New Jersey Derek Miller,David King,William McGeeveran,2019-07-15 With bustling cities like Newark and Jersey City, New Jersey is best known as an economic center. Yet the Garden State boasts something for everyone. The state's pristine beaches draw visitors from all over, while the Pine Barrens yield famous Jersey sweet corn. New Jersey's emphasis on local governance inspires residents to come together to make their home great. In fact, New Jersey is a leader in education and innovation. Treat your readers to the richness of the Garden State.

American Big Trucks Cristina Berna,Eric Thomsen,2023-10-11 The big truck is a dominant feature in our modern society. Alexander Winston sold his first horseless semi-truck 1899 and in 1913 Maine was the first state to limit the weight of trucks on its roads, to 18,000 pounds and that became a norm. There are abt 4.06 million semi-trucks operating in the USA. The payload is abt 42,000 and 48,000 on the usual semi-trailer, meaning the trailer fleet can move abt 170,520 million pounds around. Add to this all the special big trucks. 8.4 million people are employed in the trucking industry, 3.54 million are truck drivers, excluding the self-employed (2022). Follow the big trucks and their loads in pictures and short comments. We honor this great industry on 4th of July and Labor Day and hope you will enjoy our selection of photos.

The New York and New Jersey Campaign ,

Underground Railroad in New York and New Jersey William J. Switala, 2006-06-26 • Maps of the major escape routes • Identifies houses and sites where slaves found refuge • Chapter on Canada discusses the final destination Tells the story of the network that guided escaped slaves to freedom, its operation, its important figures, and its specific history in New York and New Jersey. Pinpoints major routes in the states, with maps and information for locating them today.

American Police Cars 2 Cristina Berna, Eric Thomsen, 2023-09-08 Police cars are usually very visible in our society, advertising the important role of police and loved by children. The first police car in America was an electric wagon used by the Akron Police Department in Akron, Ohio in 1899. The car was built by city mechanical engineer Frank Loomis and could reach 16 mph (26 km/h) and travel 30 mi (48 km) before needing to be recharged. Law enforcement vehicles make the police mobile and some of the cars can reach 150 mph (almost 250 km/h). Only the fastest supercars can outrun these highway patrols! We honor all good police on this 4th of July 2023 and hope you will enjoy our selection of photos.

Prehistoric Animals Still Alive Today (Level 3 Reader) Rivet, 2019-05-22 From first introductions to deep dives into the wonders of our world, Rivet nonfiction books fascinate young readers. A level 3 reader in the Crunchers and Munchers series, Prehistoric Animals Still Alive Today will feed readers' curiosity about Animals.

American Air Rescue Cristina Berna, Eric Thomsen, 2023-07-31 Air rescue is a modern technological advancement that delivers power and flexibility to incredibly difficult tasks! Since around 400 BC, Chinese children have played with bamboo flying toys. It was not until the early 1480s, when Italian polymath Leonardo da Vinci created a design for an aerial screw, but in 1942, the Sikorsky R-4 became the first helicopter to reach full-scale production. Fixed wing aircraft are also used as ambulances and fire fighting vehicles. Today, rescue vehicles are technologically highly developed with specialized equipment and specially trained paramedics to keep people alive until they can get care at a hospital. We honor all service members on Memorial Day (last Monday of May) and hope you will enjoy our selection of photos.

Global Social Archaeologies Koji Mizoguchi, Claire E Smith, 2019-06-27 Global Social Archaeologies contributes to the active engagement of contemporary social archaeology through addressing issues such as postcolonialism, community heritage, and Indigenous rights. It addresses the major challenge of breaking down global divides, especially in relation to fundamental human rights, inequality, and inequities of wealth, power, and access to knowledge. This authoritative volume, authored by the current and past presidents of the World Archaeological Congress, introduces readers to the various theoretical and methodological tools available for the investigation of the past. Taking into account the implications for contemporary societies, it offers a new framework for social archaeologies in a globalised world. By combining new data from their research with an innovative synthesis and analysis of leading research by others, the authors have developed fresh conceptualisations and understandings of archaeology as a social practice, and of the ways in which it simultaneously straddles the past, present, and future. Exploring a range of case studies and enhanced by a wealth of illustrations, Global

Social Archaeologies highlights a new approach to archaeology, one that places human rights at the core of archaeological theory and practice.

