Between The Land And The Sea Derrolyn Anderson,2011-03-30 Marina is a privileged girl who's had an unusual upbringing. Traveling the world with her scientist father, doted on by her wealthy and glamorous neighbor Evie, Marina's life seems perfect. Everything changes in the summer of her sixteenth year when she is sent to live with her Aunt Abby and Cousin Cruz in the lovely seaside town of Aptos, California. Only a few weeks after arriving, sixteen year-old Marina has nearly drowned twice, enchanted the hottest guy in high school, and discovered a supernatural creature. If she can manage to survive some increasingly dangerous encounters with unpredictable mermaids, she might be able to unlock the mystery of her past and appease the mysterious forces that want something from her...And maybe even find true love along the way.

San Diego's Sunset Cliffs Park: A History Kathy Blavatt,2020 Sunset Cliffs Park meanders along a mile and a half of San Diego's coastline, beckoning tourists and locals alike. These stunning cliffs inspired Albert Spalding, sportsman and visionary, to create a park in 1915 for all to enjoy. In the century since, many have left their mark, including the powerful Pacific Ocean. John Mills, an enterprising land baron, restored the original park, only to have it fall into neglect during the Depression and World War II. It became a popular spot for pioneering surfers and divers in the postwar boom, and the park's colorful landscape attracted artists and children. Join author Kathy Blavatt as she relates the many transformations of this beloved park and looks to its future.

A Salty Piece of Land Jimmy Buffett,2004-11-01 Wander to where the song of the ocean / Meets the salty piece of land with Tully Mars, washed up from Margaritaville and in the mood for monkeyshines, in a shimmering Caribbean epic by the late king of tropical rock, Jimmy Buffett. It's not on any chart, but the tropical island of Cayo Loco is the perfect place to run away from all your problems. Waking from a ganja buzz on the beach in Tulum, Tully can't believe his eyes when a 142-foot schooner emerges out of the ocean mist. At its helm is Cleopatra Highbourne, the eccentric 101-year-old sea captain who will take him to a lighthouse on a salty piece of land that will change his life forever. From a lovely sunset sail in Punta Margarita to a wild spring-break foam party in San Pedro, Tully encounters an assortment of treasure hunters, rock stars, sailors, seaplane pilots, pirates, and even a ghost or two.

Expedition Deep Ocean Josh Young,2020-12-01 The riveting story of the exploration of the final frontier of our planet—the deep ocean—and history-making mission to reach the bottom of all five seas. Humankind has explored every

continent on earth, climbed its tallest mountains, and gone into space. But the largest areas of our planet remain largely a mystery: the deep oceans. At over 36,000 feet deep, there areas closest to earth's core have remained nearly impossible to reach—until now. Technological innovations, engineering breakthroughs and the derring-do of a team of explorers, led by explorer Victor Vescovo, brought together an audacious global quest to dive to the deepest points of all five oceans for the first time in history. The expedition pushed technology to the limits, mapped hidden landscapes, discover previously unknown life forms and began to piece together how life in the deep oceans effects our planet—but it was far from easy. Expedition Deep Ocean is the inside story of this exploration of one of the most unforgiving and mysterious places on our planet, including the site of the Titanic wreck and the little-understood Hadal Zone. Vescovo and his team would design the most advanced deep-diving submersible ever built, where the pressure on the sub is 8 tons per square inch—the equivalent of having 292 fueled and fully loaded 747s stacked on top of it. And then there were hurricane-laden ocean waters and the byzantine web of global oceanography politics. Expedition Deep Ocean reveals the marvelous and other-worldly life found in all five deep ocean trenches, including several new species that have posed as of yet unanswered questions about survival and migration from ocean to ocean. Then there are the newly discovered sea mounts that cause tsunamis when they are broken by shifting subduction plates and jammed back into the earth crust, something that can now be studied to predict future disasters. Filled with high drama, adventure and the thrill of discovery, Expedition Deep Ocean celebrates courage and ingenuity and reveals the majesty and meaning of the deep ocean.

