*ArtCurious* Jennifer Dasal,2020-09-15 A wildly entertaining and surprisingly educational dive into art history as you've never seen it before, from the host of the beloved ArtCurious podcast We're all familiar with the works of Claude Monet, thanks in no small part to the ubiquitous reproductions of his water lilies on umbrellas, handbags, scarves, and dorm-room posters. But did you also know that Monet and his cohort were trailblazing rebels whose works were originally deemed unbelievably ugly and vulgar? And while you probably know the tale of Vincent van Gogh's suicide, you may not be aware that there's pretty compelling evidence that the artist didn't die by his own hand but was accidentally killed--or even murdered. Or how about the fact that one of Andy Warhol's most enduring legacies involves Caroline Kennedy's moldy birthday cake and a collection of toenail clippings? ArtCurious is a colorful look at the world of art history, revealing some of the strangest, funniest, and most fascinating stories behind the world's great artists and masterpieces. Through these and other incredible, weird, and wonderful tales, ArtCurious presents an engaging look at why art history is, and continues to be, a riveting and relevant world to explore.

**Settlement, Society and Cognition in Human Evolution** Fiona Coward,Robert Hosfield,Matt Pope,Francis Wenban-Smith,2015-01-26 This volume provides a landscape narrative of early hominin evolution, linking conventional material and geographic aspects of the early archaeological record with wider and more elusive social, cognitive and symbolic landscapes. It seeks to move beyond a limiting notion of early hominin culture and behaviour as dictated solely by the environment to present the early hominin world as the outcome of a dynamic dialogue between the physical environment and its perception and habitation by active agents. This international group of contributors presents theoretically informed yet empirically based perspectives on hominin and human landscapes.

*The Joy of Science* Richard A. Lockshin,2007-11-05 This book reveals that scientific logic is an extension of common, everyday logic and that it can and should be understood by everyone. Written by a practicing and successful scientist, it explores why questions arise in science and looks at how questions are tackled, what constitutes a valid answer, and why. The author does not bog the reader down in technical details or lists of facts to memorize. He uses accessible examples, illustrations, and descriptions to address complex issues. The book should prove enlightening to anyone who has been perplexed by the meaning, relevance, and moral or political implications of science.

*The Sexuality-Reproduction Nexus and the Three Demographic Transitions* Nikolai Botev, 2020-01-07 This monograph outlines an integrative framework that conceptualizes the role of relations of control in human reproduction and long-term population dynamics. It thereby draws on the demographic transition theory, sexuality studies, Foucault's concept of bio-power and sexuality as key to social control, cognate concepts and theories, and on findings from demography, anthropology, archaeology and other disciplines. The framework is based on the premise that four demographic regimes can be identified over the course of human history. They are defined by the primary locus and modus of control over reproduction. The framework questions some of the basic postulates in population studies, including how demographic transitions are interpreted. As such this book contributes to the debate on the longer-term trends in population dynamics and the relations of power and control in human reproduction.

*Ecstatic Naturalism* Robert S. Corrington, 1994-04-22 Semiotic theory, which has restricted its focus largely to human forms of significations, is transformed by Robert S. Corrington into a semiotics of nature itself. Corrington situates the divide between nature naturing and nature natured within the contest of classical American pragmatism and postmodern psychoanalysis. At the heart of this new metaphysics is an insistence that all signs participate in larger orders of meaning that are natural and religious. Meanings embodied in nature point beyond nature to the mystery inherent in positioned codes and signs.

**The Nature of Paleolithic Art** R. Dale Guthrie, 2005 Publisher Description

The Invisible Sex J. M. Adovasio, Olga Soffer, Jake Page, 2016-09-16 Shaped by cartoons and museum dioramas, our vision of Paleolithic times tends to feature fur-clad male hunters fearlessly attacking mammoths while timid women hover fearfully behind a boulder. Recent archaeological research has shown that this vision bears little relation to reality. J. M. Adovasio and Olga Soffer, two of the world's leading experts on perishable artifacts such as basketry, cordage, and weaving, present an exciting new look at prehistory. With science writer Jake Page, they argue that women invented all kinds of critical materials, including the clothing necessary for life in colder climates, the ropes used to make rafts that enabled long-distance travel by water, and nets used for communal hunting. Even more important, women played a central role in the development of language and social life—in short, in our becoming human. In this eye-opening book, a new story about women in prehistory emerges with provocative implications for our assumptions about gender today.

*Unearthed* Douglass Whitfield Bailey, Andrew Cochrane, Jean Zambelli, 2010 Issued in connection with an exhibition held at the Sainsbury Centre for Visual Arts.

