**Unique Eats and Eateries of Philadelphia** Irene Levy Baker, 2018-09-01 If you are hungry for a good meal and a delicious story, this book is here to serve you. It introduces you to the most fascinating restaurants and chefs in Philadelphia. Discover how two chocolatiers got engaged; dinners interrupted by bungled mob hits; restaurants that survived an earthquake, a fire, and even Prohibition; a secret restaurant that began in a backyard tent; and a distillery that started in a basement. The book includes the sweet and spicy stories behind more than 90 bistros, bars, bakeries, and breweries - restaurants with moving stories and good food and drink. Learn how to get reservations at trendy restaurants and into secret speakeasies. Find the most sinful desserts, where senior citizens dine with college seniors, where to taste goat, and spot celebrities too. Philadelphia, perhaps best known for its famous cheesesteaks, is finally getting recognized for its restaurant scene. It seems natural that a city sandwiched between two rivers would become one of the hottest food cities in America. With so many great restaurants, this book will help you to be well read and well fed.

**The Farm Bill** Daniel Imhoff, Christina Badaracco, 2019 Daniel Imhoffs recently-published *The Farm Bill: A Citizens Guide* [is] a welcome and much-needed source for translating farm bill legalese ... [it is] a thorough and navigable history of the farm bill ... [that] hands readers the tools to take action. Foodprint Dan Imhoff does an extraordinary job of explaining an impenetrable bill with such clarity that we can't ignore the facts: that our current Farm Bill profoundly damages our organic farms, our environment, and our health. Just as extraordinary are the practical solutions Imhoff proposes for fixing the bill--humane policies that would support regenerative agriculture and our local farmers instead of tearing them down. Alice Waters, Executive Chef, Founder, and Owner, Chez Panisse Cuts to the core of dozens of issues Congress wrestles with every four years, and gives citizens sage advice for making their voices heard in a debate too often dominated by Big Ag, Big Food, and Big Money. Ken Cook, President and Cofounder, Environmental Working Group A must-read for those who truly care about how they feed themselves and their families. Michel Nischan, Founder and CEO, Wholesome Wave Readers will gain deep insight into the big barriers to Farm Bill reform, but also into the ripening opportunities for major change. Imhoff makes a strong case for why we should care and what it will take to transform policy. Ferd Hoefner, Strategic Senior Advisor, National Sustainable Agriculture Coalition Dan Imhoff is the go-to person if you want to know both details and the full sweep of the Farm Bill. Wes Jackson, President Emeritus, The Land Institute.

**Institutions as Conscious Food Consumers** Sapna Elizabeth Thottathil, Annelies Goger, 2018-08-28 Institutions like schools, hospitals, and universities are not well known for having quality, healthy food. In fact, institutional food often embodies many of the worst traits of our industrialized food system, with long supply chains that are rife with environmental and social problems and growing market concentration in many stages of food production and distribution. Recently, however, non-profit organizations, government agencies, university research institutes, and activists have partnered with institutions to experiment with a wide range of more ethical and sustainable models for food purchasing, also known as values-based procurement. *Institutions as Conscious Food Consumers* brings together in-depth case studies from several of promising models of institutional food purchasing that aim to be more sustainable, healthy, equitable, and local. With chapters written by a diverse set of authors, including leaders in the food movement and policy researchers, this book: Documents growing interest among non-profit organizations and activists in institutional food interventions through case studies and first-hand experiences; Highlights emerging evidence about how these new procurement models affect agro-food supply chains; and Examines the role of policy and regional or geographic identity in promoting food systems change. *Institutions as Conscious Food Consumers* makes the case that institutions can use their budgets to change the food system for the better, although significant challenges remain. It is a must read for food systems practitioners, food chain researchers, and foodservice professionals interested in values-based procurement.

**Urban Food Planning** Rositsa T. Ilieva, 2016-09-13 This highly original work examines the rise of the urban food planning movement in the Global North and provides insights into the new relationship between cities and food which has started developing over the past decade. It sheds light on cities as new spaces for food system innovation and on food as a tool for sustainable urban development. Drawing insights from the literature on socio-technical transitions, the book presents examples of pioneering urban food planning endeavours from North America and Western Europe (especially the Netherlands and the UK). These are integrated into a single mosaic helping to uncover the conceptual, analytical, design, and organizational innovations emerging at the interface of food and urban policy and planning. The author shows how promising seeds of transition to a shared urban food planning agenda are in the making, though the urban food planning niche as a whole still lacks the necessary maturity to lastingly influence mainstream planning practices and the dominant agri-food system regime. Some of the strategic levers to cope with the current instability and limitations of urban food planning and effectively transition it from a marginal novelty to a normalized domain of policy, research, and practice are systematically examined to this end. The conclusions and recommendations put forward have major implications for scholars, activists, and public officials seeking to radically transform the co-evolution of food, cities, and the environment.

