William S. Rice Roberta Rice Treseder, William Seltzer Rice, 2009 William Seltzer Rice (American, 1873-1963) was a young artist of twenty-seven when he stepped off a train in Stockton, California, in 1900; he had left his home in Pennsylvania to take the job of assistant art supervisor for the Stockton public schools. California became not only his lifelong home but also his muse, inspiring a prolific career in art. Rice soon moved to the San Francisco Bay Area, where the region's Arts and Crafts movement was flowering. He was talented in several mediums, but block printing ultimately became his favorite, for it gave him the opportunity to combine draftsmanship, carving, and printing. California's flora, fauna, and landscapes—from the Sierra Nevada to the Pacific—were the subjects that fed his creativity. *William S. Rice: California Block Prints* is the first book published on the artist's work and presents more than sixty of his color block prints dating from 1910 to 1935. Among the prints featured are scenes from Yosemite, Mt. Shasta, Monterey, Carmel, the San Francisco Bay Area, Lake Tahoe, and other California landmarks. An essay by Roberta Rice Treseder, Rice's daughter, recounts his life and achievements, with special emphasis on his block printing methods and materials. William S. Rice's works are in many private and public collections, including the Smithsonian American Art Museum, the Oakland Museum of California, the Achenbach Foundation for Graphic Arts, the New York Public Library, and the Worcester Art Museum.

Cyanotype Christina Z Anderson, 2019-01-30 *Cyanotype: The Blueprint in Contemporary Practice* is a two part book on the much admired blue print process. Part One is a comprehensive how-to on the cyanotype process for both beginner and advanced practitioners, with lots of photographs and clear, step-by-step directions and formulas. Part Two highlights contemporary artists who are using cyanotype, making work that ranges from the photographic to the abstract, from the traditional to the conceptual, with tips on their personal cyanotype methods alongside their work. These artists illustrate cyanotype's widespread use in contemporary photography today, probably the most of any alternative process. Book features include: A brief discussion of the practice of the process with some key historical points How to set up the cyanotype room The most extensive discussion of suitable papers to date, with data from 100+ papers Step-by-step digital

negative methods for monochrome and duotone negatives Chapters on classic, new, and other cyanotype formulas Toning to create colors from yellow to brown to violet Printing cyanotype over palladium, for those who want to temper cyanotype's blue nature Printing cyanotype on alternate surfaces such as fabric, glass, and wood More creative practice ideas for cyanotype such as handcoloring and gold leafing Troubleshooting cyanotype, photographically illustrated Finishing, framing, and storing cyanotype Contemporary artists' advice, techniques, and works Cyanotype is backed with research from 120 books, journals, and magazine articles from 1843 to the present day. It is richly illustrated with 400 photographs from close to 80 artists from 14 countries. It is a guide for the practitioner, from novice to expert, providing inspiration and proof of cyanotype's original and increasing place in historical and contemporary photography.

Blueprint to cyanotypes - Exploring a historical alternative photographic process Malin Fabbri, Gary Fabbri, 2016-01-01 An excellent beginners' guide to cyanotypes - all you need to get started, and some goodies for more advanced cyanotypers too. About the book The cyanotype is often the first alternative process that people try. It is relatively easy and safe enough to nurture a child's interest in photography. It can also be seen as a gateway to further exploration of historic photographic methods. In addition, it gives experienced photographers and artists a great excuse to take their eyes off the computer screen and get their hands dirty. Blueprint to cyanotypes is all you will need to get started with cyanotypes. It offers the beginner a step-by-step guide, from choosing material to making the final print. It is full of information and tips. Even the experienced cyanotypist may learn a thing or two. Blueprint to cyanotypes is published by AlternativePhotography.com - a website and information center dedicated to alternative photographic processes. From Malin Fabbri, the author: Why a book on cyanotypes? Of all the alternative processes the cyanotype is the one closest to my heart. I made my first cyanotype in 1999. I was intrigued by the blue images and wanted to test the cyanotype process to see what it had to offer. I bought chemicals and spent an evening coating paper and cloth. The results of the next day's printing surprised me. Although the alchemy of the darkroom had always captivated me, developing a print in the sun was like a liberation. One of the things I found most refreshing about the process was the unpredictability of the results. Some of my best prints were the product of 'happy accidents'. The developing process is straightforward. The chemicals are cheap, and most of the other items used can be found around the house. Pre-coated paper is available, but one of the benefits of working with cyanotypes is the great flexibility of material and paper available to you. Cyanotypes print on anything made of natural fibre. Cotton, linen, silk,

handmade paper, watercolor paper and rags are just number of alternatives. Some artists even print on wood. So, if you want to explore a fun alternative photographic process or seriously want to experiment with producing unique fine art, make a cyanotype.

