The resulting new garden is a pleasure garden vested with spiritual, symbolic and ecological intent. A modernist interpretation of Roman stone furniture and freestanding walls punctuate the space behind a 1970s ranch house. A home designed by Bernard Maybeck is accented with a freehand composition of urns, cement pipes and rusty objects, as well as over a thousand species of plants. A grove of olive trees underplanted with rosemary and lavender fields gives personality to two acres surrounding a house designed by modernist Mexican architect Ricardo Legorreta.

Lawn Gone! Pam Penick, 2013-02-12 A colorful guide covering the basics of replacing a traditional lawn with a wide variety of easy-care, no-mow, drought-tolerant, money-saving options that will appeal to today's busy, eco-conscious homeowner. Americans pour 300 million gallons of gas and 1 billion hours every year into mowing their lawns, not to mention 70 million pounds of pesticides and \$40 billion for lawn upkeep. No Wonder the anti-lawn movement is thriving, as today's eco-conscious consumers realize that their traditional lawns are water-hogging, chemical-ridden, maintenance-intensive burdens. *Lawn Gone!*, from award-winning gardening blogger Pam Penick, is the first basic introduction to low-water, easy-care lawn alternatives for beginning gardeners, written in a friendly style with an approachable package. It covers all the available time-saving options: alternative grasses, ground cover plants, artificial turf, hardscaping, mulch, and more. In addition, it includes step-by-step lawn-removal methods, strategies for dealing with neighbors and homeowner associations, and how to minimize your lawn if you're not ready to go all the way.

The English Rock-garden Reginald Farrer, 1919

Lawns into Meadows Owen Wormser, 2020-07-02 In *Lawns into Meadows*, landscape designer Owen Wormser makes a case for the power and generosity of meadows. In a world where lawns have wreaked havoc on our natural ecosystems, meadows offer a compelling solution. They establish wildlife and pollinator habitats. They're low-maintenance and low-cost. They have a built-in resilience that helps them weather climate extremes, and they can draw down and store far more carbon dioxide than any manicured lawn. They're also beautiful, all year round. Owen describes how to plant an organic meadow that's right for your site, whether it's a yard, community garden, or tired city lot. He shares advice on preparing your plot,

coming up with the right design, and planting—all without using synthetic chemicals. He passes along tips on building support in neighborhoods where a tidy lawn is the standard. Owen also profiles twenty-one starter grasses and flowers for beginning meadow-makers, and offers guidance on how to grow each one. To illuminate the many joys of meadow-building, Owen draws on his own stories, including how growing up off the grid in northern Maine, with no electricity or plumbing, prepared him for his work. The book, part how-to guide and part memoir, is for environmentalists and climate activists, gardeners and non-gardeners alike. *Lawns Into Meadows* is part of Stone Pier Press's Citizen Gardening series, which teaches readers how to grow food and garden in ways that are good for the planet.

Designing a Garden Michael Van Valkenburgh, 2019-10-15 The intimate Monk's Garden at the Isabella Stewart Gardner Museum in Boston embodies the design principles that inform the work of noted landscape architect Michael Van Valkenburgh. In *Designing a Garden*, Van Valkenburgh presents the design of the Monk's Garden at the Isabella Stewart Gardner Museum, an intimate, walled garden that Laurie Olin has described as a masterpiece, and not a minor one. The book documents the evolution of the garden's design, which is based on the concept of meandering paths through a dreamlike woodland to create a contemplative space. Sketches and models show how the idea was worked out, and lush photographs reveal the completed garden through the seasons. Van Valkenburgh's text explores the origins of his love of landscape and plants in his family farm in Upstate New York and how this has influenced his intuitions as a designer. He shares the full background story of the Monk's Garden, focusing on the experimental nature of design work as well as the challenges and satisfactions of the small scale and the historic and cultural context. *Designing a Garden* provides a unique first-person account of the design process from the most prominent landscape architects in the country.

