The Queer Bible Commentary Deryn Guest, 2015-04-10 The Queer Bible Commentary brings together the work of several scholars and pastors known for their interest in the areas of gender, sexuality and Biblical studies. Rather than a verse-by-verse analysis, typical of more traditional commentaries, contributors to this volume focus specifically upon those portions of the book that have particular relevance for readers interested in lesbian, gay, bisexual and transgender issues such as the construction of gender and sexuality, the reification of heterosexuality, the question of lesbian and gay ancestry within the Bible, the transgendered voices of the prophets, the use of the Bible in contemporary political, socio-economic and religious spheres and the impact upon lesbian, gay, bisexual and transgender communities. Accordingly, the commentary raises new questions and re-directs more traditional questions in fresh and innovative ways, offering new angles of approach. This comprehensive, cutting-edge commentary is prefaced by an introductory essay by Professor Mary Tolbert. Contributors draw on feminist, queer, deconstructionist, utopian theories, the social sciences and historical-critical discourses. The focus is both how reading from lesbian, gay, bisexual and/or transgender perspectives affect the reading and interpretation of biblical texts and how biblical texts have and do affect lesbian, gay, bisexual and/or transgender communities. The commentary includes an extensive bibliography that directs the reader to a full range of literature relating to queer interpretation of scripture.

**One for the Road** Bjørn Christian Tørrissen, 2008-11-10 Building on experience from 60 countries worth of independent travel, the author takes you on three journeys to places you may never have considered visiting, although you probably should and you definitely could. Learn about a low-budget cruise to Antarctica, understand what the Trans-Siberian Railway really is like, enjoy the natural wonders of Southern Africa. The book is a fun read, but you will also learn about far-away destinations and about how to travel independently anywhere. It's not a travel guide or a travel journal, it's both! **Enlightening: Letters 1946 - 1960** Isaiah Berlin, 2012-06-30 'People are my landscape', Isaiah Berlin liked to say, and nowhere is the truth of this observation more evident than in his letters. He is a fascinated watcher of human beings in all their variety, and revels in describing them to his many correspondents. His letters combine ironic social comedy and a passionate concern for individual freedom. His interpretation of political events, historical and contemporary, and his views

on how life should be lived, are always grounded in the personal, and his fiercest condemnation is reserved for purveyors of grand abstract theories that ignore what people are really like. This second volume of Berlin's letters takes up the story when, after war service in the United States, he returns to life as an Oxford don. Against the background of post-war austerity, the letters chart years of academic frustration and self-doubt, the intellectual explosion when he moves from philosophy to the history of ideas, his growing national fame as broadcaster and lecturer, the publication of some of his best-known works, his election to a professorship, and his reaction to knighthood. These are the years, too, of momentous developments in his private life: the bachelor don's loss of sexual innocence, the emotional turmoil of his father's death, his courtship of a married woman and transformation into husband and stepfather. Above all, these revealing letters vividly display Berlin's effervescent personality - often infuriating, but always irresistible.

**Biobanking and Cryopreservation of Stem Cells** Feridoun Karimi-Busheri, Michael Weinfeld, 2016-11-10 Biobanking is considered to be one of the ten ideas changing the world with an estimated value of \$45 billion by 2025. Despite the challenges, as the climate for innovation in the biobanking industry continues to flourish around the world, it is certain that amazing discoveries will emerge from this large-scale method of preserving and accessing human samples; biobanking is no longer just a place for collecting and storing samples. This book will cover a wide variety of subjects from across the future biobanking spectrum including scientific strategies, personalized medicine, regenerative medicine and stem cell challenges, disease surveillance, population genetics and innovative methods of biobanking.

