Mystery at Kittiwake Bay Joyce A. Stengel, 2011-11-15 A new beginning. An old mystery. Cassie Hartt had never seen the ocean before and now it surrounds her. Her parents have split up, and she has moved with her mother and little brother to Kittiwake Bay, Maine. As Cassie struggles to adapt to life in the coastal town, she finds herself drawn to Waterview Manor, the mysterious mansion high up on a cliff. Though Waterview is now a retirement home, rumors of hidden treasure and passageways that were once part of the Underground Railroad swirl around the manor. Eager to learn more about the manor's history, Cassie becomes a volunteer. Before long, valuable objects are reported missing and everyone is a suspect. Cassie teams up with a new friend to search for clues, but as they dig deeper their investigation takes a dangerous turn. Can Cassie find the thief of Kittiwake Bay -- before the thief finds her?

Long-term Ecological Change in the Northern Gulf of Alaska R.B. Spies, 2006-12-12 This comprehensive text is a major synthesis on ecological change in the Gulf of Alaska. It encompasses the structural and annual changes, forces of change, long-ecological changes in the atmosphere and ocean, plankton, fish, birds and mammals, and the effects of the 1989 Exxon Valdez Oil Spill. With 5 major sections, Long-term Ecological Change in the Northern Gulf of Alaska first describes the physical features, the atmosphere and physical oceanography, the annual production cycle, the forage base for higher animals and trophic transfer, and the adaptations for survival in this changing environment for 9 portal species. Then, the major forces of change are introduced: climate, geophysics, fisheries and harvesting, species interactions, disease and contaminants. Next, the long-term records of change in physical factors and biological populations are presented, as well as the potential reasons for the biological changes. Following is the history of the Exxon Valdez oil spill and its long-term effects. And, finally, the emergent properties of the ecosystem are discussed and an attempt is made to weigh the importance of the major forcing factors in terms of their temporal and spatial scales of influence. * Examines important data on long-term

change in the ecosystem and the forcing factors that are responsible for it * Provides an account of the 1989 Exxon Valdez oil spill with emphasis on the long-term effects * Describes the effects of climate change, geophysical change, species interactions, harvesting, disease, the 1989 oil spill, and marine contaminants on key populations of marine organisms

Field Notes from an Unintentional Birder Julia Zarankin, 2020-09-12 When Julia Zarankin saw her first red-winged blackbird at the age of thirty-five, she didn't expect that it would change her life. Recently divorced and auditioning hobbies during a stressful career transition, she stumbled on birdwatching, initially out of curiosity for the strange breed of humans who wear multi-pocketed vests, carry spotting scopes and discuss the finer points of optics with disturbing fervour. What she never could have predicted was that she would become one of them. Not only would she come to identify proudly as a birder, but birding would ultimately lead her to find love, uncover a new language and lay down her roots. Field Notes from an Unintentional Birder tells the story of finding meaning in midlife through birds. The book follows the peregrinations of a narrator who learns more from birds than she ever anticipated, as she begins to realize that she herself is a migratory species: born in the former Soviet Union, growing up in Vancouver and Toronto, studying and working in the United States and living in Paris. Coming from a Russian immigrant family of concert pianists who believed that the outdoors were for "other people," Julia Zarankin recounts the challenges and joys of unexpectedly discovering one's wild side and finding one's tribe in the unlikeliest of places. Zarankin's thoughtful and witty anecdotes illuminate the joyful experience of a new discovery and the surprising pleasure to be found while standing still on the edge of a lake at six a.m. In addition to confirmed nature enthusiasts, this book will appeal to readers of literary memoir, offering keen insight on what it takes to find one's place in the world.

A Case for Climate Engineering David Keith,2013-09-20 A leading scientist argues that we must consider deploying climate engineering technology to slow the pace of global warming. Climate engineering—which could slow the pace of global warming by injecting reflective particles into the upper atmosphere—has emerged in recent years as an extremely controversial technology. And for good reason: it carries unknown risks and it may undermine commitments to conserving energy. Some critics also view it as an immoral human breach of the natural world. The latter objection, David Keith argues

in *A Scientist's Case for Climate Engineering*, is groundless; we have been using technology to alter our environment for years. But he agrees that there are large issues at stake. A leading scientist long concerned about climate change, Keith offers no naïve proposal for an easy fix to what is perhaps the most challenging question of our time; climate engineering is no silver bullet. But he argues that after decades during which very little progress has been made in reducing carbon emissions we must put this technology on the table and consider it responsibly. That doesn't mean we will deploy it, and it doesn't mean that we can abandon efforts to reduce greenhouse gas emissions. But we must understand fully what research needs to be done and how the technology might be designed and used. This book provides a clear and accessible overview of what the costs and risks might be, and how climate engineering might fit into a larger program for managing climate change.

Last Places Lawrence Millman, 2000 A classic of northern exploration and adventure, *LAST PLACES* is Lawrence Millman's marvelously told account of his journey along the ancient Viking sea routes that extend from Norway to Newfoundland. Traveling through landscapes of transcendent desolation, Millman wandered by way of the Shetland Islands, the Faeroes, Iceland, Greenland, and Labrador. His way was marked by surprising human encounters--with a convicted murderer in Reykjavik, an Inuit hermit in Greenland, an Icelandic guide who leads him to a place called Hell, and a Newfoundlander who warns him about the local variant of the Abominable Snowman. By turns earthy and lyrical, *LAST PLACES* is an ebullient celebration of the exotic North.

Dave Gorman's Googlewhack Adventure Dave Gorman, 2012-03-31 If someone called you a 'googlewhack' what would you do? Would you end up playing table tennis with a nine year-old boy in Boston? Would you find yourself in Los Angeles wrangling snakes, or would you go to China to be licked by a performance artist? If your name is Dave Gorman, then all of these things could be true. Fuelled by a lust for life and a desperate desire to do anything except what he's supposed to be doing (writing that novel and growing up), Dave falls under the spell of an obscure internet word game - Googlewhacking. Addicted to the game, and gripped by obsession, Dave travels three times round the world, visiting four continents and the

unlikeliest cast of real life eccentrics you'll ever meet in what becomes an epic challenge, a life-changing, globe-trotting Googlewhack adventure.

Sequence stratigraphy of the Jurassic-Lowermost Cretaceous (Hettangian-Berriasian) of the North Sea region

P. Copestake, M.A. Partington, 2023-07-26 Sequence stratigraphy has become a powerful tool in the basin analysis of the North Sea Basin, and will continue to play an important role in the maximization of the remaining hydrocarbon potential of the region, whilst also supporting the energy transition in carbon capture and storage projects with Jurassic storage units. This Memoir provides a long-awaited, comprehensive documentation of Jurassic to lowermost Cretaceous sequence stratigraphy of the region (UK, Norway, Denmark and adjacent areas). The volume is amply illustrated by numerous well log displays, core images, seismic lines, chronostratigraphic diagrams and outcrop photographs. Individual chapters discuss the historical usage of sequence stratigraphy in the North Sea Jurassic, sequence stratigraphic concepts and models, application in hydrocarbon field development, definition of stratigraphic traps, well sequence interpretation methodology and controls on sequence development. To complete the volume there are further chapters on North Sea Jurassic lithostratigraphy and its relation to sequence stratigraphy, and descriptions of the biozones used to characterize and correlate the sequences.