How to Grow a School Garden Arden Bucklin-Sporer, Rachel Pringle, 2010-09-14 In this groundbreaking resource, two school garden pioneers offer parents, teachers, and school administrators everything they need to know to build school gardens and to develop the programs that support them. Today both schools and parents have a unique opportunity — and an increasing responsibility — to cultivate an awareness of our finite resources, to reinforce values of environmental stewardship, to help students understand concepts of nutrition and health, and to connect children to the natural world. What better way to do this than by engaging young people, their families, and teachers in the wondrous outdoor classroom that is their very own school garden? It's all here: developing the concept, planning, fund-raising, organizing, designing the space, preparing the site, working with parents and schools, teaching in the garden, planting, harvesting, and even cooking, with kid-friendly recipes and year-round activities. Packed with strategies, to-do lists, sample letters, detailed lesson plans, and tricks of the trade from decades of experience developing school garden programs for grades K-8, this hands-on approach will make school garden projects accessible, inexpensive, and sustainable. Reclaiming a piece of neglected play yard and transforming it into an ecologically rich school garden is among the most beneficial activities that parents, teachers,

and children can undertake together. This book provides all the tools that the school community needs to build a productive and engaging school garden that will continue to inspire and nurture students and families for years to come.

The Humane Gardener Nancy Lawson, 2017-04-18 In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. *The Humane Gardener* fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.

Hellstrip Gardening Evelyn Hadden, 2014-04-22 Presents a guide to creating a garden in such unused spaces as land beside a driveway, next to steps, or between the sidewalk and the street curb, discussing how to prepare the soil and listing the varieties of plants suitable for these conditions.

The Edible Front Yard Ivette Soler, 2011-02-23 “Front lawns, beware: The Germinatrix has you in her crosshairs! Ivette Soler is a welcome voice urging us to mow less and grow some food—in her uniquely fun, infectious yet informative way.” —Garden Rant People everywhere are turning patches of soil into bountiful vegetable gardens, and each spring a new crop of beginners pick up trowels and plant seeds for the first time. They're planting tomatoes in raised beds, runner beans in small plots, and strawberries in containers. But there is one place that has, until now, been woefully neglected—the front yard. And there's good reason. The typical veggie garden, with its raised beds and plots, is not the most attractive type of garden, and favorite edible plants like tomatoes and cucumbers have a tendency to look a scraggily, even in their prime. But *The Edible Front Yard* isn't about the typical veggie garden, and author Ivette Soler is passionate about putting edibles up front and creating edible gardens with curb appeal. Soler offers step-by-step instructions for converting all or part of a lawn into an edible paradise; specific guidelines for selecting and planting the most attractive edible plants; and design advice and plans for the best placement and for combining edibles with ornamentals in pleasing ways. Inspiring and accessible, *The Edible Front Yard* is a one-stop resource for a front-and-center edible garden that is both beautiful and bountiful year-round.

A Way to Garden Margaret Roach, 2019-04-30 “A Way to Garden prods us toward that ineffable place where we feel we belong; it's a guide to living both in and out of the garden.” —The New York Times Book Review For Margaret Roach, gardening is more than a hobby, it's a calling. Her unique approach, which she calls “horticultural how-to and woo-woo,” is a blend of vital information you need to memorize and intuitive steps you must simply feel and surrender to. In *A Way to*

Garden, Roach imparts decades of garden wisdom on seasonal gardening, ornamental plants, vegetable gardening, design, gardening for wildlife, organic practices, and much more. She also challenges gardeners to think beyond their garden borders and to consider the ways gardening can enrich the world. Brimming with beautiful photographs of Roach's own garden, *A Way to Garden* is practical, inspiring, and a must-have for every passionate gardener.

Rhapsody in Green: A Writer, an Obsession, a Laughably Small Excuse for a Vegetable Garden Charlotte