Reclamation San Francisco Public Library,2021-06-09 San Francisco Center for the Book and San Francisco Public Library host Reclamation: Artists' Books on the Environment, a juried exhibition of artists books exploring our relationship to the environment at this moment on the planet.Environmental concerns demand increasing attention, from rising temperatures and dangerous weather events, to crises in water quality, to multiplying fires...the list goes on, echoed around the globe. Book artists create works that involve, educate, and inspire action. Book art takes many forms. Reclamation:

Artists' Books on the Environment seeks to inspire and educate viewers to reflect on climate change and its impacts locally, nationally, and internationally. At the same time, the exhibition endeavors to avoid dualistic arguments common to today's divisive political scene. This exhibition takes place under the umbrella of The Codex Foundation's EXTRACTION: Art on the Edge of the Abyss call to action.

Signs of Change Dara Greenwald, Josh MacPhee, 2010 Drawn from an exhibition at Exit Art, a cultural center in New York City, Signs of change is a visual archive of more than 350 posters, prints, photographs, films, videos, music, and ephemera from more than twenty-five nations. Surveying the creative work of dozens of international movements, from the do-it-yourself graphics and media of the 1960s to today's instantaneous digital technologies, it investigates the themes and representations of global struggles for equality, democracy, freedom, and basic human rights. This groundbreaking work illustrates the extraordinary aesthetic range of radical movements during the past fifty years and explores the rise of powerful countercultures that evolve beyond traditional politics, creating distinct forms of art, lifestyles, and social organizations--Page 4 of cover.

Stitch Alchemy Kelli Perkins, 2013-04-01 Mixing the versatility of paper with the dimensional qualities of cloth, this inventive handbook to crafting with paper-cloth provides mixed-media artists with the knowledge to easily transform their works into collaged quilts using embellishment techniques, such as painting, stitching, needlefelting, and beading. Though the technique is inexpensive and requires less space, equipment, and skill than dyeing fabrics for quilt making, readers will learn step-by-step how the use of paper-cloth--from making the paper-cloth itself; adding color and interest to the foundation with inks, stains, paints, and glazes; texturizing; implementing printmaking techniques; and more--can allow layers of complexity and textural appeal. Common projects include art quilts, art dolls, jewelry, and artist books. Perfect for artists interested in altered art, found and recycled art, needle felting, and nontraditional elements, this original resource is the first to cross the paper and cloth mediums.

Objects: USA 2020 Glenn Adamson, 2020-10-27 Objects: USA 2020 hails a new generation of artist-craftspeople by revisiting a groundbreaking event that redefined American art. In 1969, an exhibition opened at the Smithsonian Institution that redefined American art. Objects: USA united a cohort of artists inventing new approaches to art-making by way of craft media. Subsequently touring to twenty-two museums across the country, where it was viewed by over half a million Americans, and then to eleven cities in Europe, the exhibition canonized such artists as Anni Albers, Sheila Hicks, Wharton Esherick, Wendell Castle, and George Nakashima, and introduced others who would go on to achieve widespread art-world

acclaim, including Dale Chihuly, Michele Oka Doner, J. B. Blunk, and Ron Nagle. *Objects: USA 2020* revisits this revolutionary exhibition and its accompanying catalog--which has become a bible of sorts to curators, gallerists, dealers, craftspeople, and artists--by pairing fifty participants from the original exhibition with fifty contemporary artists representing the next generation of practitioners to use--and upend--the traditional methods and materials of craft to create new forms of art. Published to coincide with an exhibition of the same title at the renowned gallery R & Company, and featuring essays by some of the foremost authorities on craft at the intersection of art, including Glenn Adamson, curator and former director of the Museum of Arts & Design; James Zemaitis, curator and former head of twentieth-century design at Sotheby's; and Lena Vigna, curator of exhibitions at the Racine Art Museum; an interview with Paul J. Smith, the cocurator of *Objects: USA*; archival photographs of the original exhibition and important historical works; and lush full-color images of contemporary works, *Objects: USA 2020* is an essential art historical reference that traces how craft was elevated to the status of museum-quality art, and sets its trajectory forward.