Ocean Beach: Where Land and Water Meet Kathy Blavatt ,2018 Water defines Ocean Beach by its unique location where the Pacific Ocean meets the mouth of the San Diego River, alongside Mission Bay, formerly known as False Bay, which connected to tidal marsh areas. The beach town's natural attractions and new prospects brought early settlers to Ocean Beach when it was established in 1887 by William Billy Carlson and Frank Huggins. Ocean Beach's landmass history is shaped and reshaped by major storms, wave and tidal surges, and droughts, which in turn transform the community's natural habitat, culture, and development. For example, the Ocean Beach Woman's Club's (OBWC) Flatiron Building, constructed on the shoreline, was destroyed by several storms from 1939 through 1941 and later removed, and the area where it once stood was turned into a park. The OBWC later moved its permanent headquarters away from the beach. The history and fabric of this unique ocean community is made up of an assortment of characters and spirited generations of individuals who have left their loving marks through their homes, gardens, businesses, stories, achievements, and community activities.

The Edge of the Sea Rachel Carson,1998 The edge of the sea is a strange and beautiful place. A book to be read for pleasure as well as a practical identification guide, *The Edge of the Sea* introduces a world of teeming life where the sea meets the land. A new generation of readers is discovering why Rachel Carson's books have become cornerstones of the environmental and conservation movements. New introduction by Sue Hubbell. (A Mariner Reissue)

Blue Mind Wallace J. Nichols, 2014-07-22 A landmark book by marine biologist Wallace J. Nichols on the remarkable effects of water on our health and well-being. Why are we drawn to the ocean each summer? Why does being near water set our minds and bodies at ease? In *BLUE MIND*, Wallace J. Nichols revolutionizes how we think about these questions, revealing the remarkable truth about the benefits of being in, on, under, or simply near water. Combining cutting-edge neuroscience with compelling personal stories from top athletes, leading scientists, military veterans, and gifted artists, he shows how proximity to water can improve performance, increase calm, diminish anxiety, and increase professional success. *BLUE MIND* not only illustrates the crucial importance of our connection to water-it provides a paradigm shifting blueprint for a better life on this Blue Marble we call home.

Maritime Spatial Planning Jacek Zaucha, Kira Gee, 2018-01-01 This book is open access under a CC BY 4.0 license Maritime or marine spatial planning has gained increasing prominence as an integrated, common-sense approach to promoting sustainable maritime development. A growing number of countries are engaged in preparing and implementing maritime spatial plans: however, questions are emerging from the growing body of MSP experience. How can maritime spatial planning deal with a complex and dynamic environment such as the sea? How can MSP be embedded in multiple levels of governance across regional and national borders – and how far does the environment benefit from this new approach? This open access book is the first comprehensive overview of maritime spatial planning. Situated at the intersection between theory and practice, the volume draws together several strands of interdisciplinary research, reflecting on the history of MSP as well as examining current practice and looking towards the future. The authors and contributors examine MSP from disciplines as diverse as geography, urban planning, political science, natural science, sociology and education; reflecting the growing critical engagement with MSP in many academic fields. This innovative and pioneering volume will be of interest and value to students and scholars of maritime spatial planning, as well as planners and practitioners. Jacek Zaucha is Professor of Economics at Gdansk University, Poland. He is long experienced in maritime spatial planning, and is currently leading the team preparing the first plan for Polish waters. Kira Gee is Research Associate at the Centre for Materials and Coastal Research (Helmholtz-Zentrum Geesthacht), Germany. She has been involved in MSP research and practice for over 20 years, and has participated in numerous national and transnational European MSP projects.

Australian Backyard Earth Scientist Peter Macinnis, 2019-02-01 Find out where rain comes from and what geysers look like! Read about soil becoming too salty and why greenhouse gases are increasing. Did you know that fog is a cloud sitting on the ground and that ice can tell you about the environment of millions of years ago? And what is lightning anyway? *Australian Backyard Earth Scientist* is full of fantastic photos and fascinating information that help explain different aspects of earth science - a science that discovered how old the Earth is, what fossils tell us, how mountains were created, what

causes earthquakes, what the difference between weather and climate is, and why glaciers are melting. From the beginnings of the planet through to climate change, 'Australian Backyard Earth Scientist' includes interesting and fun facts and projects help develop an understanding and appreciation - like making your own fossils, collecting cloud types, and using tree rings to find out about past weather. Young readers can discover the influences that have fashioned our earth - and are still acting to change it.