Mendelson, 2018-07-16 'Charming, inspiring, uplifting ... pure lovely,' - Marian Keyes 'Read *Rhapsody in Green*. A novelist's beautiful, useful essays about her tiny garden.' - India Knight 'Glorious...for anyone who loves fruit, vegetables, herbs and language. It makes you see them with new eyes.' - Diana Henry 'A witty account of 'extreme allotmenting' for all obsessive gardeners' - Mail on Sunday 'An extremely entertaining and inspiring story of one woman's passionate transformation of a small, irregular shaped urban garden into a bountiful source of food.' - Woman & Home 'A gardening book like no other, this is the author's 'love letter' to her garden. She relays warm and witty stories about the trials and tribulations throughout her gardening year.' - Garden News '...this inspirational, funny book, written by someone who hankers after a homesteader's lifestyle, will make you look at even your window box in a new, more productive light.' - The Simple Things Gardening can be viewed as a largely pointless hobby, but the evangelical zeal and camaraderie it generates is unique. Charlotte Mendelson is perhaps unusually passionate about it. For despite her superficially normal existence, despite the fact that she has only six square metres of grotty urban soil and a few pots, she has a secret life. She is an extreme gardener, an obsessive, an addict. And like all addicts, she wants to spread the joy. Her garden may look like a nasty drunk old man's mini-allotment, chaotic, virtually flowerless, with weird recycling and nowhere to sit. When honoured friends are shown it, they tend to laugh. However, it is actually a tiny jungle, a minuscule farm, a wildly uneconomical experiment in intensive edible cultivation, on which she grows a taste of perhaps a hundred kinds of delicious fruits and odd vegetables. It is a source of infinite happiness and deep peace. It looks completely bonkers. Arguably, it's the most expensive, time-consuming, undecorative and self-indulgent way to grow a salad ever invented, but when tired or sad or cross it never fails to delight.

Contemporary Gardens of New Zealand Carol Bucknell, Sally Tagg, 2012 Author Carol Bucknell and photographer Sally Tagg have travelled the length of New Zealand to capture more than twenty of our most impressive and interesting modern garden designs. The result is *Contemporary Gardens of New Zealand*, a stunningly photographed book celebrating some of the best contemporary gardens our country has to offer. With gardens ranging in style from cutting-edge minimalism to landscaping as architecture, *Contemporary Gardens of New Zealand* offers you the experience and enjoyment of a garden trail, all from the comfort of your own home.

Groundbreaking Food Gardens Niki Jabbour, 2014-03-25 Follow your zany muse and get creative with your vegetable garden. Niki Jabbour brings you 73 novel and inspiring food garden designs that include a cocktail garden featuring all the

ingredients for your favorite drinks, a spicy retreat comprising 24 varieties of chile peppers, and a garden that's devoted to supplying year-round salad greens. Created by celebrated gardeners, each unique design is accompanied by both plant lists and charming anecdotes. This fully illustrated collection glitters with off-beat personality and quirkiness.

Hardscaping Keith Davitt, 2008 A guide to hardscaping that provides information on structure and balance, discussing instilling motion, delineating spaces, creating privacy, and other related topics.

The Backyard Parables Margaret Roach, 2013-01-15 Margaret Roach has been harvesting thirty years of backyard parables-deceptively simple, instructive stories from a life spent digging ever deeper-and has distilled them in this memoir along with her best tips for garden making, discouraging all manner of animal and insect opponents, at-home pickling, and more. After ruminating on the bigger picture in her memoir *And I Shall Have Some Peace There*, Margaret Roach has returned to the garden, insisting as ever that we must garden with both our head and heart, or as she expresses it, with horticultural how-to and woo-woo. In *The Backyard Parables*, Roach uses her fundamental understanding of the natural world, philosophy, and life to explore the ways that gardening saved and instructed her, and meditates on the science and spirituality of nature, reminding her readers and herself to keep on digging.

Walks to the Paradise Garden Phillip March Jones, 2019-04-15 *Walks to the Paradise Garden* is the last unpublished manuscript of the late American poet, photographer, publisher and bon viveur Jonathan Williams (1929-2008). This book chronicles Williams' road trips across the Southern United States with photographers Guy Mendes and Roger Manley in search of the most authentic and outlandish artists the South had to offer. Williams describes the project thus: 'The people and places in *Walks to the Paradise Garden* exist along the blue highways of America.... We have traveled many thousands of miles, together and separately, to document what tickled us, what moved us, and what (sometimes) appalled us.' The majority of these road trips took place in the 1980s, a pivotal decade in the development of Southern 'yard shows' and many of the artists are now featured in major institutions. This book, however, chronicles them at the outset of their careers and provides essential context for their inclusion in the art historical canon--Back cover.
