Dance Across the USA Jonathan Givens, 2017-12-09 Dance Across the USA is a collection of dancers from all over America, helping to showcase what is beautiful and inspiring in this country. Covering 22,264 miles, 163 Dancers, 90 consecutive days, 56 locations, & 50 states, Master Photographer Jonathan Givens created this project to show what really makes up America. Diversity that exists both in the physical landscape, and in the dancers who make America their home. The photographs in this book are real. The dancers actually did what you see, in the places shown. The skies are real, the landscape is real, even the dirty feet, are real. There is no digital compositing here, nor are there any trampolines or wires. Using only Canon cameras and flashes, Jonathan quite literally went to the ends of the nation, to work with dancers ranging from 5 to 61. Professionals and amateurs, students and teachers, boys and girls, cat lovers and dog lovers, everyone and anyone was welcome. Over 3000 dancers applied to be a part of the project, and those selected for the book reflect not only the range of what makes up dance in America, but they also showed a love for this country and its wonders. Dance Across the USA is a fun, beautiful, and inspirational look at America & both its places and its people. It is our differences and our diversity that combine to make us all Americans. From the sandy Florida beaches to the rugged Washington coast, the glaciers of Alaska to Death Valley in California, diversity is the hallmark of what literally makes up America. That diversity is reflected in our citizens, and our dancers. Join Jonathan and the Mighty Buford, as they make this historic journey, that no one has ever been crazy enough to try before.

The Future of Seduction Mia Levitin, 2020-11-12 Where and who do we want to be? How might we get there? What might happen if we stay on our current course? In *The Future of Seduction*, cultural and literary critic Mia Levitin explores the future of sex, asking powerful and necessary questions about the relationships of tomorrow. This brief but mighty book is one of five that comprise the first set of FUTURES essays. Each standalone book presents the author's original vision of a singular aspect of the future which inspires in them hope or reticence, optimism or fear. Read individually, these essays will inform, entertain and challenge. Together, they form a picture of what might lie ahead, and ask the reader to imagine how we might make the transition from here to there, from now to then.

Pierre Bourdieu Richard Jenkins, 2014-05-12 This short critical introduction to Pierre Bourdieu's thought is a model of clarity and insight. Where Bourdieu's own writings are often complex, even ambiguous, Richard Jenkins is direct, concise and to the point. He emphasizes Bourdieu's contributions to theory and methodology while also dealing in detail with his substantive studies of education, social stratification and culture. His book provides the best short English-language introduction to Bourdieu's work. 'As Jenkins points out in the final pages of his book, criticism can be the sincerest form of flattery. I particularly relished his critical approach to the work of Bourdieu and believe that he has written a timely introduction which both undergraduates and experienced teachers will find stimulating and enjoyable.' - Mike Hepworth, University of Aberdeen

Chinese History in Geographical Perspective Yongtao Du, Jeff Kyong-McClain, 2013-01-30 The authors in this volume believe that long-term, profound, and sometimes tumultuous changes in the last five hundred years of the history of China have been no less geographical than social, political, or economic. From the dialectics of local-empire relations to the imperial state's persistent array of projects for absorbing and transforming ethnic regions on the margins of empire; from the tripling of imperial territories in the Qing to the disputes over the identity of the former "outer zones" in the early Republican era; and from the universalistic imagination of "all-under-heaven" to the fraught processes of re-drawing a new set of nation-state boundaries in the twentieth century, the study of the dynamics of geography, broadly conceived, promises to provide insight into the contested development of the geographical entity which we, today, call 'China.'

The Wounded Healer Henri J. M. Nouwen, 2013-11-20 A radically fresh interpretation of how we can best serve others from the bestselling author of *The Return of the Prodigal Son*, hailed as "one of the world's greatest spiritual writers" by Christianity Today "In our own woundedness, we can become a source of life for others." In this hope-filled and profoundly simple book, Henri Nouwen inspires devoted men and women who want to be of service in their church or community but who have found traditional outreach alienating and ineffective. Weaving keen cultural analysis with his psychological and religious insights, Nouwen presents a balanced and creative theology of service that begins with the realization of fundamental woundedness in human nature. According to Nouwen, ministers are called to identify the suffering in their own hearts and make that recognition the starting point of their service. Ministers must be willing to go beyond their professional,

somewhat aloof roles and leave themselves open as fellow human beings with the same wounds and suffering as those they serve. In other words, we heal from our wounds. The Wounded Healer is a thoughtful and insightful guide that will be welcomed by anyone engaged in the service of others.

Design Futures Bradley Quinn, 2011 Until recently, analysis of the future was left to forecasters and trend experts. Today, however, designers and architects are playing an increasingly important role, creating products and environments that will change the way we live. Design Futures is a thought-provoking exploration of the radical directions that the creative industries are taking. Design expert Bradley Quinn reveals how a new generation of products, materials and surfaces will align design with such areas as artificial intelligence, genetic engineering and nanotechnology, reinventing the spaces in which we live and work, and how we experience the human body. Featuring interviews with renowned designers, architects and trend forecasters - among them Karim Rashid, Toyo Ito and Li Edelkoort - and over 250 illustrations of futuristic products and concepts, this is a unique guide to some of the twenty-first century's most compelling ideas.