The Art of the Fold Hedi Kyle, Ulla Warchol, 2018-10-02 The influential artist Hedi Kyle and renowned architecture graduate Ulla Warchol shows you how to create their unique designs using folding techniques. From creating flag books and fishbones, to blizzards and nesting boxes, you'll gain an invaluable insight into the work of two skilled artists with this fun read! With the help of their thorough instructions and simple illustrations, you'll be on your way to becoming a pro paper crafter in no time at all – Sew magazine A wonderful insight into the work of a truly skilled artist – PaperCrafter The renowned and influential book artist Hedi Kyle shows you step-by-step how to create her unique designs using folding techniques in *The Art of the Fold*. Bookbinding and paper craft projects include flag books, blizzard books, the fishbone fold, and nesting boxes. Written by the doyenne of artists' books, Hedi Kyle, *The Art of the Fold* is a wonderful insight into the work of a truly skilled artist. Hedi will show you how to bind a book and fold paper to create over 35 of her cut-fold book designs. The book is beautifully illustrated with Hedi's finished works of art. An excerpt from the book: 'I can still remember the thrill I experienced when my first folded book structure emerged from my fingers – how eager I was to explore its possibilities and to share it with whoever was interested. The Flag Book, as I now call it, is a simple accordion and has interlocking pages oriented in opposite directions. Little did I know that this simple structure would have legs and be the catalyst for the next forty-plus years of thinking about and making books. The common perception of the book today is fairly straightforward: a series of pages organized around a spine and protected on either side by two covers. This format allows for easy access, storage and retrieval of information. Yet what happens when the book is stripped away of centuries of preconceptions and is allowed to reveal something else: playfulness, utility, invention? Expanding the notion of the book is what the structures in the following chapters of *The Art of the Fold* attempt to do. Exploring its tactile, sculptural form, primarily through folding methods, the book as a structural object is celebrated while content is considered in a new and

unconventional way. My range in this medium has always been broad. In part this is due to my introduction to the world of bookbinding and some chance encounters. In the 1970s in New York City, the art and craft of hand bookbinding and papermaking were experiencing an unprecedented revival. I was fortunate to arrive in the city at just this moment. With an art-school background and an impulse to make things, I was naturally drawn to pursue this new opportunity. The Center for Book Arts, the famous forerunner of so many centers yet to come, was located in a small storefront just down the street from where I lived on the Lower East Side of Manhattan. Under the direction of founder Richard Minsky, it had a radical mission: to push concept, materials, printing and making of artist books in a new direction. When Richard dared me to teach at the Center one evening a week, I was hooked. My career as a book conservator and a book artist has now spanned over 45 years. As head conservator at the American Philosophical Society in Philadelphia, I've had the opportunity to handle some of the rarest volumes and manuscripts in the world. I have also dealt with decrepit books, torn maps and countless curiosities discovered in stacks and archives. All were endless sources for ideas and provided a springboard for a departure from tradition. Leading book-arts workshops around the world and a 25 year tenure teaching in the graduate program for Book Arts and Printmaking at the University of the Arts in Philadelphia have shown me, in retrospect, that the more I taught, t

Marisol and Warhol Take New York, 2021-10-05 A tale of two Pop artists in 1960s New York This book charts the emergence of Marisol Escobar (1930-2016) and Andy Warhol (1928-87) in New York during the dawn of Pop art in the early 1960s. Through essays, interviews and prose, the book explores the artists' parallel rise to success, the formation of their artistic personas, their savvy navigation of gallery relationships and the blossoming of their early artistic practices from 1960 to 1968. The exhibition features key loans of Marisol's work from major global collections, along with iconic works and rarely seen films and archival materials from the Andy Warhol Museum's collection. By situating Marisol's work in dialogue with Warhol's, this new collection of writing seeks to reclaim the importance of her art; reframe the strength, originality and daring nature of her work; and reconsider her as one of the leading figures of the Pop era.