The Science of Hurricanes Joanne Mattern, 2019-07-15 Hurricanes are some of the most powerful storms on Earth. These monsters in the sky produce high winds, lots of rain, terrible flooding, storm surges, and more. This book explores the science behind hurricanes. Readers will learn what natural forces cause them, how they form, and how they die out. They will also learn how scientists forecast and track hurricanes, technologies that are helping people predict and follow these storms better, and what people can do to prepare for a hurricane and stay safe when one hits.

Reglazing Modernism, 2019-10-08 The worldwide use of building envelopes in steel and glass is one of the characteristic features of modern architecture. Many of these pre- and post-war buildings are now suffering severe defects in the building fabric, which necessitate measures to preserve the buildings. In this endeavor, aspects of architectural design, building physics, and the preservation of historic buildings play a key role. Using a selection of 20 iconic buildings in Europe and the USA, the book documents the current technological status of the three most common strategies used today: restoration, rehabilitation, and replacement. The buildings include Fallingwater House by Frank Lloyd Wright, Farnsworth House by Ludwig Mies van der Rohe, Fagus Factory and Bauhaus Building by Walter Gropius.

In Lady Liberty's Shadow Robyn Magalit Rodriguez, 2017-06-22 Home to Ellis Island, New Jersey has been the first stop for many immigrant groups for well over a century. Yet in this highly diverse state, some of the most anti-immigrant policies in the nation are being tested. American suburbs are home to increasing numbers of first and second-generation immigrants who may actually be bypassing the city to settle directly into the neighborhoods that their predecessors have already begun to plant roots in—a trajectory that leads to nativist ordinances and other forms of xenophobia. In *Lady Liberty's Shadow* examines popular white perceptions of danger represented by immigrants and their children, as well the specter that lurks at the edges of suburbs in the shape of black and Latino urban underclasses and the ever more nebulous hazard of (presumed-Islamic) terrorism that threatening to undermine “life as we know it.” Robyn Magalit Rodriguez explores the impact of anti-immigrant municipal ordinances on a range of immigrant groups living in varied suburban communities, from undocumented Latinos in predominantly white suburbs to long-established Asian immigrants in “majority-minority” suburbs. The “American Dream” that suburban life is supposed to represent is shown to rest on a racialized, segregated social order meant to be enjoyed only by whites. Although it is a case study of New Jersey, *In Lady Liberty's Shadow* offers crucial insights that can shed fresh light on the national immigration debate. The Big Bang Theory Rachel Keranen, 2017-07-15 The genesis of our universe has captured the imagination of astronomers throughout history. The development of the big bang theory is a story of heated debates, a race to discovery, and persistent scientists who refused to give up. This book includes biographies of Arno Penzias, Robert Wilson, Ralph

Alpher, and more. The book presents proven scientific facts about our universe alongside questions that today's astrophysicists work tirelessly to answer.

American Cars & License Plates Cristina Berna, Eric Thomsen, 2023-08-21 Probably the reader shares the fascination of much of humankind for cars or automobiles. Probably also a fascination for American cars, especially the big ones with great seats. The development of automobiles started already in 1672 with the first steam engine and Nicolas-Joseph Cugnot built the first steam-powered automobile in 1769. A new era has begun with Elon Musk and the Tesla electric vehicle company that promises to diversify the world away from oil. But already Thomas Edison built an EV. We include some USA license plates but this is not an exhaustive work. The freedom of movement is cherished all over the World and we celebrate the automobile on this 4th of July 2023 and hope you will enjoy our selection of photos.

