Animals and their Relation to Gods, Humans and Things in the Ancient World Raija Mattila, Sanae Ito, Sebastian Fink, 2019-03-11 While Human-Animal Studies is a rapidly growing field in modern history, studies on this topic that focus on the Ancient World are few. The present volume aims at closing this gap. It investigates the relation between humans, animals, gods, and things with a special focus on the structure of these categories. An improved understanding of the ancient categories themselves is a precondition for any investigation into the relation between them. The focus of the volume lies on the Ancient Near East, but it also provides studies on Ancient Greece, Asia Minor, Mesoamerica, the Far East, and Arabia.

The World's Greatest Unsolved Crimes VARIOS AUTORES, Nigel Blundell, Roger Boar, 2012 This book reveals the astonishing, known facts about real acts of villainy...and it probes the fascinating, missing facts that confound the law and are kept in a file marked 'unsolved'.

Marshal K.K. Rokossovsky Boris Sokolov, 2015-03-19 The author Boris Sokolov offers this first objective and intriguing biography of Marshal Konstantin Konstantinovich Rokossovsky, who is widely considered one of the Red Army's top commanders in the Second World War. Yet even though he brilliantly served the harsh Stalinist system, Rokossovsky himself became a victim of it with his arrest, beatings and imprisonment between 1937 and 1940. The author analyzes all of Rokossovsky's military operations, in both the Russian Civil War and the Second World War, paying particular attention to the problem of establishing the real casualties suffered by both armies in the main battles where Rokossovsky took part, as well as on the Eastern Front as a whole. Rokossovsky played a prominent role in the battles for Smolensk, Moscow, Stalingrad, Kursk, Belorussia, Poland, East Prussia and Pomerania. While praising Rokossovsky's masterful generalship, the author does not shy away from criticizing the nature of Soviet military art and strategy, in which the guiding principle was at all costs and little value was placed on holding down casualties. This discussion extends to the painful topic of the many atrocities against civilians perpetrated by Soviet soldiers, including Rokossovsky's own troops. A highly private man, Rokossovsky disliked discussing his personal life. With the help of family records and interviews, including the original, uncensored draft of the Marshal's memoirs, the author reveals the numerous dualities in Rokossovsky's life. Despite his imprisonment and beatings he endured, Rokossovsky never wavered in his loyalty to Stalin, yet also never betrayed his colleagues. Though a Stalinist, he was also a gentleman widely admired for his courtesy and chivalry. A dedicated family

man, women were drawn to him, and he took a 'campaign wife' during the war. Though born in 1894 in Poland, Rokossovsky maintained that he was really born in Russia in 1896. This Polish/Russian duality in Rokossovsky's identity hampered his career and became particularly acute during the Warsaw uprising in 1944 and his later service as Poland's Defense Minister. Thus, the author ably portrays a fascinating man and commander, who became a marshal of two countries, yet who was not fully embraced by either.

Competitive Authoritarianism Steven Levitsky, Lucan A. Way, 2010-08-16 Based on a detailed study of 35 cases in Africa, Asia, Latin America, and post-communist Eurasia, this book explores the fate of competitive authoritarian regimes between 1990 and 2008. It finds that where social, economic, and technocratic ties to the West were extensive, as in Eastern Europe and the Americas, the external cost of abuse led incumbents to cede power rather than crack down, which led to democratization. Where ties to the West were limited, external democratizing pressure was weaker and countries rarely democratized. In these cases, regime outcomes hinged on the character of state and ruling party organizations. Where incumbents possessed developed and cohesive coercive party structures, they could thwart opposition challenges, and competitive authoritarian regimes survived; where incumbents lacked such organizational tools, regimes were unstable but rarely democratized.

War and Revolution in the Caucasus Stephen F. Jones, 2013-09-13 The South Caucasus has traditionally been a playground of contesting empires. This region, on the edge of Europe, is associated in Western minds with ethnic conflict and geopolitical struggles in August 2008. Yet, another war broke out in this distant European periphery as Russia and Georgia clashed over the secessionist territory of South Ossetia. The war had global ramifications culminating in deepening tensions between Russia on the one hand, and Europe and the USA on the other. Speculation on the causes and consequences of the war focused on Great Power rivalries and a new Great Game, on oil pipeline routes, and Russian imperial aspirations. This book takes a different tack which focuses on the domestic roots of the August 2008 war. Collectively the authors in this volume present a new multidimensional context for the war. They analyse historical relations between national minorities in the region, look at the link between democratic development, state-building, and war, and explore the role of leadership and public opinion. Digging beneath often simplistic geopolitical explanations, the authors give the national minorities and Georgians themselves, the voice that is often forgotten by Western analysts. This book was based on a special issue of

Central Asian Survey.

