No Green Berries Or Leaves Paul Stankard, 2007 No Green Berries or Leaves is a collection of autobiographical essays by Paul J. Stankard, recognized widely as one of the world's master glass artists. Stankard is particularly renowned and respected for his flameworked floral motifs expressed in crystal paperweights, rectangular columns, and orbs. Stankard was trained in scientific glassblowing and worked in industrial scientific glass during most of the 1960s. Challenged by an inner sense of creativity and the need to establish his creative independence, he started making paperweights in the early 1970s. Attracted to the emerging studio glass movement, recognized as a maker of fine paperweights, and driven by an intense and incessant pursuit of excellence, Stankard was -- by the 1980s -- recognized as a highly accomplished glass artist, a member of the pioneering generation of glass artists in America. As the emotional, intellectual, and spiritual dimensions of his art matured, and as he continued to develop new techniques for expressing his art, he also assumed more prominent influence in the development of educational programs and institutions that celebrated and expanded art in glass. Throughout his life, Stankard also wrestled with, and learned how to succeed in spite of, a learning disability -- dyslexia. No Green Berries or Leaves presents the author's record of his life as a struggling, then highly successful, artist; reveals insights into the challenges he faced as a dyslexic and how he came to understand, then circumvent, his disability; and records his perspectives on the history of the studio glass movement in America as he witnessed and experienced it during the past fifty years. This book will be of value to readers interested in the life of a major American artist and the history of the glass art movement in America, as well as to those looking for an inspirational story of how one man faced, addressed, and outwitted a learning disability and climbed the steep road to success to become a master artist in glass.

Venus Revealed David H. Grinspoon, 1997-01-05 Early robot probes sent by Russian and American scientists had given us some tantalizing but fragmentary glimpses of the surface and atmosphere, hinting at some of the most exotic conditions seen

in the solar system. Magellan showed a planet full of beautiful landscapes, some eerily familiar and some completely unexpected - a world of active volcanoes, shining mountains, and even river valleys carved by torrents of flowing lava. Venus may once have had a wet, temperate, comfortable climate, much like Earth's. What happened to turn it into a hostile, burning, acid world? Our twin has important tales to tell us regarding several of Earth's most pressing environmental problems, including ozone destruction, global warming, and acid rain. In *Venus Revealed*, David Grinspoon makes a compelling case for comparative planetology as an important tool for gaining knowledge that is vital for our long-term survival on our own planet. He re-examines the uniqueness of our own Earth in light of the recent Magellan findings, while also raising the provocative questions: Did a runaway greenhouse effect transform Venus into the burning oven she is today? By treating Venus as a controlled experiment, what can we learn from her that will help us survive on Earth? Grinspoon tackles these and other long-debated questions while explaining the incredible scientific advances made possible by the Magellan space probe.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Sara Cwynar: Glass Life , 2021-04-27 A feminist-inflected investigation of color and image-driven consumer culture, *Glass Life* brings together Sara Cwynar's multilayered portraits and stills from the films *Soft Film* (2016), *Rose Gold* (2017), and *Red Film* (2018). Cwynar's research-driven and visually complex images constitute the hallmarks of contemporary post-Pictures Generation work--in which photography is pursued in relation to film, sculpture, digital culture, and the cultural and technological history of image-making. Cwynar's work revolves around her interest in subjective notions of beauty through images; the fetishization of consumer objects and colors; and the exploration of the informal image archives that have

emerged around the industrialization and capitalization of these ideas. As part of her core practice, Cwynar collects, arranges, and archives her eBay purchases and creates studio studies of these consumer objects, exploring how images circulate online and how the lives and purposes of both physical objects and their likenesses change over time. Sara Cwynar: Glass Life is a must-have sourcebook for understanding the multilayered practice of this celebrated, multidisciplinary artist.
