New Worlds, New Civilizations Michael Jan Friedman,2012-08-28 They said it couldn't be done ... all the myriad worlds which have been sought out and explored through more than 500 television episodes and nine Star Trek movies, mapped, illustrated and brought to life in the pages of a comprehensive Star Trek atlas. From the comparatively crowded space of the Alpha and Beta Quadrants, home to Earth and Vulcan, Bajor and Betazed, the Cardassian Union and the Romulan and Klingon Empires; to the distant Gamma Quadrant controlled by the Dominion; to the far reaches of the Delta Quadrant, home space of the Borg, where of Federation explorers only the crew of the USS Voyager has ever been; NEW WORLDS, NEW CIVILIZATIONS catalogues peoples and planets from all four corners of the galaxy. Ever wondered where the blue-skinned Bolians originated from? Or what it is like on the permanently frozen homeworld of the bloodless Breen? From the first world that the first away team landed on under the command of Christopher Pike in the original pilot episode 'The Cage' (a world that has been off-limits to the Federation ever since), to the world of the Ba'ku as seen in 'Star Trek: Insurrection', all these and many more are described and depicted in all their fascinating detail by a team of star-studded contributors. Produced in the finest tradition of bestselling Star Trek illustrated reference from Pocket Books such as *The Art of Star Trek* and *Where No Man Has Gone Before*, NEW WORLDS, NEW CIVILIZATIONS will be an essential addition to every Trekker's shelves.

Socio-gerontechnology Alexander Peine, Barbara L. Marshall, Wendy Martin, Louis Neven, 2021-03-24 Social change in the twenty-first century is shaped by both demographic changes associated with ageing societies and significant technological change and development. Outlining the basic principles of a new academic field, Socio-gerontechnology, this book explores common conceptual, theoretical and methodological ideas that become visible in the critical scholarship on ageing and technology at the intersection of Age Studies and Science and Technology Studies (STS). Comprised of 15 original chapters, three commentaries and an afterword, the book explores how ageing and technology are already interconnected and constantly being intertwined in Western societies. Topics addressed cover a broad variety of socio-material domains, including care robots, the use of social media, ageing-in-place technologies, the performativity of user involvement and public consultations, dementia care and many others. Together, they provide a unique understanding of ageing and technology from a social sciences and humanities perspective and contribute to the development of new ontologies, methodologies and theories that might serve as both critique of and inspiration for policy and design. International in scope, including contributions from the United Kingdom, Canada, the United States, Australia, Germany, Norway, Denmark, Austria, the Netherlands, Spain and Sweden, Socio-gerontechnology is an agenda-setting text that will provide an introduction for students and early career researchers as well as for more established scholars who are interested in ageing and technology.

Animal Genomics Bhanu P. Chowdhary, 2003 This publication provides an update on the current status of gene maps in different livestock and pet/companion animal species. The findings summarized in species specific commentaries and original articles testify the rapid advances made in the field of animal genomics. Of significant interest is the fact that current investigations are providing headways for two important and exciting research fronts: targeted high-resolution mapping leading to the application of genomic information in addressing questions of economic and biological significance in animals, and the initiation of whole genome sequencing projects for some of the animal species. Like in humans and mice, this will set the stage for a new level of research and real time complex analysis of the genomes of these species. Animal Genomics signifies the beginning of a new era in this field and celebrates the achievements of the past 20 years of genomics research. It will be of special interest to researchers involved in genome analysis - both gross chromosomal as well as molecular - in

various animal species, and to comparative and evolutionary geneticists.

Supersize Crochet Sarah Shrimpton, 2017-05-19 Go BIG with Chunky Yarn Crochet! You will love this collection of patterns for cool accessories to gorgeous oversized home decor items including a Moroccan influenced pouffe. Nanoindentation Anthony C. Fischer-Cripps, 2013-03-09 This new edition of Nanoindentation includes a dedicated chapter on thin films, new material on dynamic analysis and creep, accounts of recent research, and three new appendices on nonlinear least squares fitting, frequently asked questions, and specifications for a nanoindentation instrument. Nanoindentation Second Edition is intended for those who are entering the field for the first time and to act as a reference for those already conversant with the technique.

