*Newark* Jean-Rae Turner, Richard T. Koles, Charles F. Cummings, 2003 New Year's Day 1900 heralded the beginning of Newark's Golden Age-the heyday of the city's diverse population, beautiful mansions, varied industries, and prosperous insurance, leather, and jewelry companies. Newark's crystal-clear water attracted some thirty-five breweries, including P. Ballantine & Sons and Hensler's. Frederick Law Olmsted developed Branch Brook Park, the first county park in the United States. Transportation for industrial and personal use was booming, with barges, ships, trains, and trolleys running continually. Called the City of Churches, Newark became known for the numerous houses of worship used by its residents. Educational institutions grew, paving the way for the many schools and colleges in existence today. *Newark: The Golden Age* explores New Jersey's largest city through rare vintage postcard views that will captivate residents and visitors alike.

**Newark Airport** Henry M. Holden, 2009 Newark Airport was the first major airport in the New York metropolitan area. It opened on October 1, 1928, occupying an area of filled-in marshland. In 1935, Amelia Earhart dedicated the Newark Airport Administration Building, which was North America's first commercial airline terminal. Newark was the busiest airport in the world until LaGuardia Airport, in New York, opened in 1939. During World War II, Newark was closed to passenger traffic and controlled by the United States Army Air Force for logistics operations. The Port Authority of New York took over the airport in 1948 and made major investments in airport infrastructure. It expanded, opened new runways and hangars, and improved the airport's terminal layout. The art deco administration building served as the main terminal until the opening of the North Terminal in 1953. The administration building was added to the National Register of Historic Places in 1979.

**Historic Photos of Newark** Sharon Hazard, Elizabeth Hazard, 2009 Founded in 1666 along the Passaic River by Puritans arriving from the New Haven colony farther east, Newark emerged in the nineteenth century at the forefront of industry and commerce. Benefiting from the Morris Canal, leather tanneries, breweries, banking, insurance, and other enterprises, the city attracted the best and the brightest, among them patent leather inventor Seth Boyden, voltmeter inventor Edward Weston, and a young Thomas Edison, who established a manufacturing plant in the city for his improved telegraph. *Historic Photos of Newark* is a pictorial journey through time that traces the story of this great American city, from the early days of photography in the 1860s to the postwar era immediately following World War II. Reproduced in vivid black-and-white, nearly 200 photographs, each one captioned and with introductions, offer unforgettable vignettes of the city and its citizens

as Newark navigated good times and bad over these defining and monumental decades.

**Branch Brook Park** Kathleen P. Galop, Catharine Longendyck, 2007-08-01 Branch Brook Park, located in Newark, was America's first county park. The park was established in 1895 as the cornerstone of the Essex County Park System. The vision for Branch Brook Park came in 1867, when Newark park commissioners retained Olmsted, Vaux, and Company to identify a site for a park in the city. That vision matured into a reality that is now, 140 years later, woven into the urban experience of Newark and its neighboring towns. The significance of Branch Brook Park has been nationally recognized with its placement on the New Jersey and National Registers of Historic Places. Home to the Newark Cherry Blossom Festival, organized long-distance runs and bicycle races, picnics, the Chrysanthemum Show, the New Jersey Symphony Under the Stars, boating on the lake, prom pictures, and sports activities from baseball to bocce to soccer and tennis, Branch Brook Park remains a constant source of great beauty.

**Putting the Children First** Jonathan G. Silin, Carol Lippman, 2003-01-01 Putting the Children First chronicles the educational struggle that took place in the city of Newark amidst years of political upheaval and economic neglect. It is a story of inspiration and hope as we come to understand what happened when educators, parents, and community members pulled together to turn education around in one of the most historically troubled cities in America. This volume tells the remarkable story of Project New Beginnings, a 7-year collaboration between the Newark Public Schools and Bank Street College to restructure early childhood education. Reporting from the front lines of urban schools, this important volume: gives voice to the variety of people involved in effective school reform-- teachers, principals, staff developers, superintendents, and foundation executives; illustrates how one school-change project kept its focus on the needs of individual teachers and classrooms while negotiating the many demands in contemporary urban schools; and confronts the difficult constraints and many hurdles the Project overcame to emerge as a model for school-university collaboration.