**Cities and Agriculture** Henk de Zeeuw, Pay Drechsel, 2015-09-16 As people increasingly migrate to urban settings and more than half of the world's population now lives in cities, it is vital to plan and provide for sustainable and resilient food

systems which reflect this challenge. This volume presents experience and evidence-based state of the art chapters on the key dimensions of urban food challenges and types of intra- and peri-urban agriculture. The book provides urban planners, local policy makers and urban development practitioners with an overview of crucial aspects of urban food systems based on an up to date review of research results and practical experiences in both developed and developing countries. By doing so, the international team of authors provides a balanced textbook for students of the growing number of courses on sustainable agriculture, food and urban studies, as well as a solid basis for well-informed policy making, planning and implementation regarding the development of sustainable, resilient and just urban food systems.

**Integrating Food into Urban Planning** Yves Cabannes, Cecilia Marocchino, 2018-11-22 The integration of food into urban planning is a crucial and emerging topic. Urban planners, alongside the local and regional authorities that have traditionally been less engaged in food-related issues, are now asked to take a central and active part in understanding how food is produced, processed, packaged, transported, marketed, consumed, disposed of and recycled in our cities. While there is a growing body of literature on the topic, the issue of planning cities in such a way they will increase food security and nutrition, not only for the affluent sections of society but primarily for the poor, is much less discussed, and much less informed by practices. This volume, a collaboration between the Bartlett Development Planning Unit at UCL and the Food Agricultural Organisation, aims to fill this gap by putting more than 20 city-based experiences in perspective, including studies from Toronto, New York City, Portland and Providence in North America; Milan in Europe and Cape Town in Africa; Belo Horizonte and Lima in South America; and, in Asia, Bangkok and Tokyo. By studying and comparing cities of different sizes, from both the Global North and South, in developed and developing regions, the contributors collectively argue for the importance and circulation of global knowledge rooted in local food planning practices, programmes and policies.

**The Whole30** Melissa Hartwig Urban, Dallas Hartwig, 2015 The best-selling authors of *It Starts With Food* outline a scientifically based, step-by-step guide to weight loss that explains how to change one's relationship with food for better habits, improved digestion and a stronger immune system. 150,000 first printing.

**Local Food Systems in Old Industrial Regions** Jay D. Gatrell, Paula S. Ross, 2016-05-06 In recent years there has been an explosion of interest in local food systems-among policy makers, planners, and public health professionals, as well as environmentalists, community developers, academics, farmers, and ordinary citizens. While most local food systems share common characteristics, the chapters in this book explore the unique challenges and opportunities of local food systems located within mature and/or declining industrial regions. Local food systems have the potential to provide residents with a supply of safe and nutritious food; such systems also have the potential to create much-needed employment opportunities. However, challenges are numerous and include developing local markets of a sufficient scale, adequately matching supply and demand, and meeting the environmental challenges of finding safe growing locations. Interrogating the scale, scope, and

economic context of local food systems in aging industrialized cities, this book provides a foundation for the development of new sub-fields in economic, urban, and agricultural geographies that focus on local food systems. The book represents a first attempt to provide a systematic picture of the opportunities and challenges facing the development of local food systems in old industrial regions.

**SPIN-farming Basics** Wally Satzewich, Roxanne Christensen, 2011 SPIN-Farming Basics outlines how to make money growing common vegetables in backyards, front lawns, neighborhood lots or as part of larger acreages in the country. SPIN stands for small plot intensive, and SPIN-Farming Basics provides everything you'd expect from a good franchise: a business concept, marketing advice, financial benchmarks and a detailed day-to-day workflow. It is non-technical, easy-to-understand and inexpensive-to-implement and shows readers how to farm commercially wherever they live, as long as there are nearby markets to support them.

**Eat and Run** Scott Jurek, Steve Friedman, 2013-01-01 An inspirational memoir by Scott Jurek, one of the finest ultrarunners in the world.

