Small Green Roofs Nigel Dunnett, Dusty Gedge, John Little, Edmund C. Snodgrass, 2011-04-25 Until now, the green roof movement has been limited to large-scale, professional endeavors and public buildings. But homeowners everywhere are catching onto the benefits of a green roof—water conservation, energy savings, and storm water management. In *Small Green Roofs* authors Dunnett, Gedge, Little, and Snodgrass profile ordinary homeowners who scaled green roofs down to the domestic level. *Small Green Roofs* is the first book to focus on small-scale and domestic green roofs. More than forty profiles of small and domestic-scale projects of all shapes and sizes include green roofs on sheds, garden offices, studios, garages, houses, bicycle sheds, and other small structures, as well as several community projects. For each project, details are given for design, construction, and installation, as well as how-to tips on how the roof was planted and cared for. For readers

Harlem Grown Tony Hillery, 2020-08-18 "An inspiring picture book for youngsters with meaningful ties to the environment, sustainability, and community engagement." —Booklist "Hartland's gouache illustrations wobble endearingly, colorfully capturing the children's triumph, and the kinetic energy and colorful vibrancy of the city neighborhood."

—Publishers Weekly Discover the incredible true story of Harlem Grown, a lush garden in New York City that grew out of an abandoned lot and now feeds a neighborhood. Once In a big city called New York In a bustling neighborhood There was an empty lot. Nevaeh called it the haunted garden. Harlem Grown tells the inspiring true story of how one man made a big difference in a neighborhood. After seeing how restless they were and their lack of healthy food options, Tony Hillery invited students from an underfunded school to turn a vacant lot into a beautiful and functional farm. By getting their hands dirty, these kids turned an abandoned space into something beautiful and useful while learning about healthy, sustainable eating and collaboration. Five years later, the kids and their parents, with the support of the Harlem Grown staff, grow thousands of pounds of fruits and vegetables a year. All of it is given to the kids and their families. The incredible story is vividly brought to life with Jessie Hartland's "charmingly busy art" (Booklist) that readers will pore over in search of new details as they revisit this poignant and uplifting tale over and over again. Harlem Grown is an independent, not-for-profit organization. The author's share of the proceeds from the sale of this book go directly to Harlem Grown.

Ecoregional Green Roofs Bruce Dvorak, 2021-02-05 This book studies the application of green roofs in ecoregions of the western United States and Canada. While green roofs were intended to sustain local or regional vegetation, this volume describes how green roofs in their modern form are typically planted with a low-diversity mix of sedums from Europe or Asia. The authors demonstrate how in the western USA and Canada many green roofs have been designed with native plants and have been found to thrive. Part I of this book covers theory and an overview of ecoregions and their implications for green roofs. In Part II vegetation from prairies, deserts, montane meadows, coastal meadows, and scrub and sub-alpine habitats are explored on seventy-three ecoregional green roofs. Case studies explore design concepts, materials, watering and maintenance, wildlife, plant species, and lessons learned. Part III covers an overview of ecoregional green roofs and a future outlook. This book is aimed at professionals, designers, researchers, students and educators with an interest in green roofs and the preservation of biodiversity.
