each week's parashah, drawing lessons to inspire tikkun olam. Chapters address key contemporary issues such as racism, climate change, mass incarceration, immigration, disability, women's rights, voting rights, and many more. The result is an indispensable resource for weekly Torah study and for anyone committed to repairing the world. Published by CCAR Press, a division of the Central Conference of American Rabbis

American Prospects (2023) Joel Sternfeld, 2023-10-10 The definitive edition of Joel Sternfeld's seminal *American Prospects*, featuring new photographs, and a revised format and cover First published in 1987 to critical acclaim, the seminal *American Prospects* has been likened to Walker Evans' *American Photographs* and Robert Frank's *The Americans* in both its ability to visually summarize the zeitgeist of a decade and to influence the course of photography following its publication. This definitive edition of *American Prospects* contains 12 new pictures, most of which have neither been published nor exhibited. Freed from the size constraints of previous editions, Sternfeld includes portraits and portraits in the landscape that elucidate the human condition in America. The result is a more complex and rounded view of American society that strongly anticipates Sternfeld's *Stranger Passing* series (1985-2000) and links the two bodies of work. A major figure in the photography world, Joel Sternfeld was born in New York City in 1944. He has received numerous awards, including two Guggenheim fellowships, a Prix de Rome and the Citibank Photography Award. Sternfeld's books published by Steidl include *American Prospects* (2003), *Sweet Earth* (2006), *Oxbow Archive* (2008), *First Pictures* (2012) and *Landscape as Longing* (2016) with Frank Gohlke.

Under a Mushroom Cloud Emanuele Ottolenghi, 2009 Since Iran's illicit nuclear programme was exposed to a stunned world in 2002, Tehran has defied the international community and continued to pursue its nuclear goals. What drives this seemingly apocalyptic quest? Are Iran's aims rational or not? *Under a Mushroom Cloud* analyses this catastrophic and murky situation, and examines Iran's dual-track approach of accelerating its nuclear activities while weaving itself ever more tightly into the fabric of the European economy. Thriving trade between Europe and Iran, and heavy European involvement in Iran's energy industry, have weakened Europe's will to impose robust sanctions - but imposing them is the only practical way of

protecting Europe's strategic interests and ensuring the stability of the region. Under a Mushroom Cloud offers a clear and compelling answer to this dilemma. Drawing on extensive research, including interviews with senior officials and security and intelligence personnel from many countries involved in the effort to stop Iran developing a nuclear bomb, it provides a comprehensive account of a serious strategic threat to Europe, and offers an original list of practical recommendations for European policymakers who must confront it. Total Solar Eclipses and How to Observe Them Martin Mobberley, 2007-08-03 This is the ultimate, easy-to-read guide for eclipse-chasers which includes everything an eclipse chaser needs. There are some important eclipses coming up in the years ahead and the technology available to amateur astronomers is improving fast. The book provides eclipse virgins with a good feeling for what a trip abroad to an eclipse is like – including a humorous look at all the things that can and have gone wrong. Travel details are included, essential in these days of high-security. And of course the first part of the book contains a wealth of information about solar eclipses and what can be observed only during a total eclipse.

Edge of Dark Water Joe R. Lansdale, 2012-03-27 An Edgar Award winner blends Mark Twain's humor and Stephen King's suspense in this darkly compelling novel of three friends determined to take their friend's ashes to Hollywood. May Lynn was once a pretty girl who dreamed of becoming a Hollywood star. Now she's dead, her body dredged up from the Sabine River. Sue Ellen, May Lynn's strong-willed teenage friend, sets out to dig up May Lynn's body, burn it to ash, and take those ashes to Hollywood to spread around. If May Lynn can't become a star, then at least her ashes will end up in the land of her dreams. Along with her friends Terry and Jinx and her alcoholic mother, Sue Ellen steals a raft and heads downriver to carry May Lynn's remains to Hollywood. Only problem is, Sue Ellen has some stolen money that her enemies will do anything to get back. And what looks like a prime opportunity to escape from a worthless life will instead lead to disastrous consequences. In the end, Sue Ellen will learn a harsh lesson on just how hard growing up can really be.