**Inside Newark** Robert Curvin, 2014-07-09 For decades, leaders in Newark, New Jersey, have claimed their city is about to return to its vibrant past. How accurate is this prediction? Is Newark on the verge of revitalization? Robert Curvin, who was one of New Jersey's outstanding civil rights leaders, examines the city, chronicling its history, politics, and culture. Throughout the pages of Inside Newark, Curvin approaches his story both as an insider who is rooting for Newark and as an objective social scientist illuminating the causes and effects of sweeping changes in the city Based on historical records and

revealing interviews with over one hundred residents and officials, *Inside Newark* traces Newark's history from the 1950s, when the city was a thriving industrial center, to the era of Mayor Cory Booker. Along the way, Curvin covers the disturbances of July 1967, called a riot by the media and a rebellion by residents; the administration of Kenneth Gibson, the first black mayor of a large northeastern city; and the era of Sharpe James, who was found guilty of corruption. Curvin examines damaging housing and mortgage policies, the state takeover of the failing school system, the persistence of corruption and patronage, Newark's shifting ethnic and racial composition, positive developments in housing and business complexes, and the reign of ambitious mayor Cory Booker. *Inside Newark* reveals a central weakness that continues to plague Newark—that throughout this history, elected officials have not risen to the challenges they have faced. Curvin calls on those in positions of influence to work for the social and economic improvement of all groups and concludes with suggestions for change, focusing on education reform, civic participation, financial management, partnerships with agencies and business, improving Newark's City Council, and limiting the term of the mayor. If Newark's leadership can encompass these changes, Newark will have a chance at a true turnaround. Watch a video with Robert Curvin: Watch video now. (<http://www.youtube.com/watch?v=v-d6zV2OQ8A>).

*Into the Breach* J. A. Karam, 2010-04-01 *Into the Breach* is the true story of paramedics, emergency medical technicians, and heavy-rescue specialists fighting to control trauma and medical emergencies in one of America's toughest and most violent cities: Newark, New Jersey. A riveting account that hauls readers on a first-hand tour of street medicine today, *Into the Breach* shows what really happens inside an ambulance and some of the diverse and bizarre places EMS workers tread. Through authentic accounts, every facet of emergency care is on display—from the first 911 call to patient discharge or death, including an exclusive look at what is perhaps the biggest decontamination operation ever conducted, which crews performed for victims of the September 11, 2001 terrorist attack. A hybrid profession that blends public safety and public health, EMS attracts careerists and volunteers from all sectors of society—from Boy Scouts and housewives to Fortune 500 vice presidents and work-fare recipients. The men and women that make up the Newark EMS graveyard shift, one of the busiest, full-time teams in the nation, are quintessential EMS workers: intense, irreverent, hard-working action junkies who crave autonomy and the instant gratification of solving critical problems in real time. This unflinching profile hones in on award-winning EMS workers as well as those who pollute the industry, ironically, sometimes one and the same. *Into the Breach* offers an unusual opportunity to bear witness to unimaginable suffering, heroic stoicism, and the inventiveness of American EMS workers fighting to save lives.

Life as a Slave Richard Worth, 2016-07-15 This fascinating volume explores everyday life for slaves in America. Readers will learn about the various duties that slaves were responsible for conducting, their relationships with their masters, and the ways they found to cope with the humiliating and demoralizing lives they were captured into. Contextual information about

how the practice of slavery began, how slaves contributed to the southern economy, and how the institution was finally destroyed rounds out this informative resource.

**Jews of Weequahic** Linda B. Forgosh, 2008 Known as Newark's Jewish Frontier, Weequahic was home to 35,000 Jewish residents from the 1930s to the 1960s. Homes built on farm lots, known as Lyons Farms, attracted the city's upwardly mobile Jewish families. Weequahic High School still remains at the heart of the community, drawing generations of alumni for annual reunions and events. Pulitzer Prize-winning author Philip Roth, a Weequahic High School graduate, found inspiration in the community, documenting its intricacies in his work. The high school still houses a mural, *The Enlightenment of Man*, painted by New Deal painter Michael Lenson. This mural is regarded as one of the most important pieces of public art in the state. *Jews of Weequahic* captures the life of this vibrant community that has become one of Newark's legendary neighborhoods.

**Forest and Rangeland Soils of the United States Under Changing Conditions** Richard V. Pouyat, Deborah S. Page-Dumroese, Toral Patel-Weynand, Linda H. Geiser, 2020-09-02 This open access book synthesizes leading-edge science and management information about forest and rangeland soils of the United States. It offers ways to better understand changing conditions and their impacts on soils, and explores directions that positively affect the future of forest and rangeland soil health. This book outlines soil processes and identifies the research needed to manage forest and rangeland soils in the United States. Chapters give an overview of the state of forest and rangeland soils research in the Nation, including multi-decadal programs (chapter 1), then summarizes various human-caused and natural impacts and their effects on soil carbon, hydrology, biogeochemistry, and biological diversity (chapters 2-5). Other chapters look at the effects of changing conditions on forest soils in wetland and urban settings (chapters 6-7). Impacts include: climate change, severe wildfires, invasive species, pests and diseases, pollution, and land use change. Chapter 8 considers approaches to maintaining or regaining forest and rangeland soil health in the face of these varied impacts. Mapping, monitoring, and data sharing are discussed in chapter 9 as ways to leverage scientific and human resources to address soil health at scales from the landscape to the individual parcel (monitoring networks, data sharing Web sites, and educational soils-centered programs are tabulated in appendix B). Chapter 10 highlights opportunities for deepening our understanding of soils and for sustaining long-term ecosystem health and appendix C summarizes research needs. Nine regional summaries (appendix A) offer a more detailed look at forest and rangeland soils in the United States and its Affiliates.

