The Trees of San Francisco Michael Sullivan, 2013-10-21 Trees of San Francisco introduces readers to the rich variety of trees that thrive in San Francisco's unique conditions. San Francisco's cool Mediterranean climate has made it home to interesting and unusual trees from all over the world - trees as colorful and exotic as the city itself. This new guide combines engaging descriptions of sixty-five different trees with color photos that reflect the visual appeal of San Francisco. Each page covers a different tree, with several paragraphs of interesting text accompanied by one or two photos. Each entry for a tree also lists locations where landmark specimens of the tree can be found. Interspersed throughout the book are sidebar stories of general interest related to San Francisco's trees. Trees of San Francisco also includes a dozen tree tours that will link landmark trees and local attractions in interesting San Francisco neighborhoods such as the Castro, Pacific Heights and the Mission - walks that will appeal to tourists as well as Bay Area natives.

Stone Tree Gyrðir Eliasson, 2013-12-03 ** WINNER OF THE 2011 NORDIC COUNCIL LITERATURE PRIZE** Gyrðir Eliasson's stories take us out of ourselves. Situated on the lonely western shores of Iceland, or out in the vast mountain ranges or barren lava fields of this spectacular country, each one is a study in self-exile. We follow a Boston ornithologist, speeding through the landscape in a fourby-four, chasing Arctic Terns; a schoolboy relocating to the northernmost town of Siglufjörður to compete in a chess tournament; a husband packing his wife off to visit her aunt in Sweden. In almost every story we find people taking leave of their normal lives in order to take their dreams more seriously. But even in the most desolate surroundings Eliasson's characters find strange company; ghostly presences in the early hours, enviable neighbours, fellow writers turning up at the same retreat, with the same ambitions. Like the wide canopy of stars under which they're told, these stories plot a constellation of single, glittering images: a child defacing a new piano with a chisel in the middle of the night; a freezer packed with carefully wrapped dead birds, candles floating in a pond at night... Eliasson's images are always unresolved, but are also somehow complete; like the dreams he shares with us, that lead us, through their own solitude, into other people's. As Eliasson writes, 'all dreams are joined at the edges, like the squares in a patchwork quilt.'

Leaves & Pods Josie Iselin, 2006-09-01 Photographer Josie Iselin celebrates the diversity and beauty of these transitory objects with lushly detailed portraits of foliage she has gathered. She arranges natural objects into striking images, which she produces on a flatbed scanner. In her introduction and captions, nature writer Mary Ellen Hannibal thoughtfully

examines leaves and pods in all their variety, explaining why they look as they do and their essential role in supporting life on earth.

Food and Climate Change without the hot air S L Bridle,2020-09-03 Did you know that more than a quarter of the greenhouse-gas emissions that cause climate change come from food? In this ground-breaking and accessible book, Professor Sarah Bridle calculates the greenhouse gas emissions of a selection of our most popular meals and beverages, from a cup of tea and a bowl of cereal to spaghetti bolognese and chicken tikka masala. Breaking down different ingredients and cooking methods to reveal their environmental impact, she finds delicious and sustainable meal alternatives. With this knowledge, we can make a conscious effort to lower our emissions, such as eating more locally grown produce and introducing meat-free days, enabling us to help our planet while also eating healthier food. As well as explaining how our food choices impact the environment and giving practical advice on how to lower emissions, Food and Climate Change without the hot air considers how climate change will affect the food of the future. A rigorously researched discussion of how food and climate change are intimately connected, Bridle also dives into the important topic of food waste and gives valuable tips to avoid leftovers. Illustrated in full colour throughout, this is an essential resource for anyone with eco-anxiety looking for quick and easy ideas to become more sustainable.

A Stone for Sascha Aaron Becker,2020-12-01 A girl grieves the loss of her dog in an achingly beautiful wordless epic from the Caldecott Honor-winning creator of *Journey*. This year's summer vacation will be very different for a young girl and her family without Sascha, the beloved family dog, along for the ride. But a wistful walk along the beach to gather cool, polished stones becomes a brilliant turning point in the girl's grief. There, at the edge of a vast ocean beneath an infinite sky, she uncovers, alongside the reader, a profound and joyous truth. In his first picture book following the conclusion of his best-selling *Journey* trilogy, Aaron Becker achieves a tremendous feat, connecting the private, personal loss of one child to a cycle

spanning millennia — and delivering a stunningly layered tale that demands to be pored over again and again.

Flora of the Codex Cruz-Badianus Arthur O. Tucker, Jules Janick, 2020-10-09 In 1929, Charles Upson Clark (1875-1960), a history Professor at Columbia University carrying out bibliographic research on the early history of the Americas in the Vatican Library, came across a remarkable illustrated Latin manuscript entitled *Libellus de Medicinalibus Indorum Herbis* (Little Book of Indian Medicinal Herbs) completed in 1552. The manuscript now known as the Codex Cruz-Badianus (CCB) contained 185 illustrations (phytomorphs) of plants with text that described their medicinal uses. This manuscript spread new light on botanical and medicinal knowledge of the indigenous peoples of Mexico known today as the Nahuas or Aztecs. It was to have major repercussions on our knowledge of Aztec culture and the history of New Spain in the 16th century. CCB was produced at the Colegio of Imperial de Santa Cruz at Tlatelolco established in 1536 to train sons of the Aztec nobility for the clergy. The authors were two indigenous faculty members, Martin (Martinus in Latin) de la Cruz and Juan Badiano (Juannes Badianus in Latin) whose Spanish names were conferred upon their baptism. Martin de la Cruz was the Colegio's indigenous doctor who gave instruction in medicine and Juan Badiano, a Latin teacher and former student translated the book into Latin. The herbal dedicated to the Viceroy Francisco de Mendoza was sent to Spain as a gift to King Carlos I soon after its completion in 1552. The original ended up in the Vatican Library until 1990 when John Paul II returned it to Mexico. In 1931, the Mayanist scholar, William Gates, and the biologist Emily Walcott Emmart became aware of the manuscript and independently translated it to English. In 2009, Martin Clayton, Luigi Guerrini, and Alejandro de Avila identified plants of the CCB based on Emmart's book and a 17th century copy found in the Windsor library. Of the 185 phytomorphs, Gates identified 85 on the generic level, Emmart 9, and Clayton et al. 126. However most of these identifications disagree. In the present work, 183 of 185 phytomorphs are systematically re-evaluated and identified on the generic, as well as specific level, along with their botanical descriptions, previous identifications, putative identification, distribution, names, and uses.