**Elvira: The Shape of Elvira #1** David Avallone, 2019-01-30 The Mistress of the Dark lands the leading role in a touching art film about human/gill monster romance, but there's something decidedly fishy about her costar. **The Idea of Freedom** Alan Ryan, 1979

The Nebraska Dispatches Christopher Cartmill, 2010-01-01 Standing Bear, a Ponca Native American chief, is best known for successfully arguing in U.S. District Court in 1879 that Native Americans are persons within the meaning of the law who have the right of habeas corpus. When playwright Christopher Cartmill returned to his hometown of Lincoln, Nebraska, to write a play about Chief Standing Bear, he unknowingly began a complicated adventure. As he followed the story of the Ponca chief who fought so hard to return from a reservation in Oklahoma to his homeland in northern Nebraska, Cartmill stumbled into the politics of identity, contested notions of homeland, and his own past. Chronicling these adventures in a series of dispatches to friends, he documented the transformation of a research trip into a three-year exploration of

Nebraska, its Native community, the meaning of home, and the complex relationship we all have with history. These dispatches, originally presented in Cartmill's celebrated performance and now gathered together in this book, offer snapshots of a New Yorker's travels into the heartland, insights into a very personal journey, and glimpses into a history that critiques and continues the American story.

Membranes and Membrane Processes Enrico Drioli, Masayuki Nakagaki, 2013-11-21 During the past two decades Membrane Science and Technology has made tremendous progress and has changed from a simple laboratory tool to large scale processes with numerous applications in Medicine and Industry. In this volume are collected papers presented at the First Europe Japan Congress on Membrane and Membrane processes, held in Stresa in June 1984. Other contributions to the Conference will be published in a special issue of the Journal of Membrane Science. This Conference was organized by the European Society of Membrane Science and Technology and the Membrane Society of Japan, to bring together European Scientists and Engineers face to face with their colleagues from Japan; in both countries membrane processes will play a strategic role in many industrial areas in the 1990s, as predicted by the Japanese project for Next Generation Industries and by the EEC Project on Basic Technological Research (BRITE). The large number of participants, of about four hundred from twenty six countries including USA, Australia, China and Brazil, the quality of the Plenary Lectures and Scientific Communications made the Conference a significant international success.

**Sensory Evaluation Practices** Herbert Stone, 2012-12-02 Sensory Evaluation Practices examines the principles and practices of sensory evaluation. It describes methods and procedures for the analysis of results from sensory tests; explains the reasons for selecting a particular procedure or test method; and discusses the organization and operation of a testing program, the design of a test facility, and the interpretation of results. Comprised of three parts encompassing nine chapters, this volume begins with an overview of sensory evaluation: what it does; how, where, and for whom; and its origin in physiology and psychology. It then discusses measurement, psychological errors in testing, statistics, test strategy, and experimental design. The reader is also introduced to the discrimination, descriptive, and affective methods of testing, along with the criteria used to select a specific method, procedures for data analysis, and the communication of actionable results. The book concludes by looking at problems where sensory evaluation is applicable, including correlation of instrumental and sensory data, measurement of perceived efficacy, storage testing, and product optimization. This book is a valuable resource for sensory professionals, product development and production specialists, research directors, technical managers, and professionals involved in marketing, marketing research, and advertising.

*Building* Isaiah Berlin, 2016-04-07 In the period covered here Isaiah Berlin creates Wolfson College, Oxford; John F. Kennedy becomes U.S. President (and is assassinated); Berlin dines with JFK on the day he is told of the Soviet missile bases in Cuba; the Six-Day Arab-Israeli war of 1967 creates problems that remain with us today; Richard M. Nixon succeeds Johnson as President and resigns over Watergate; and the long agony of the Vietnam War grinds on in the background. At the same time Berlin publishes some of his most important work, including Four Essays on Liberty--the key texts of his liberal pluralism--and the essays later included in Vico and Herder. He appears on the radio, on television, and in documentary films, and gives numerous lectures, especially his celebrated Mellon Lectures, later published as The Roots of Romanticism. Behind these public events is a constant stream of gossip and commentary, acerbic humor, and warm personal feeling. This new volume leaves no doubt that Berlin is one of the very best letter-writers of the 20th century.
