Before I Die Candy Chang, 2013-11-05 After losing someone she loved, artist Candy Chang painted the side of an abandoned house in her New Orleans neighborhood with chalkboard paint and stenciled the sentence, Before I die I want to _____. Within a day of the wall's completion, it was covered in colorful chalk dreams as neighbors stopped and reflected on their lives. Since then, more than four hundred Before I Die walls have been created by people all over the world. This beautiful hardcover book is an inspiring celebration of these walls and the stories behind them. Filled with hope, fear, humor, and heartbreak, Before I Die presents an intimate portrait of the dreams within our communities and a chance to ponder life's ultimate question.

Die Empty Todd Henry, 2015-04-28 "A must-read for anyone interested in moving from inspiration to action." —Cal Newport, author of *So Good They Can't Ignore You* Most of us fill our days with frantic activity, bouncing from task to task, scrambling to make deadlines and chase the next promotion. But by the end of each day we're often left wondering if any of it really mattered. We feel the ticking of the clock, but we're unsure of the path forward. *Die Empty* is a tool for people who aren't willing to put off their most important work for another day. Todd Henry explains the forces that lead to stagnation and introduces practices that will keep you on a true and steady course. The key is embracing the idea that time is finite, so you should focus on the unique contribution to the world that only you can make. Henry shows how to sustain your enthusiasm, push through mental barriers, and unleash your best work each day.

Generative Art Matt Pearson, 2011-06-29 Summary Generative Art presents both the technique and the beauty of algorithmic art. The book includes high-quality examples of generative art, along with the specific programmatic steps author and artist Matt Pearson followed to create each unique piece using the Processing programming language. About the Technology Artists have always explored new media, and computer-based artists are no exception. Generative art, a technique where the artist creates print or onscreen images by using computer algorithms, finds the artistic intersection of programming, computer graphics, and individual expression. The book includes a tutorial on Processing, an open source programming language and environment for people who want to create images, animations, and interactions. About the Book Generative Art presents both the techniques and the beauty of algorithmic art. In it, you'll find dozens of high-quality examples of generative art, along with the specific steps the author followed to create each unique piece using the

Processing programming language. The book includes concise tutorials for each of the technical components required to create the book's images, and it offers countless suggestions for how you can combine and reuse the various techniques to create your own works. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book. What Do You Want to Do Before You Die? The Buried Life, 2012-03-27 An illustrated selection of answers to the title's question, submitted online and collected by Ben Nemtin, Dave Lingwood, Duncan Penn and Jonnie Penn, collectively known as The Buried Life and featured in the MTV reality television series of the same name. Some answers include essays relating how the online submissions were accomplished. Also included are brief essays on how the four young men accomplished some of their lists' tasks and their experiences helping others complete their lists.

Classroom Portraits Julian Germain, 2012 This captivating collection of large-scale portraits of classes of children and adolescents around the world reveals much about the present and raises fascinating questions about the future. What happens when a stranger enters a classroom during a lesson and asks for the pupils' total concentration for 15 minutes in order to make their portrait? He positions everyone with great care (so that they can clearly be seen) and then demands that they stay completely still for the long exposure. The results are both predictable and astonishing. This ongoing series by Julian Germain started in northeast England. Since then Germain has visited schools throughout North and South America, Europe, the Middle East, Africa, and Southeast Asia. His magnificent photographs are packed with detail - books open on graffitied desks, instructions on white and blackboards, artwork hanging on walls, notes scribbled on the backs of hands. And of course there are the faces of the children themselves; enrapt, bored, inquisitive, arrogant, or shy, they incite endless curiosity about what these kids' lives are like and what their futures hold. Exquisitely reproduced in an oversize format, these portraits trigger memories of our own schooldays and bring into sharp focus the contemporary school experience throughout the world, in all its diversity and universality. ILLUSTRATIONS: 110 colour

Artificial Hells Claire Bishop, 2012-07-24 Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. Artificial Hells is the first historical and theoretical overview of socially engaged participatory art, known

in the US as social practice. Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

The Jungle Upton Sinclair, 2010-08-19 A searing novel of social realism, Upton Sinclair's *The Jungle* follows the fortunes of Jurgis Rudkus, an immigrant who finds in the stockyards of turn-of-the-century Chicago a ruthless system that degrades and impoverishes him, and an industry whose filthy practices contaminate the meat it processes. From the stench of the killing-beds to the horrors of the fertilizer-works, the appalling conditions in which Jurgis works are described in intense detail by an author bent on social reform. So powerful was the book's message that it caught the eye of President Theodore Roosevelt and led to changes to the food hygiene laws. In his Introduction to this new edition, Russ Castronovo highlights the aesthetic concerns that were central to Sinclair's aspirations, examining the relationship between history and historical fiction, and between the documentary impulse and literary narrative. As he examines the book's disputed status as novel (it is propaganda or literature?), he reveals why Sinclair's message-driven fiction has relevance to literary and historical matters today, now more than a hundred years after the novel first appeared in print.