**Bloomfield** Frederick Branch, Jean Kuras, Mark Scurman, 2001 Founded in pre-Revolutionary days, Bloomfield encompassed over twenty miles of Essex County in the early 1800s. The neighboring towns of Nutley, Belleville, North Newark, Montclair, and Glen Ridge were once a part of the Bloomfield landscape. After divisions of the land developed new communities, Bloomfield was left with little more than five miles. When the Morris Canal was dug through the middle of

Bloomfield in 1824, industrial and residential growth strengthened and the town became the hub of Essex County commerce and manufacturing. Bloomfield continued its reputation as a progressive community for the next 150 years. The photographs in Bloomfield capture the essence of a community with small-town values and working-class ethics. From the earliest tintypes to the planting of a time capsule, the lives and times of people and events that shaped the town are captured here for the first time, with many never-before-published photographs. Images such as those of inventor Thomas Edison, President Woodrow Wilson, and landscape painter Charles Warren Eaton make Bloomfield a delight for all past and present residents of this American hometown.

Nazis in Newark Warren Grover, 2017-09-29 Well researched, readable, and very interesting --Choice Nazis in Newark is a model local history that reaches well beyond the border of Essex County, New Jersey, to the national and international arenas. By recounting so many sides of the complicated encounter between Nazis and Jews in Newark, Warren Grover has fashioned a world of street politics, boycotts, Nazi louts and Jewish bruisers that is as compelling and telling in its detail as any grand tome on the supposed failures and successes of American Jewish resistance to the Holocaust... I recommend Nazis in Newark. I intend to use it as a cornerstone of my teaching for some time to come. --Professor Michael Alexander The Jewish Quarterly Review Very few people today realize that the U.S. mainland was the scene of battles against the Nazis. Warren Grover has produced an outstanding work on this subject. The writing is incisive, the ideas are both original and insightful and the thesis masterfully developed and executed. Must reading for anyone interested in American history and ethnic studies. --William B. Helmreich, CUNY Graduate Center and author of The Enduring Community Thanks to tenacious research and deft story-telling, Warren Grover has put the politics of extremism in one city in the shadow of Fascism, Nazism and Communism, and has thus illuminated the terrible dilemmas of the 1930s. His book also compels the reader to consider an historical anomaly: champions of the Third Reich come across as victims whose civil liberties were infringed, and the gangs of Newark responsible for these violations tended to be Jewish. Such ironies make Nazis in Newark worth the interest of anyone intrigued by ethnic conflict and political violence in urban America. --Stephen Whitfield, Max Richter Professor of American Civilization, Brandeis University In this fast-paced, thorough study of anti-Nazism in Newark, scholar Warren Grover tells th

**Waging War** Wayne E. Lee, 2016 Waging War: Conflict, Culture, and Innovation in World History provides a wide-ranging examination of war in human history, from the beginning of the species until the current rise of the so-called Islamic

State. Although it covers many societies throughout time, the book does not attempt to tell all stories from all places, nor does it try to narrate important conflicts. Instead, author Wayne E. Lee describes the emergence of military innovations and systems, examining how they were created and then how they moved or affected other societies. These innovations are central to most historical narratives, including the development of social complexity, the rise of the state, the role of the steppe horseman, the spread of gunpowder, the rise of the west, the bureaucratization of military institutions, the industrial revolution and the rise of firepower, strategic bombing and nuclear weapons, and the creation of people's war.

**Made in Newark** Ezra Shales, 2010 What does it mean to turn the public library or museum into a civic forum? *Made in Newark* describes a turbulent industrial city at the dawn of the twentieth century and the ways it inspired the library's outspoken director, John Cotton Dana, to collaborate with industrialists, social workers, educators, and New Women. This is the story of experimental exhibitions in the library and the founding of the Newark Museum Association—a project in which cultural literacy was intertwined with civics and consumption. Local artisans demonstrated crafts, connecting the cultural institution to the department store, school, and factory, all of which invoked the ideal of municipal patriotism. Today, as cultural institutions reappraise their relevance, *Made in Newark* explores precedents for contemporary debates over the ways the library and museum engage communities, define heritage in a multicultural era, and add value to the economy.