**Hand to Mouth** Linda Tirado, 2015-09-01 The real-life Nickel and Dimed—the author of the wildly popular “Poverty Thoughts” essay tells what it’s like to be working poor in America. ONE OF THE FIVE MOST IMPORTANT BOOKS OF THE YEAR—Esquire “DEVASTATINGLY SMART AND FUNNY. I am the author of Nickel and Dimed, which tells the story of my own brief attempt, as a semi-undercover journalist, to survive on low-wage retail and service jobs. TIRADO IS THE REAL THING.”—Barbara Ehrenreich, from the Foreword As the haves and have-nots grow more separate and unequal in America, the working poor don’t get heard from much. Now they have a voice—and it’s forthright, funny, and just a little bit furious. Here, Linda Tirado tells what it’s like, day after day, to work, eat, shop, raise kids, and keep a roof over your head without enough money. She also answers questions often asked about those who live on or near minimum wage: Why don’t they get better jobs? Why don’t they make better choices? Why do they smoke cigarettes and have ugly lawns? Why don’t they borrow from their parents? Enlightening and entertaining, Hand to Mouth opens up a new and much-needed dialogue between the people who just don’t have it and the people who just don’t get it.

Running a Food Hub: Volume Two, a Business Operations Guide James Matson, Jeremiah Thayer, Jessica Shaw, 2015-09-17 This report is part of a multi-volume technical report series entitled, Running a Food Hub, with this guide serving as a companion piece to other United States Department of Agriculture (USDA) reports by providing in-depth guidance on starting and running a food hub enterprise. In order to compile the most current information on best management and operations practices, the authors used published information on food hubs, surveyed numerous operating food hubs, and pulled from their existing experience and knowledge of working directly with food hubs across the country as an agricultural business consulting firm. The report’s main focus is on the operational issues faced by food hubs, including choosing an

organizational structure, choosing a location, deciding on infrastructure and equipment, logistics and transportation, human resources, and risks. As such, the guide explores the different decision points associated with the organizational steps for starting and implementing a food hub. For some sections, sidebars provide “decision points,” which food hub managers will need to address to make key operational decisions. This illustrated guide may assist the operational staff at small businesses or third-party organizations that may provide aggregation, marketing, and distribution services from local and regional producers to assist with wholesale, retail, and institution demand at government institutions, colleges/universities, restaurants, grocery store chains, etc. Undergraduate students pursuing coursework for a bachelor of science degree in food science, or agricultural economics may be interested in this guide. Additionally, this reference work will be helpful to small businesses within the food trade discipline.

**Transforming Food Environments** Charlotte EL Evans, 2022-03-22 We regularly find ourselves in food environments that promote the consumption of high fat and sugary foods rather than encouraging us to eat more fruit and vegetables. However, because of increased media attention, people are becoming more interested in alternative approaches to improving the many food-related decisions we make daily. *Transforming Food Environments* features evidence from several disciplines exploring initiatives that have improved food environments and discusses the importance of achieving success in equitable and sustainable ways. The book presents information on diverse food environments followed by methods that help readers become aware of the design of interventions and food policies. It covers food environments in schools, workplaces, and community centres as well as fast food establishments and food marketing. The book presents methods to help encourage better food choices and purchase of healthier foods. It explores persuasion tactics used by health professionals such as changing availability and/or price, using nudging techniques, and food labelling. Led by Editor Charlotte Evans, Associate Professor of Nutritional Epidemiology and Public Health Nutrition at the University of Leeds; and written by an international range of authors from countries including the US, Canada, Australia, New Zealand, Japan and the United Kingdom, this multidisciplinary book appeals to students, researchers, public health professionals and policy makers. It also raises awareness and provides a comprehensive treatment of the importance of our environments on food choice.

**Urban Agriculture** Kimberley Hodgson, Marcia Caton Campbell, Martin Bailkey, 2011 Urban agriculture is rising steadily in popularity in the United States and Canada - there are stories in the popular press, it has an increasingly central place in the growing local food movement, and there is a palpable interest in changing cities to foster both healthier residents and more sustainable communities. The most popular form of urban agriculture, community gardening, contributes significantly to developing social connections, building capacity, and empowering communities in urban neighborhoods. Older, industrial cities such as Cleveland, Detroit, and Buffalo, with their drastic loss of population and their acres of vacant land, are emerging as centers for urban agriculture initiatives - in essence, becoming laboratories for the future role of urban food

production in the postindustrial city. Because urban agriculture entails the use of urban land, it has implications for urban land-use planning, which is controlled and regulated by municipal governments and planning agencies. This PAS Report provides authoritative guidance for dealing with the implications of this cutting-edge practice that is changing our cities forever.