The Right Kind of Crazy Adam Steltzner, William Patrick, 2016 Adam Steltzner is no ordinary engineer. His path to leadership was about as unlikely as they come. A child of beatnik parents, he barely made it through school. He blew off college in favour of work at a health food store and playing bass in a band, but after discovering an astonishing gift for maths and physics, he ended up helping a group of scientists land the heaviest rover in the history of space exploration on Mars. This is the story of the teamwork, drama and extraordinary feats of innovation at the Jet Propulsion Lab that culminated in that landing in 2012.

Strategic Project Management Made Simple Terry Schmidt, 2009-03-16 When *Fortune* Magazine estimated that 70% of all strategies fail, it also noted that most of these strategies were basically sound, but could not be executed. The central premise of *Strategic Project Management Made Simple* is that most projects and strategies never get off the ground because

of adhoc, haphazard, and obsolete methods used to turn their ideas into coherent and actionable plans. Strategic Project Management Made Simple is the first book to couple a step-by-step process with an interactive thinking tool that takes a strategic approach to designing projects and action initiatives. Strategic Project Management Made Simple builds a solid platform upon four critical questions that are vital for teams to intelligently answer in order to create their own strong, strategic foundation. These questions are: 1. What are we trying to accomplish and why? 2. How will we measure success? 3. What other conditions must exist? 4. How do we get there? This fresh approach begins with clearly understanding the what and why of a project - comprehending the bigger picture goals that are often given only lip service or cursory reviews. The second and third questions clarify success measures and identify the risky assumptions that can later cause pain if not spotted early. The how questions - what are the activities, budgets, and schedules - comes last in our four-question system. By contrast, most project approaches prematurely concentrate on the how without first adequately addressing the three other questions. These four questions guide readers into fleshing out a simple, yet sophisticated, mental workbench called the Logical Framework - a Systems Thinking paradigm that lays out one's own project strategy in an easily accessible, interactive 4x4 matrix. The inclusion of memorable features and concepts (four critical questions, LogFrame matrix, If-then thinking, and Implementation Equation) make this book unique.

On Attaining Buddhahood in This Lifetime Daisaku Ikeda, 2013-07-01 What constitutes a meaningful life? What is true happiness? Nichiren Buddhism, based on the Lotus Sutra, is a teaching of hope that provides answers to these and other important questions for modern life. Ranked among the most important works in Mahayana Buddhism, Nichiren's 13th-century writings were revolutionary. In *On Attaining Buddhahood in This Lifetime*, Nichiren turned prevailing Buddhist thought on its head. Attaining Buddhahood, or enlightenment, he argues, does not require embarking on some inconceivably long journey toward becoming some resplendent godlike Buddha, but rather it means accomplishing a transformation in the depths of one's being and revealing one's ultimate potential within. And Nichiren dedicated his life—braving all manner of persecution—to giving people a practical means for doing so. Daisaku Ikeda's simple and straightforward commentary brings alive this important writing for the modern world. Thoughtful people of all faiths will resonate with his compassionate insights on the universal teaching of happiness that is Nichiren Buddhism.

My Antonia Willa Cather,2024-01-02 A haunting tribute to the heroic pioneers who shaped the American Midwest This powerful novel by Willa Cather is considered to be one of her finest works and placed Cather in the forefront of women novelists. It tells the stories of several immigrant families who start new lives in America in rural Nebraska. This powerful tribute to the quiet heroism of those whose struggles and triumphs shaped the American Midwest highlights the role of women pioneers, in particular. Written in the style of a memoir penned by Antonia's tutor and friend, the book depicts one of the most memorable heroines in American literature, the spirited eldest daughter of a Czech immigrant family, whose calm, quite strength and robust spirit helped her survive the hardships and loneliness of life on the Nebraska prairie. The two form an enduring bond and through his chronicle, we watch Antonia shape the land while dealing with poverty, treachery, and tragedy. "No romantic novel ever written in America...is one half so beautiful as My Antonia." -H. L. Mencken Willa Cather

(1873–1947) was an American writer best known for her novels of the Plains and for *One of Ours*, a novel set in World War I, for which she was awarded the Pulitzer Prize in 1923. She was elected a fellow of the American Academy of Arts and Sciences in 1943 and received the gold medal for fiction from the National Institute of Arts and Letters in 1944, an award given once a decade for an author's total accomplishments. By the time of her death she had written twelve novels, five books of short stories, and a collection of poetry.

The Machine as Art/ The Machine as Artist Juliette Bessette, Frederic Fol Leymarie, G. W. Smith, 2020-10-21 The articles collected in this volume from the two companion Arts Special Issues, *The Machine as Art (in the 20th Century)* and *The Machine as Artist (in the 21st Century)*, represent a unique scholarly resource: analyses by artists, scientists, and engineers, as well as art historians, covering not only the current (and astounding) rapprochement between art and technology but also the vital post-World War II period that has led up to it; this collection is also distinguished by several of the contributors being prominent individuals within their own fields, or as artists who have actually participated in the still unfolding events with which it is concerned
