GIMP Bettina K. Lechner, 2009 GIMP ist mittlerweile so leistungsfähig und dabei so benutzerfreundlich, dass es eine echte Alternative zu den kommerziellen Software-Produkten darstellt. Dieses Buch begleitet ambitionierte Digitalfotografen ab dem Zeitpunkt, wo das Bild aus der Kamera oder dem Scanner kommt, bis hin zu einer gelungenen Präsentation. Bettina Lechner erklärt Schritt für Schritt das Schärfen, die Farbkorrektur, wie man Rauschen reduziert oder extravagante Effekte einbringt. Sie zeigt aber auch alle gängigen Retusche- und Montagetechniken wie Freistellen, Porträtretusche oder außergewöhnliche Texteffekte. Die CD enthält eine Auswahl der im Buch verwendeten Bilder zum Ausprobieren und eine uneingeschränkt verwendbare Vollversion von GIMP.

Bretherick's Handbook of Reactive Chemical Hazards L. Bretherick, 2016-10-27 Bretherick's Handbook of Reactive Chemical Hazards, Fourth Edition, has been prepared and revised to give access to a wide and up-to-date selection of documented information to research students, practicing chemists, safety officers, and others concerned with the safe handling and use of reactive chemicals. This will allow ready assessment of the likely potential for reaction hazards which may be associated with an existing or proposed chemical compound or reaction system. A secondary, longer-term purpose is to present the information in a way which will, as far as possible, bring out the causes of, and interrelationships between, apparently disconnected facts and incidents. This handbook includes all information which had become available to the author by April 1989 on the reactivity hazards of individual elements or compounds, either alone or in combination. It begins with an introductory chapter that provides an overview of the complex subject of reactive chemical hazards, drawing attention to the underlying principles and to some practical aspects of minimizing such hazards. This is followed by two sections: Section 1 provides detailed information on the hazardous properties of individual chemicals, either alone or in combination with other compounds; the entries in Section 2 are of two distinct types. The first type of entry gives general information on the hazardous behavior of some recognizably discrete classes or groups of the 4,600 or so individual compounds for which details are given in Section 1. The second type of entry concerns reactive hazard topics, techniques, or incidents which have a common theme or pattern of behavior involving compounds of several different groups, so that no common structural feature exists for the compounds involved.

Uncredited Gemma Solana, Antonio Boneu, 2014-06-21 This publication examines how opening sequences in films, classic

and contemporary, act as hooks to draw the viewer into the film, showing frame by frame how graphics, type and animation are used to create atmosphere, set tone, and lend impact to movies. From Hitchcock and Godard to Tarantino, Luc Besson, and Tim Burton, this large format coffee table book finally illuminates this critical role designers play in filmmaking and gives credit to those that often go uncredited.

Secrets of Aboriginal Healing Gary Holz, 2013-09-02 A guide to the 60,000-year-old healing system of the Aborigines revealed through one man's journey to overcome multiple sclerosis • Written at the request of the Aboriginal people the author stayed with • Explores the use of dreamtime, spirit guides, and telepathy to discover and reprogram the subconscious motivations, thought patterns, and beliefs behind illness • Reveals how to tap in to healing support through the body/mind/spirit connection • Nautilus Silver Medal Winner and ForeWord Reviews Book of the Year Finalist In 1983 award-winning physicist Gary Holz was diagnosed with chronic progressive multiple sclerosis. By 1988 he was a quadriplegic. Then, in 1994, his doctors told him he had two years to live. Desperate and depressed, he followed a synchronistic suggestion and went to Australia to live with a remote Aboriginal tribe. Arriving in a wheelchair, alone, with almost no feeling left from the neck down, Holz embarked on a remarkable healing transformation of body, mind, and spirit and discovered his own gift for healing others. Written at the request of the Aboriginal healers Holz worked with, this book reveals the beliefs and principles of the 60,000-year-old healing system of the Aborigines of Australia, the world's oldest continuous culture. Chronicling the step-by-step process that led to his miraculous recovery, he explains the role played by thought in the creation of health or disease and details the five essential steps in the Aboriginal healing process. He explores the use of dreamtime, spirit guides, and telepathy to discover and reprogram the subconscious motivations behind illness--a process that enacts healing at the cellular and the soul level, where the root of physical illness is found. Supported by modern science, including quantum physics, Aboriginal medicine enables each of us to tap in to healing support through the power of the body/mind/spirit connection.