Barragan - The Complete Works Luis Barragán, 2003-10 Mexican architect Luis Barragán (1902-88) was one of the twentieth century's most creative designers and one of its best-known architects. Self-taught, he achieved international renown for his remarkable personal artistic vision. Using vegetation, water, primary geometric forms, and vivid colors, Barragán created a poetic and painterly yet elegantly simple architectural style that transformed the Mexican building tradition into an abstract architectural language. This revised edition of our best-selling monograph the first comprehensive compilation of Barragán's work (102 buildings and 12 additional projects) contains new photographs and an updated bibliography. Its intelligent analyses and superb illustrations demonstrate the complexity and scope of this genius, as both an architect and a landscape designer. Barragán The Complete Works collects over 300 illustrations including Barragán's drawings; photographs of his work; re-drawn plans, elevations, and scale models of important projects; texts by Alvaro Siza, Antonio Toca, and J. M. Buendía, as well as an essay by Barragán himself; and an unabridged transcription of his Pritzker

Prize acceptance speech. this book is the essential compendium on the work of this great master architect.

Five Millennium Catalog of Solar Eclipses: -1999 to +3000 Fred Espenak, Jean Meeus, 2021-07-30 During the 5,000-year period from -1999 to +3000 (2000 BCE to 3000 CE), Earth will experience 11,898 eclipses of the Sun. The eclipses are distributed as follows: 4200 partial eclipses, 3956 annular eclipses, 3173 total eclipses, and 569 hybrid eclipses. The Five Millennium Catalog of Solar Eclipses: -1999 to +3000 contains a catalog listing the date, eclipse type, and principal characteristics of every eclipse during this period. Tabulated data for each eclipse includes the catalog number, canon plate number, calendar date, Terrestrial Dynamical Time of greatest eclipse, T , lunation number, Saros number, eclipse type, Quincena Lunar Eclipse parameter, gamma, eclipse magnitude, geographic coordinates of greatest eclipse (latitude and longitude), and the circumstances at greatest eclipse (i.e., Sun altitude and azimuth, path width, and central line duration). The statistics of the solar eclipse distribution over 5,000 years are investigated in detail. This includes eclipse types by month and by century, eclipse frequency in the calendar year, extremes in eclipse magnitude for all eclipse types, maximum durations of total, annular, and hybrid eclipses, and eclipse duos (two eclipses within 30 days of each other). A discussion of the major cycles in the Moon's orbit and their role in the occurrence of solar eclipses is presented. These include the synodic, the anomalistic, and the draconic months. Finally, the periodicity of solar eclipses is investigated with particular attention to the Saros cycle. Tables list the start and end dates, number, and type of eclipses of every Saros series in progress during the 5,000-year period covered by the Five Millennium Canon. The Catalog serves as a supplement to the Five Millennium Canon of Solar Eclipses which contains a map of every eclipse. The Canon and the Catalog both use the same solar and lunar ephemerides as well as the same value of T . This 1-to-1 correspondence between them enhances the value of each. The researcher may now search, evaluate, and compare eclipses graphically (Canon) or textually (Catalog).

Historical Eclipses and Earth's Rotation F. Richard Stephenson, 2008-03-24 The culmination of many years of research, this book discusses ancient and medieval eclipse observations and their importance in studying Earth's past rotation. This is the first major book on this subject in twenty years. The author has specialized for many years in the interpretation of early astronomical records and their application to problems in modern astronomy. The book contains an in-depth discussion of numerous eclipse records from Babylon, China, Europe and the Arab lands. The author provides translations of almost every record studied. He shows that although tides play a dominant long-term role in producing variations in Earth's rate of rotation--causing a gradual increase in the length of the day--there are significant and variable nontidal changes in opposition to the main trend. This book is intended for geophysicists, astronomers (especially those with an interest in history), historians and orientalists.

To be a Holy People Eugene Korn, 2021 Can Jewish tradition face our modern understanding of justice, equality, and human progress? The author addresses ancient and modern moral questions. Building on biblical and rabbinic traditions, he analyzes how Jewish ethics relates to Jewish law, fairness, equality, and compassion, as well as the challenge of religious violence. This provides food for thought on subjects ranging from gender, freedom, and military ethics to Jewish particularism and contemporary universalism--

Red Hat Fedora Core 6 Unleashed Andrew Hudson, Paul Hudson, 2007 Continuing with the tradition of offering the most comprehensive coverage of Red Hat Linux on the market, Fedora Core 6 Unleashed includes new and additional material based on the latest release of Red Hat's Fedora Core Linux distribution.