**Voyage of the Sable Venus** Robin Coste Lewis, 2017-11-21 This National Book Award-winning debut poetry collection is a powerfully evocative (The New York Review of Books) meditation on the black female figure through time. Robin Coste Lewis's electrifying collection is a triptych that begins and ends with lyric poems meditating on the roles desire and race play in the construction of the self. In the center of the collection is the title poem, *Voyage of the Sable Venus*, an amazing narrative made up entirely of titles of artworks from ancient times to the present—titles that feature or in some way comment on the black female figure in Western art. Bracketed by Lewis's own autobiographical poems, *Voyage* is a tender and shocking meditation on the fragmentary mysteries of stereotype, juxtaposing our names for things with what we actually see and know. A new understanding of biography and the self, this collection questions just where, historically, do ideas about

the black female figure truly begin—five hundred years ago, five thousand, or even longer? And what role did art play in this ancient, often heinous story? Here we meet a poet who adores her culture and the beauty to be found within it. Yet she is also a cultural critic alert to the nuances of race and desire—how they define us all, including her own sometimes painful history. Lewis's book is a thrilling aesthetic anthem to the complexity of race—a full embrace of its pleasure and horror, in equal parts.

*The Shelters of Stone* Jean M. Auel, 2002 The long-awaited fifth volume in Auel's *Earth's Children* series continues as Ayla and Jondalar face new and perilous challenges at the old stone settlement in prehistoric southwest France—home to the Zelandonii. Some of us were lucky enough to have one passionate, funny, inspiring English teacher who helped us fall in love with books. The Journey of Man Spencer Wells, 2017-03-28 Around 60,000 years ago, a man, genetically identical to us, lived in Africa. Every person alive today is descended from him. How did this real-life Adam wind up as the father of us all? What happened to the descendants of other men who lived at the same time? And why, if modern humans share a single prehistoric ancestor, do we come in so many sizes, shapes, and races? Examining the hidden secrets of human evolution in our genetic code, the author reveals how developments in the revolutionary science of population genetics have made it possible to create a family tree for the whole of humanity. Replete with marvelous anecdotes and remarkable information, from the truth

about the real Adam and Eve to the way differing racial types emerged, this book is an enthralling, epic tour through the history and development of early humankind.

*Ice Age Art* Jill Cook, 2013 This unique and remarkable work explores the extraordinary creative explosion that happened during the last European Ice Age, between 40,000 and 10,000 years ago, when the very first figurative art was created.

**Materials and Processes of Contemporary Sculpture** Mahmoud Farag, 2020-01-17 Creating a successful sculpture requires an imaginative concept and a sound design that utilize the potential and avoid the limitations of the material and the process used in making it. Prior to a few decades ago, most sculptors were restricted to carving stone and wood or casting plaster, ceramics and bronze for their creations. Contemporary sculptors, however, are no longer bound by the limitations of these traditional materials and processes, and can now create works in sizes, forms and textures that could not have been achieved previously. Many modern sculptures are now made from materials ranging from steel and aluminum to plastics and composites using processes ranging from welding and adhesive bonding to molding and 3D printing. To fully utilize the full potential of such new materials, the sculptor needs to understand their points of strength, their limitations, and the most effective way of shaping them to achieve a given design. Although this book is written by a materials engineer, the subject matter is presented from the point of view of the sculptor with emphasis on the strengths and weaknesses of different materials, their resistance to weather conditions, natural color and possible surface textures, possible methods of shaping and joining, tools and equipment needed, and safety measures to take. Whenever possible, case studies are used to illustrate the sequence of processes and the cost elements involved in shaping a given material to create an actual work of sculpture.

**The Hacking of the American Mind** Robert H. Lustig, 2017-09-12 Explores how industry has manipulated our most deep-seated survival instincts.—David Perlmutter, MD, Author, #1 New York Times bestseller, *Grain Brain* and *Brain Maker* The New York Times–bestselling author of *Fat Chance* reveals the corporate scheme to sell pleasure, driving the international epidemic of addiction, depression, and chronic disease. While researching the toxic and addictive properties of sugar for his New York Times bestseller *Fat Chance*, Robert Lustig made an alarming discovery—our pursuit of happiness is being subverted by a culture of addiction and depression from which we may never recover. Dopamine is the “reward” neurotransmitter that tells our brains we want more; yet every substance or behavior that releases dopamine in the extreme leads to addiction. Serotonin is the “contentment” neurotransmitter that tells our brains we don’t need any more; yet its deficiency leads to depression. Ideally, both are in optimal supply. Yet dopamine evolved to overwhelm serotonin—because our ancestors were more likely to survive if they were constantly motivated—with the result that constant desire can chemically destroy our ability to feel happiness, while sending us down the slippery slope to addiction. In the last forty years, government legislation and subsidies have promoted ever-available temptation (sugar, drugs, social media, porn) combined with constant stress (work, home, money, Internet), with the end result of an unprecedented epidemic of addiction, anxiety,

depression, and chronic disease. And with the advent of neuromarketing, corporate America has successfully imprisoned us in an endless loop of desire and consumption from which there is no obvious escape. With his customary wit and incisiveness, Lustig not only reveals the science that drives these states of mind, he points his finger directly at the corporations that helped create this mess, and the government actors who facilitated it, and he offers solutions we can all use in the pursuit of happiness, even in the face of overwhelming opposition. Always fearless and provocative, Lustig marshals a call to action, with seminal implications for our health, our well-being, and our culture.