The Percy Jackson and the Olympians, Book Three: Titan's Curse Rick Riordan, 2007-05 In this third book of the acclaimed series, Percy and his friends are escorting two new half-bloods safely to camp when they are intercepted by a mantichore and learn that the goddess Artemis has been kidnapped.

The Summer Book Tove Jansson, 2022-04-14 Celebrating 50 years of Tove Jansson's classic, bestselling novel Featured in the BBC 2 Between the Covers Bookclub Special (Eurovision series 2023) 'Distills the essence of summer' Robert Macfarlane 'Magical, life-affirming' Elizabeth Gilbert The Worldwide Classic about a tiny island and larger love. An elderly artist and her six-year-old grand-daughter while away a summer together on a tiny island in the gulf of Finland. As the two learn to adjust to each other's fears, whims and yearnings, a fierce yet understated love emerges - one that encompasses not only the summer inhabitants but the very island itself. Written in a clear, unsentimental style, full of brusque humour, and wisdom, The Summer Book is a profoundly life-affirming story. Tove Jansson captured much of her own life and spirit in the book, which was her favourite of her adult novels. With a foreword by Esther Freud and an afterword by Sophia Jansson (on whom the child 'Sophia' is based) who returns to the island during the pandemic at the point of becoming a grandmother herself. Includes a 15pp epilogue by Tove's niece Sophia Jansson - the inspiration for 'Sophia' - on a personal and moving return to the island. 'Eccentric, funny, wise, full of joys and small adventures. This is a book for life.' Esther Freud 'Tove Jansson was a genius. This is a marvellous, beautiful, wise novel, which is also very funny.' Philip Pullman

Bodies of Water Astrida Neimanis, 2017-01-26 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Water is the element that, more than any other, ties human beings in to the world around them - from the oceans that surround us to the water that makes up most of our bodies. Exploring the cultural and philosophical implications of this fact, Bodies of Water develops an innovative new mode of posthuman feminist phenomenology that understands our bodies as being fundamentally part of the natural world and not separate from or privileged to it. Building on the works by Luce Irigaray, Maurice Merleau-Ponty and Gilles Deleuze, Astrida Neimanis's book is a landmark study that brings a new feminist perspective to bear on ideas of embodiment and ecological ethics in the posthuman critical moment.

Booker's Point Megan Grumbling, 2016-04-15 Bernard A. Booker, wry old Maine codger and unofficial mayor of Ell Pond, is the subject of Booker's Point, an oral history-inspired portrait-in-verse. Weaving storytelling, natural history, and the

poetry of place, the collection evokes the sensibility of rural New England and the pleasures of a good story. Grumbling is subtle, conjures the natural world richly and convincingly, and her subject matter is surprising and intriguing. I also admire how she handles meter.—Morri Creech, judge and author of *Sleep of Reason*

Church of the Wild Victoria Loorz, 2021-10-05 Once upon a time, humans lived in intimate relationship with nature. Whether disillusioned by the dominant church or unfulfilled by traditional expressions of faith, many of us long for a deeper spirituality. Victoria Loorz certainly did. Coping with an unraveling vocation, identity, and planet, Loorz turned to the wanderings of spiritual leaders and the sanctuary of the natural world, eventually cofounding the Wild Church Network and Seminary of the Wild. With an ecospiritual lens on biblical narratives and a fresh look at a community larger than our own species, *Church of the Wild* uncovers the wild roots of faith and helps us deepen our commitment to a suffering earth by falling in love with it--and calling it church. Through mystical encounters with wild deer, whispers from a scrubby oak tree, wordless conversation with a cougar, and more, Loorz helps us connect to a love that literally holds the world together--a love that calls us into communion with all creatures.