**Eat Up** Lauren Mandel, 2013-04-01 From roof to table – urban food has reached new heights. Soaring prices and concerns about chemical-laden fruits and vegetables increasingly drive us to grow our own healthy food close to home. In cities, however, vanishing ground space and contaminated soils spur farmers, activists, and restaurateurs to look to the skyline for a solution. The hunger for local food has reached new heights, and rooftops can provide the space that cities need to bring fresh, organic produce to tables across North America. The first full-length book to focus entirely on rooftop agriculture, *Eat Up* views this growing movement through a practitioner's lens, explaining: Structural, access, and infrastructural considerations Zoning and building codes Proven growing techniques Business and marketing strategies This graphically rich guide provides inspiration and advice to aspiring growers through photographs of successful rooftop farms and gardens and interviews with industry professionals. Easy-to-use checklists and a decision tree are included to help gauge the viability of each unique rooftop opportunity. Essential reading for home gardeners, entrepreneurs, restaurateurs, policy makers, academics, and designers, *Eat Up* takes urban agriculture to a whole new level, proving that rooftop farming is not just pie in the sky—it is the future of urban food. Lauren Mandel holds a master's degree in landscape architecture from the University of Pennsylvania and a bachelor of arts degree in environmental science. She is a project manager and rooftop agriculture specialist at Roofmeadow, where she designs green roofs and oversees green roof and rooftop agriculture projects around the country.

**Bread Toast Crumbs** Alexandra Stafford, 2017-04-04 With praise from Dorie Greenspan, Jim Lahey, and David Lebovitz, the definitive bread-baking book for a new generation. But this book isn't just about baking bread-- it's about what to do with the slices and heels and nubs from those many loaves you'll bake. Alexandra Stafford grew up eating her mother's peasant bread at nearly every meal—the recipe for which was a closely-guarded family secret. When her blog, Alexandra's Kitchen, began to grow in popularity, readers started asking how to make the bread they'd heard so much about; the bread they had seen peeking into photos. Finally, Alexandra's mother relented, and the recipe went up on the internet. It has since inspired many who had deemed bread-baking an impossibility to give it a try, and their results have exceeded expectations. The secret is in its simplicity: the no-knead dough comes together in fewer than five minutes, rises in an hour, and after a second short rise, bakes in buttered bowls. After you master the famous peasant bread, you'll work your way through its many variations, both in flavor (Cornmeal, Jalapeno, and Jack; Three Seed) and form (Cranberry Walnut Dinner Rolls; Cinnamon Sugar Monkey Bread). You'll enjoy bread's usual utilities with Food Cart Grilled Cheese and the Summer Tartine with Burrata and

Avocado, but then you'll discover its true versatility when you use it to sop up Mussels with Shallot and White Wine or juicy Roast Chicken Legs. Finally, you'll find ways to savor every last bite, from Panzanella Salad Three Ways to Roasted Tomato Soup to No-Bake Chocolate-Coconut Cookies. Bread, Toast, Crumbs is a 2018 nominee for The IACP Julia Child First Book Award, and Alexandra's Kitchen was a finalist for the Saveur Blog Awards Most Inspired Weeknight Dinners 2016

**Farming While Black** Leah Penniman, 2018 Farming While Black is the first comprehensive how to guide for aspiring African-heritage growers to reclaim their dignity as agriculturists and for all farmers to understand the distinct, technical contributions of African-heritage people to sustainable agriculture. At Soul Fire Farm, author Leah Penniman co-created the Black and Latino Farmers Immersion (BLFI) program as a container for new farmers to share growing skills in a culturally relevant and supportive environment led by people of color. Farming While Black organizes and expands upon the curriculum of the BLFI to provide readers with a concise guide to all aspects of small-scale farming, from business planning to preserving the harvest. Throughout the chapters Penniman uplifts the wisdom of the African diasporic farmers and activists whose work informs the techniques described--from whole farm planning, soil fertility, seed selection, and agroecology, to using whole foods in culturally appropriate recipes, sharing stories of ancestors, and tools for healing from the trauma associated with slavery and economic exploitation on the land. Woven throughout the book is the story of Soul Fire Farm, a national leader in the food justice movement. --

*Eating to Learn, Learning to Eat* Andrew R. Ruis, 2017-07-03 In *Eating to Learn, Learning to Eat*, historian A. R. Ruis explores the origins of American school meal initiatives to explain why it was (and, to some extent, has continued to be) so difficult to establish meal programs that satisfy the often competing interests of children, parents, schools, health authorities, politicians, and the food industry. Through careful studies of several key contexts and detailed analysis of the policies and politics that governed the creation of school meal programs, Ruis demonstrates how the early history of school meal program development helps us understand contemporary debates over changes to school lunch policies.
