The Little Farmhouse in West Virginia Ginny Yurich, 2019-05-12 There are so many things to do on a farm. You could head to the barn to play with the kittens or go fishing in the small pond. You could grab a jar to catch fireflies in or swing high on the porch swing. Childhood outdoor adventures are fun to experience and they are fun to read about. Come along on this childhood adventure and imagine spending a summer with your family at a little farmhouse in West Virginia.

Bretherick's Handbook of Reactive Chemical Hazards L. Bretherick, 2016-10-27 Bretherick's Handbook of Reactive Chemical Hazards, Fourth Edition, has been prepared and revised to give access to a wide and up-to-date selection of documented information to research students, practicing chemists, safety officers, and others concerned with the safe handling and use of reactive chemicals. This will allow ready assessment of the likely potential for reaction hazards which may be associated with an existing or proposed chemical compound or reaction system. A secondary, longer-term purpose is to present the information in a way which will, as far as possible, bring out the causes of, and interrelationships between, apparently disconnected facts and incidents. This handbook includes all information which had become available to the author by April 1989 on the reactivity hazards of individual elements or compounds, either alone or in combination. It begins with an introductory chapter that provides an overview of the complex subject of reactive chemical hazards, drawing attention to the underlying principles and to some practical aspects of minimizing such hazards. This is followed by two sections: Section 1 provides detailed information on the hazardous properties of individual chemicals, either alone or in combination with other compounds; the entries in Section 2 are of two distinct types. The first type of entry gives general information on the hazardous behavior of some recognizably discrete classes or groups of the 4,600 or so individual compounds for which details are given in Section 1. The second type of entry concerns reactive hazard topics, techniques, or incidents which have a common theme or pattern of behavior involving compounds of several different groups, so that no common structural feature exists for the compounds involved.

How to Play Baseball Chuck Schumacher, 2014-07-13 How to Play Baseball: The Parent's Role in Their Child's Journey is like a toolbox full of valuable information for parents, coaches or anyone who is in a position of responsibility for young athletes. The lessons, anecdotes and techniques that are a part of every chapter are drawn from the extensive experience of the author, Chuck Schumacher. It is a balanced mixture of martial arts philosophy and the heart and soul of our national pastime. Baseball is something all Americans have grown up with but few understand the intricacies that go with playing the game, especially at a high level. This book points out the need for parents and coaches to play their role in a responsible way, respecting the difficulty of the game and the truth of proper training: that developing skill takes time, especially for young, inexperienced players. Practical advice and techniques are offered throughout the book and the reader can go to the chapter that may address a particular need; chapters such as Effort, Staying positive or Master the Basics before Attempting the

Advanced. In these chapters and others, they will garner a wealth of useful and practical information that will help them play their role in a way that is helpful to kids. Examples of incorrect behavior and thinking by adults that actually hinder a child's progress instead of helping, are presented throughout the book. Consequences to kids are discussed and solutions are offered. Examples of adults correctly playing their role and the rewards that come with this positive behavior are also pointed out. The life lessons that are available through baseball and other sports are relative to every chapter. In the chapter Attitude, adults are encouraged to be the ones who help kids understand how their actions, good, bad, or indifferent, will directly affect not only their playing time on the team, but eventually other areas of their life. In another chapter entitled Patience, we learn that patience is the ability to be at peace with a situation as it develops. Not living in the past, not living in the future, but living in the present moment. There is a separate chapter for volunteer coaches with advice on coaching kids, including wearing the right hat: the youth coaching hat, not the major league baseball hat.

Strategies and Tools for a Sustainable Rural Rio de Janeiro Udo Nehren, Sabine Schlüter, Claudia Raedig, Dietmar Sattler, Helga Hissa, 2018-08-16 This book is a compilation of recent developments in land, ecosystem, and water management in the Brazilian state of Rio de Janeiro. The state is located in the biodiversity hotspot of the Atlantic Forest (Mata Atlântica), a biome characterized by high biological diversity and endemism. At the same time the state of Rio de Janeiro emerged to one of the economic hubs in Latin America. This development process has been accompanied by population growth, industrialization, urbanization, as well as consumption and degradation of land and water resources. In the past years many efforts have been made to stop or at least slow down these degradation processes and restore degraded environments with the overall goal to bring together sustainable management of natural resources, nature conservation, and economic development. An overview is provided of the different strategies and tools that have been developed in the fields of agriculture, ecosystem management and biodiversity, integrated water management, land restoration, disaster risk reduction and climate change adaptation, as well as environmental governance and economic instruments. This book covers a wide spectrum from applied research to science-policy interfaces, planning concepts, and technical tools and has a model character for other rural areas in Latin America. Target groups are scientists, practitioners, policy makers and graduate students in the field of environmental management. The different chapters are written by researchers and practitioners of the German-Brazilian project INTECRAL (Integrated Eco Technologies and Services for a Sustainable Rural Rio de Janeiro), the rural development program Rio Rural under the state secretary for agriculture and animal husbandry, as well as invited scientists from Brazilian universities and research institutes. It bridges existing gaps between science, policies, and practice in rural development.