Ultra High Performance Concrete Ekkehard Fehling, Michael Schmidt, S. Stürwald, 2008-01-01

The Genome Odyssey Dr. Euan Angus Ashley, 2021-02-23 In *The Genome Odyssey*, Dr. Euan Ashley, Stanford professor of medicine and genetics, brings the breakthroughs of precision medicine to vivid life through the real diagnostic journeys of his patients and the tireless efforts of his fellow doctors and scientists as they hunt to prevent, predict, and beat disease. Since the Human Genome Project was completed in 2003, the price of genome sequencing has dropped at a staggering rate. It's as if the price of a Ferrari went from \$350,000 to a mere forty cents. Through breakthroughs made by Dr. Ashley's team at Stanford and other dedicated groups around the world, analyzing the human genome has decreased from a heroic multibillion dollar effort to a single clinical test costing less than \$1,000. For the first time we have within our grasp the ability to predict our genetic future, to diagnose and prevent disease before it begins, and to decode what it really means to be human. In *The Genome Odyssey*, Dr. Ashley details the medicine behind genome sequencing with clarity and accessibility. More than that, with passion for his subject and compassion for his patients, he introduces readers to the dynamic group of researchers and doctor detectives who hunt for answers, and to the pioneering patients who open up their lives to the medical community during their search for diagnoses and cures. He describes how he led the team that was the first to analyze and interpret a complete human genome, how they broke genome speed records to diagnose and treat a newborn baby girl whose heart stopped five times on the first day of her life, and how they found a boy with tumors growing inside his heart and traced the cause to a missing piece of his genome. These patients inspire Dr. Ashley and his team as they work to expand the boundaries of our medical capabilities and to envision a future where genome sequencing is available for all,

where medicine can be tailored to treat specific diseases and to decode pathogens like viruses at the genomic level, and where our medical system as we know it has been completely revolutionized.

Ultra-High Performance Concrete UHPC Ekkehard Fehling, Michael Schmidt, Joost Walraven, Torsten Leutbecher, Susanne Fröhlich, 2015-04-20 Selected chapters from the German concrete yearbook are now being published in the new English Beton-Kalender Series for the benefit of an international audience. Since it was founded in 1906, the Ernst & Sohn Beton-Kalender has been supporting developments in reinforced and prestressed concrete. The aim was to publish a yearbook to reflect progress in ferro-concrete structures until - as the book's first editor, Fritz von Emperger (1862-1942), expressed it - the tempestuous development in this form of construction came to an end. However, the Beton-Kalender quickly became the chosen work of reference for civil and structural engineers, and apart from the years 1945-1950 has been published annually ever since. Ultra high performance concrete (UHPC) is a milestone in concrete technology and application. It permits the construction of both more slender and more durable concrete structures with a prolonged service life and thus improved sustainability. This book is a comprehensive overview of UHPC - from the principles behind its production and its mechanical properties to design and detailing aspects. The focus is on the material behaviour of steel fibre-reinforced UHPC. Numerical modelling and detailing of the connections with reinforced concrete elements are featured as well. Numerous examples worldwide - bridges, columns, facades and roofs - are the basis for additional explanations about the benefits of UHPC and how it helps to realise several architectural requirements. The authors are extensively involved in the testing, design, construction and monitoring of UHPC structures. What they provide here is therefore a unique synopsis of the state of the art with a view to practical applications.

Coal and Peat Fires: A Global Perspective Glenn B. Stracher, Anupma Prakash, Ellina V. Sokol, 2018-11-13 Coal and Peat Fires: A Global Perspective, Volumes 1-4, presents a fascinating collection of research about prehistoric and historic coal and peat fires. Magnificent illustrations of fires and research findings from countries around the world are featured-a totally new contribution to science. This third of four volumes in the collection, Coal Fires - Case Studies, examines in detail specific coal fires chronicled in a number of locations around the world including Brazil, the Czech Republic, Germany, Malawi, Poland, Russia, Spain, Tajikistan, the United States, Venezuela, and others. Authored by world-renowned experts in coal and peat fires Global in scope-countries from around the world are represented Includes beautiful color illustrations, lively presentations, important research data, and informative videos

Genomic and Precision Medicine Geoffrey S. Ginsburg, Huntington F Willard, John Strickler, Matthew Stuart

McKinney,2022-04-09 Genomic and Precision Medicine: Oncology, Third Edition focuses on the applications of genome discovery as research points to personalized cancer therapies. Each chapter is organized to cover the application of genomics and personalized medicine tools and technologies to a) Risk Assessment and Susceptibility, b) Diagnosis and Prognosis, c) Pharmacogenomics and Precision Therapeutics, and d) Emerging and Future Opportunities in the field. Provides a comprehensive volume written and edited by oncology genomic specialists for oncology health providers Includes succinct commentary and key learning points that will assist providers with their local needs for implementation of genomic and personalized medicine into practice Presents an up-to-date overview on major opportunities for genomic and personalized medicine in practice Covers case studies that highlight the practical use of genomics in the management of patients