School Photos in Liquid Time Marianne Hirsch, Leo Spitzer, 2019-12-30 From clandestine images of Jewish children isolated in Nazi ghettos and Japanese American children incarcerated in camps to images of Native children removed to North American boarding schools, classroom photographs of schoolchildren are pervasive even in repressive historical and political contexts. *School Photos in Liquid Time* offers a closer look at this genre of vernacular photography, tracing how photography advances ideologies of social assimilation as well as those of hierarchy and exclusion. In Marianne Hirsch and Leo Spitzer's deft analysis, school photographs reveal connections between the histories of persecuted subjects in different national and imperial centers. Exploring what this ubiquitous and mundane but understudied genre tells us about domination as well as resistance, the authors examine school photos as documents of social life and agents of transformation. They place them in dialogue with works by contemporary artists who reframe, remediate, and elucidate them. Ambitious yet accessible, *School Photos in Liquid Time* presents school photography as a new access point into institutions of power, revealing the capacity of past and present actors to disrupt and reinvent them.

Tipping Point Anuradha Kalhan, 2023-04-03 This book sketches the history of political forces in modern India. It begins defining these political categories of left, right and far-right with the usual reference to French Revolution (for want of an indigenous equivalent), and discusses movement of forces towards left, or towards the right from the balance of socio-political forces or status quo at a point of time in India. It recalls historical facts, uses chronological order for clarity and leaders' names and political parties, their world view and ideas of nation, social groups they represented, and their movements. It progresses by reopening only a few windows to modern Indian history and looks at periods like, the 1920-30s, and 1970-80s, when there were significant movements and consolidation of socio-political forces to the right and far right. At the late 1960s and early 1970s, there were a series of policy proposals, legislations to nationalize assets and launch direct attacks on poverty that marked a sharp turn to the leftist ideology in Delhi (the central government of the time). Following these, a coalition of mostly right-wing forces rose to challenge the government at the centre and succeeded. This occurred in

the context of heated Cold War geopolitics. Taylor and Francis does not sell or distribute the print editions of this book in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Stealing All Transmissions Randal Doane, 2014-10-15 *Stealing All Transmissions* is a love story. It's the story of how The Clash fell in love with America, and how America loved them back. The romance began in full in 1977, when select rock journalists and deejays aided the band's quest to depose the rock of indolence that dominated American airwaves. This history situates The Clash amid the cultural skirmishes of the 1970s and culminates with their September 1979 performance at the Palladium in New York City. This concert was broadcast live on WNEW, and it concluded with Paul Simonon treating his Fender bass like a woodcutter's ax. This performance produced one of the most exhilarating Clash bootleg recordings, and the photo of Simonon's outburst which graced the cover of the *London Calling* LP was recently deemed the greatest rock'n'roll photograph of all time. That night marked one of the last opportunities for American audiences to see The Clash as a punk band, teetering between conviction and uncertainty, before they became a seriously brilliant rock group. *Stealing* represents a distinctive take on the history of punk, for no other book gives proper attention to the forces of free-form radio, long-form rock journalism, or Clash bootleg recordings, many of which are now widely available on the web. This story, which takes its title from the 1981 single "Radio Clash," includes original interviews with key figures from the New York punk scene. This secret history concludes with an analysis of how we listen to music today and its impact on the written word.

The Feminist Political Campaign for Eugenic Legislation in New Jersey, 1910-1942 Alan R. Rushton, 2023-01-12

As this book shows, between 1910 and 1942, social feminists in New Jersey waged an unsuccessful campaign for legislation that would permit eugenic sterilization of 'feeble-minded' and other 'undesirable' citizens. Church archives and religious periodicals described the conflict between Catholic and Protestant citizens regarding this issue. Reform-minded women persisted in their quest for such progressive state legislation despite repeated failures. Their number of potential voters was very small compared to the organized bloc of Catholic citizens who viewed such legislation as immoral and based on bad science, and threatened to unseat any legislator who supported such a notion. This insightful text highlights that public officials would only enact such laws when they were convinced that many citizens supported a particular eugenic goal and then would vote for legislators who satisfied this moral challenge. Public opinion was unprepared for such radical legislation in New Jersey, and legislators learned that to even consider a eugenic sterilization notion would be political suicide.