The Authenticity of the Early Buddhist Texts Bhikkhu Sujato, Bhikkhu Brahmalī, 2014-12-01 Are there any authentic Buddhist texts? If so, what are they? These are questions of tremendous spiritual and historical interest, about which there is a range of opinions that often appear to be irreconcilable. Traditionalists insist that the texts were "spoken by the Buddha" in the most literal of senses, while sceptics assert that we cannot know anything about the Buddha for certain, and further, that the notion of authenticity is irrelevant or pernicious. Most academic scholars of early Buddhism cautiously affirm that it is

possible that the early Buddhist texts as contained in the Sutta and Vinaya Pitaka contain some authentic sayings of the Buddha. A sympathetic assessment of relevant evidence by the authors of this book shows that this is a drastic understatement and that it is very likely that the bulk of the sayings in the texts that are attributed to the Buddha were actually spoken by him. Rarely has the question of authenticity of the Buddhist texts been systematically investigated. Seeing the lack of an easily accessible summary of the evidence, the authors assembled this survey.

Basics of Geomatics Mario A. Gomasasca, 2009-09-18 Geomatics is a neologism, the use of which is becoming increasingly widespread, even if it is not still universally accepted. It includes several disciplines and techniques for the study of the Earth's surface and its environments, and computer science plays a decisive role. A more meaningful and appropriate expression is Geo-spatial Information or GeoInformation. Geo-spatial Information embeds topography in its more modern forms (measurements with electronic instrumentation, sophisticated techniques of data analysis and network compensation, global satellite positioning techniques, laser scanning, etc.), analytical and digital photogrammetry, satellite and airborne remote sensing, numerical cartography, geographical information systems, decision support systems, WebGIS, etc. These specialized fields are intimately interrelated in terms of both the basic science and the results pursued: rigid separation does not allow us to discover several common aspects and the fundamental importance assumed in a search for solutions in the complex survey context. The objective pursued by Mario A. Gomasasca, one that is only apparently modest, is to publish an integrated text on the surveying theme, containing simple and comprehensible concepts relevant to experts in Geo-spatial Information and/or specifically in one of the disciplines that compose it. At the same time, the book is rigorous and synthetic, describing with precision the main instruments and methods connected to the multiple techniques available today.

Coral Reefs of the Eastern Tropical Pacific Peter W. Glynn, Derek P. Manzello, Ian C. Enochs, 2016-08-12 This book documents and examines the state of health of coral reefs in the eastern tropical Pacific region. It touches on the occurrence of coral reefs in the waters of surrounding countries, and it explores their biogeography, biodiversity and condition relative to the El Niño southern oscillation and human impacts. Additionally contained within is a field that presents information on many of the species presented in the preceding chapters.

Multivariate Statistics: Wolfgang Härdle, Zdeněk Hlávka, 2007-07-27 The authors have cleverly used exercises and their solutions to explore the concepts of multivariate data analysis. Broken down into three sections, this book has been structured to allow students in economics and finance to work their way through a well formulated exploration of this core topic. The first part of this book is devoted to graphical techniques. The second deals with multivariate random variables and presents the derivation of estimators and tests for various practical situations. The final section contains a wide variety of exercises in applied multivariate data analysis.

Encounters of a Mathematician Walter Ledermann, 2010-02-01 Professor Walter Ledermann is one of the great

algebraists of the twentieth century. His memoirs begin with life in pre-war Germany, the murder of several members of his family, and of the joy he found in mathematics and music. As the story of his remarkable life unfolds, we are entranced by tales of Scotland during the war and of academic life in Manchester and Sussex. His memoirs contain numerous entertaining, and often hilarious anecdotes of his encounters with famous mathematicians and physicists, such as Issai Schur, Heinz Hopf, Max Plank, Erwin Schroedinger, Edmund Whittaker, Alec Aitkin, Max Born and Alan Turing.