Metaphoric Modernist Gunnar Birkerts,Sven Birkerts,Martin Schwartz,2009 Latvian-born architect Gunnar Birkerts belongs to the second wave of modernists who arrived in the United States from abroad, a group that includes Kevin Roche and Cesar Pelli among others. This work presents his cultural perspectives as well as his family insights to bear, offering a unique portrait of a life and career. Latvian-born architect Gunnar Birkerts belongs to the second wave of modernists who arrived in the United States from abroad, a group that includes Kevin Roche and Cesar Pelli among others. Educated at the Technische Hochschule in Stuttgart, Birkerts worked first with Eero Saarinen in his now-legendary office in Bloomfield Hills, Michigan, and later was chief designer for Minoru Yamasaki. At that time both Saarinen and Yamasaki were developing their distinctive architectural signatures and building their international renown. Subsequently Birkerts established his own practice, evolving a design process and a philosophy with its own original profile. His approach does not seek a 'right style for the job' in the manner of Saarinen. From the first, Birkerts' work was tied to a program as well as a particular context - a place - to the extent that it became expressive of the surrounding landscape and accommodating to the existing vernacular. Birkerts' designs, from the Federal Reserve Bank in Minneapolis to the Corning Museum of Glass to the Houston Arts Museum and recently the Latvian National Library, shows him exploring with ever greater resource and inventiveness the expressive possibilities of symbol and metaphor. Form, he believes, expresses function, and does so with its own rich, meaningful vocabulary. Birkerts uses visual metaphors to link program, client, and landscape in a resonant solution. His methodology of using metaphor - meaning - as a first principle, as a generator of design concept, is unusual in the profession, but it is vitally connected to his Latvian heritage and his family background as the son of a folklorist and writer. This heritage is given a new turn here, for the biographical text of the book has been written by his son, Sven Birkerts, who is a noted literary critic and author of the influential book *The Gutenberg Elegies: The Fate of Reading in an Electronic Age*. He has also written a memoir, *My Sky Blue Trades* which describes at some length his coming of age struggles with his architect father. Now, years later, Sven brings his cultural perspectives as well as his family insights to bear, offering a unique portrait of a life and career. History and description are enlivened throughout by observations and reflections on the career - the

destiny - of this master of the expressive concept. The book is richly illustrated and complemented by descriptive assessments of the projects by Martin Schwartz, who is an architect and writer and who teaches at Lawrence Technical University in Southfield, Michigan.

Animal Breeding and Genetics Matthew L. Spangler, 2022-11-01 This newly updated and revised volume of the Encyclopedia of Sustainability Science and Technology (ESST) details the role of Animal Breeding and Genetics in the sustainability of animal agriculture. The volume covers scientific principles and applications includes the current science used to advance cattle, poultry, swine, sheep, and equine populations, as well as the future role of techniques such as gene editing. International leaders in the field explain foundational concepts such as heritability, the covariance between relatives, statistical approaches to predicting the genetic merit of individuals, and the development and advancement of molecular techniques to elucidate changes in the DNA sequence that underly phenotypic variation. The use of genetic-based tools to improve animal agriculture and meet consumer demands across species is treated in detail. Readers will gain an understanding of how global livestock producers have implemented advanced genetic selection tools and used them to improve reproduction, production, efficiency, health, and sustainability. The interactions of genetics and production environments, and the genetic components of the complex interactions among animals are also discussed. The future of Animal Breeding and Genetics, including the challenges and opportunities that exist in feeding a growing world population, are addressed.

Ageing and Technology Emma Domínguez-Rué, Linda Nierling, 2016-01-31 The booming increase of the senior population has become a social phenomenon and a challenge to our societies, and technological advances have undoubtedly contributed to improve the lives of elderly citizens in numerous aspects. In current debates on technology, however, the »human factor« is often largely ignored. The ageing individual is rather seen as a malfunctioning machine whose deficiencies must be diagnosed or as a set of limitations to be overcome by means of technological devices. This volume aims at focusing on the perspective of human beings deriving from the development and use of technology: this change of perspective - taking the human being and not technology first - may help us to become more sensitive to the ambivalences involved in the interaction between humans and technology, as well as to adapt technologies to the people that created the need for its existence, thus contributing to improve the quality of life of senior citizens.