Dancing Naked in the Mind Field Kary Mullis,2010-11-17 Here is a multidimensional playland of ideas from the world's most eccentric Nobel-Prize winning scientist. Kary Mullis is legendary for his invention of PCR, which redefined the world of DNA, genetics, and forensic science. He is also a surfer, a veteran of Berkeley in the sixties, and perhaps the only Nobel laureate to describe a possible encounter with aliens. A scientist of boundless curiosity, he refuses to accept any proposition based on secondhand or hearsay evidence, and always looks for the money trail when scientists make announcements. Mullis writes with passion and humor about a wide range of topics: from global warming to the O. J. Simpson trial, from poisonous spiders to HIV, from scientific method to astrology. *Dancing Naked in the Mind Field* challenges us to question the authority of scientific dogma even as it reveals the workings of an uncannily original scientific mind.

Absolute War Chris Bellamy,2008-11-26 In *Absolute War*, acclaimed historian and journalist Chris Bellamy crafts the first full account since the fall of the Soviet Union of World War II's battle on the Eastern Front, one of the deadliest conflicts in history. The conflict on the Eastern Front, fought between the Soviet Union and Nazi Germany between 1941 and 1945, was the greatest, most costly, and most brutal conflict on land in human history. It was arguably the single most decisive factor of the war, and shaped the postwar world as we know it. In this magisterial work, Bellamy outlines the lead-up to the war, in which the fragile alliance between the two dictators was unceremoniously broken, and examines its far-reaching consequences, arguing that the cost of victory was ultimately too much for the Soviet Union to bear. With breadth of scope and a surfeit of new information, this is the definitive history of a conflict whose reverberations are still felt today.

The Death Penalty Roger Hood,Carolyn Hoyle,2015 The fifth edition of this highly praised study charts and explains the progress that continues to be made towards the goal of worldwide abolition of the death penalty. The majority of nations have now abolished the death penalty and the number of executions has dropped in almost all countries where abolition has not yet taken place. Emphasizing the impact of international human rights principles and evidence of abuse, the authors examine how this has fueled challenges to the death penalty and they analyze and appraise the likely obstacles, political and cultural, to further abolition. They discuss the cruel realities of the death penalty and the failure of international standards always to ensure fair trials and to avoid arbitrariness, discrimination and conviction of the innocent: all violations of the right to life. They provide further evidence of the lack of a general deterrent effect; shed new light on the influence and limits of public opinion; and argue that substituting for the death penalty life imprisonment without parole raises many similar human rights concerns. This edition provides a strong intellectual and evidential basis for regarding capital punishment as undeniably cruel, inhuman and degrading. Widely relied upon and fully updated to reflect the current state of affairs worldwide, this is an invaluable resource for all those who study the death penalty and work towards its removal as an international goal.

Human and Animal in Ancient Greece Tua Korhonen,Erika Ruonakoski,2017-03-30 Animals were omnipresent in the everyday life and the visual arts of classical Greece. In literature, too, they had significant functions.This book discusses the role of animals - both domestic and wild - and mythological hybrid creatures in ancient Greek literature. Challenging the traditional view of the Greek anthropocentrism, the authors provide a nuanced interpretation of the classical relationship to

animals. Through a close textual analysis, they highlight the emergence of the perspective of animals in Greek literature. Central to the book's enquiry is the question of empathy: investigating the ways in which ancient Greek authors invited their readers to empathise with non-human counterparts. The book presents case studies on the animal similes in the Iliad, the addresses to animals and nature in Sophocles' Philoctetes, the human-bird hybrids in The Birds by Aristophanes and the animal protagonists of Anyte's epigrams. Throughout, the authors develop an innovative methodology that combines philological and historical analysis with a philosophy of embodiment, or phenomenology of the body. Shedding new light on how animals were regarded in ancient Greek society, the book will be of interest to classicists, historians, philosophers, literary scholars and all those studying empathy and the human-animal relationship.

Emperor Hirohito and Showa Japan Stephen Large, 2013-01-11 Emperor Hirohito reigned for more than sixty years, yet we know little about him or the part he really played in the turbulent history of Showa Japan. Stephen Large draws on a wide range of Japanese and Western sources in his study of Emperor Hirohito's political role in Showa Japan (1926-89). This analysis focuses on key events in his career such as the extent to which he bore responsibility for Japanese aggression in the Pacific in 1941, and explains why Hirohito remains such a contested symbol in Japanese post war politics.