Where Sea Meets Sky Karina Halle, 2015-03-31 A new adult novel about an American who visits New Zealand and falls in love on his journey--

The Boundless Sea David Abulafia, 2019 David Abulafia's new book guides readers along the world's greatest bodies of water to reveal their primary role in human history. The main protagonists are the three major oceans--the Atlantic, the Pacific, and the Indian--which together comprise the majority of the earth's water and cover over half of its surface. Over time, as passage through them gradually extended and expanded, linking first islands and then continents, maritime networks developed, evolving from local exploration to lines of regional communication and commerce and eventually to major arteries. These waterways carried goods, plants, livestock, and of course people--free and enslaved--across vast expanses, transforming and ultimately linking irrevocably the economies and cultures of Africa, Europe, Asia, and the Americas--

Madd Inlet Tim Swink, 2022-03-07 Tim Swink is "a very good storyteller... and that's rare!" —Chuck Adams, former Executive Editor at Algonquin Books In 1969, during the crux of the Vietnam war, Jack Tagger is on the run. As the war in Southeast Asia rages on, he has made the moral decision to resist the draft. In his effort to avoid the authorities and the war, he seeks refuge on a desolate coastal barrier island where unbeknownst to him, while avoiding one war, he finds himself unwittingly caught in the middle of another deadly land-war between two very powerful men at Sunset Beach, North Carolina. When a native American shaman summons the spirit of an innocent victim of that conflict, Jack is again forced to make a potentially lethal choice between good and evil and he learns that, like *Madd Inlet*, what runs smooth and meandering on top does not always belie what runs just beneath the surface. *Madd Inlet* is perfect for fans of Nicolas Sparks'

Every Breath and Delia Owens' Where the Crawdads Sing.

Lands of Lost Borders Kate Harris, 2018-01-30 NATIONAL BESTSELLER WINNER OF THE RBC TAYLOR PRIZE WINNER OF THE EDNA STAEBLER AWARD FOR CREATIVE NON-FICTION Every day on a bike trip is like the one before--but it is also completely different, or perhaps you are different, woken up in new ways by the mile. As a teenager, Kate Harris realized that the career she most craved--that of a generalist explorer, equal parts swashbuckler and philosopher--had gone extinct. From her small-town home in Ontario, it seemed as if Marco Polo, Magellan and their like had long ago mapped the whole earth. So she vowed to become a scientist and go to Mars. To pass the time before she could launch into outer space, Kate set off by bicycle down a short section of the fabled Silk Road with her childhood friend Mel Yule, then settled down to study at Oxford and MIT. Eventually the truth dawned on her: an explorer, in any day and age, is by definition the kind of person who refuses to live between the lines. And Harris had soared most fully out of bounds right here on Earth, travelling a bygone trading route on her bicycle. So she quit the laboratory and hit the Silk Road again with Mel, this time determined to bike it from the beginning to end. Like Rebecca Solnit and Pico Iyer before her, Kate Harris offers a travel narrative at once exuberant and meditative, wry and rapturous. Weaving adventure and deep reflection with the history of science and exploration, *Lands of Lost Borders* explores the nature of limits and the wildness of a world that, like the self and like the stars, can never be fully mapped.

The Life and Letters of William Sharp and "Fiona Macleod". Volume 3: 1900-1905 William F.

Halloran, 2020-09-28 What an achievement! It is a major work. The letters taken together with the excellent introductory sections - so balanced and judicious and informative - what emerges is an amazing picture of William Sharp the man and the writer which explores just how fascinating a figure he is. Clearly a major reassessment is due and this book could make it happen. —Andrew Hook, Emeritus Bradley Professor of English and American Literature, Glasgow University William Sharp (1855-1905) conducted one of the most audacious literary deceptions of his or any time. Sharp was a Scottish poet, novelist, biographer and editor who in 1893 began to write critically and commercially successful books under the name Fiona Macleod. This was far more than just a pseudonym: he corresponded as Macleod, enlisting his sister to provide the handwriting and address, and for more than a decade Fiona Macleod duped not only the general public but such literary luminaries as William Butler Yeats and, in America, E. C. Stedman. Sharp wrote I feel another self within me now more than ever; it is as if I were possessed by a spirit who must speak out. This three-volume collection brings together Sharp's own correspondence - a fascinating trove in its own right, by a Victorian man of letters who was on intimate terms with writers including Dante Gabriel Rossetti, Walter Pater, and George Meredith - and the Fiona Macleod letters, which bring to life Sharp's intriguing second self. With an introduction and detailed notes by William F. Halloran, this richly rewarding

collection offers a wonderful insight into the literary landscape of the time, while also investigating a strange and underappreciated phenomenon of late-nineteenth-century English literature. It is essential for scholars of the period, and it is an illuminating read for anyone interested in authorship and identity.
