The Jewel Garden Monty Don, Sarah Don, Monty Don & Sarah Don, 2012-03-01 'TRULY INSPIRING' Mail on Sunday Now familiar to millions of Gardeners' World fans as Longmeadow (the home of Nigel & Nellie), this is the story of Monty & Sarah Don's early days there. THE JEWEL GARDEN is the story of the garden that bloomed from the muddy fields around the Dons' Tudor farmhouse, a perfect metaphor for the Monty and Sarah's own rise from the ashes of a spectacular commercial failure in the late '80s. At the same time THE JEWEL GARDEN is the story of a creative partnership that has weathered the greatest storm, and a testament to the healing powers of the soil. Monty Don has always been candid about the garden's role in helping him to pull back from the abyss of depression; THE JEWEL GARDEN elaborates on this much further. Written in an optimistic, autobiographical vein, Monty and Sarah's story is truly an exploration of what it means to be a gardener.

Growing Perennial Foods Acadia Tucker, 2019 Acadia Tucker's long love affair with perennial foods has produced this easy-to-understand guide to growing and harvesting them. A regenerative farmer who is deeply concerned about global warming, Tucker believes there may be no better time to plant these hardy crops. Perennials can weather climate extremes, promote healthy soil, mitigate drought conditions, and thrive without chemical fertilizers and pesticides. Many can be harvested year round. They taste good, pack lots of nutrients, and require little tending. In short, the world is a better place with more perennials in it and this book intends to get us there. Tucker inspires action by first laying the groundwork for tending an organic, regenerative garden. She highlights the 10 steps she recommends gardeners take to help perennial foods thrive. But most of the book is dedicated to profiles of popular perennial herbs, fruit, and vegetables, with explicit instructions on how to plant, grow, and harvest them. Tucker also offers suggestions on how to store and preserve perennials. *Growing Perennial Foods* is illustrated with dozens of pen & ink drawings and ends with a short chapter on frequently asked questions. And since this is a field guide, each profile gives readers enough space to write in any additional notes. While designed for gardening novices, this book is also for experienced gardeners who want to grow more resilient crops, and could use a little guidance. *Growing Perennial Foods* is part of our Growing Food book series and a companion guide to *Growing Good Food: A Citizen's Guide to Backyard Carbon Farming*, which is also written by Acadia Tucker and set to publish in the summer of 2019.

Lawns into Meadows Owen Wormser, 2020-07-02 In *Lawns Into Meadows*, landscape designer Owen Wormser makes a case for the power and generosity of meadows. In a world where lawns have wreaked havoc on our natural ecosystems, meadows offer a compelling solution. They establish wildlife and pollinator habitats. They're low-maintenance and low-cost. They have a built-in resilience that helps them weather climate extremes, and they can draw down and store far more carbon dioxide than any manicured lawn. They're also beautiful, all year round. Owen describes how to plant an organic meadow that's right for your site, whether it's a yard, community garden, or tired city lot. He shares advice on preparing your plot, coming up with the right design, and planting—all without using synthetic chemicals. He passes along tips on building support in neighborhoods where a tidy lawn is the standard. Owen also profiles twenty-one starter grasses and flowers for beginning meadow-makers, and offers guidance on how to grow each one. To illuminate the many joys of meadow-building, Owen draws on his own stories, including how growing up off the grid in northern Maine, with no electricity or plumbing, prepared him for his work. The book, part how-to guide and part memoir, is for environmentalists and climate activists, gardeners and non-gardeners alike. *Lawns Into Meadows* is part of Stone Pier Press's Citizen Gardening series, which teaches readers how to grow food and garden in ways that are good for the planet.

Growing Good Food Acadia Tucker, 2019 A handbook for growing a victory garden when the enemy is global warming. Written by regenerative farmer Acadia Tucker, *Growing Good Food* calls on us to take up regenerative gardening, also known as carbon farming, for the good of the planet. By building carbon-rich soil, even in a backyard-sized patch, we can capture greenhouse gases and mitigate climate change, all while growing nutritious food. To help us get started, and quickly, Tucker drafts plans for gardeners who have no space, a little space, or a lot of space. She offers advice on how to prep soil, plant food, and raise the most popular fruits and vegetables using regenerative methods. She shares the gardening tools you need to get started, the top reasons gardens fail and how to fix them, and how to make carbon farming count when the only dirt you have is in pots. The book includes calls to action and insights from leaders in the regenerative movement, including David Montgomery, Gabe Brown, and Tim LaSalle. Aimed at beginners, the book is designed to inspire an uprising of citizen gardeners. *Growing Good Food* suggests what could happen if more of us saw gardening as a civic duty. By the end of it, you'll know how to grow some really good food and build a healthier world, too. *Growing Good Food: A citizen's guide to backyard carbon farming* is part of Stone Pier's *Growing Good Food* series. It joins *Growing Perennial Foods: A field guide to raising resilient herbs, fruits, and vegetables*, also written by Acadia Tucker.

The Wisdom of the Tree M. D. Sellers, 2016-04-18 This book is about those big green things outside. The things that have enabled the existence of mankind. The things that make our oxygen, provide our drinking water, and shade our car parks. Trees are certainly clever things, and they have influenced us in ways that are so profound that it is odd how we are often hardly aware of them. This book shows that the link between man and tree is certainly real. But just how close are we to the tree? What is our real relationship? *The Wisdom of the Tree* is made up of 365 eclectic passages inspired by trees. It includes astonishing natural facts, personal philosophies, trees mentioned in the Bible, and trees in folklore, culture, and the human psyche. *The Wisdom of the Tree* is an easy-to-read yet thought-provoking book designed to instill awe for the world in which we live and show that it is far richer than what we can even imagine.

Tiny Victory Gardens Acadia Tucker, Emily Castle, 2021 Climate activist and farmer Acadia Tucker fell in love with container gardening after glimpsing its potential to produce food-lots of food. By applying select growing practices, and managing for square inches rather than square feet, she has come up with instructions for growing a small-scale farm on your patio, your stoop, or in? your dining room. If what you want is a garden big enough to line a windowsill, she's got you covered there, too. *Tiny Victory Gardens* profiles 21 container-friendly crops, and includes recipes for cultivating bountiful gardens, with names like Tiny Herb Garden, Salsa Fresca, and Beans, Bees, and Butterflies. It outlines how to find the right containers (there are wrong ones), identify prime tiny real estate, make food gardens beautiful, and raise crops all year long. Tucker describes how to maximize the environmental impact of growing food in pots. She offers tips on attracting pollinators, shows how to build microbe-rich living soil, and explains ways to ditch harmful pesticides and fertilizers. Her goal is to make

it easier for anyone with access to a patch of sun to grow food, no backyard required. This is the third book Tucker has written for Stone Pier Press's citizen gardening series, which highlights how to garden in ways that are good for the planet. Book jacket.
