The Garden Photography Workshop Andrea Jones, 2017-03-08 Learn to take better garden photos! One of the most rewarding aspects of gardening is sharing its beauty, both physically with those who visit and virtually with those who only see it on a screen. But capturing a garden's true essence is difficult, and often the moments worth sharing are ephemeral. In *The Garden Photography Workshop*, internationally known garden photographer Andrea Jones shares the trade secrets that make her photos sing. You'll learn the basic photography skills and tips on using a range of camera equipment. Profiles of real gardens from around the world exemplify the most common problems a photographer can face, like harsh light, wet weather, and cramped spaces, along with advice and techniques for addressing specific concerns. We live in a photo-driven world, and this helpful guide is a complete tutorial for anyone who wants that world to be filled with beautiful images of gardens and plants.

Garden Photography Charles Marden Fitch, 1989

The Planthunter Georgina Reid, 2019-04-30 An exciting and refreshing call to arms, *The Planthunter* is a new generation of gardening book for a new generation of gardener that encourages readers to fall in love with the natural world by falling in love with plants.

Better Picture Guide to Flower & Garden Photography Michael Busselle, 1998 Learning the art of composition. Making the most of garden features. Capturing the spirit of a garden. Photographing close-ups and vistas. Exploring the magic of light and colour. Choosing and using cameras and accessories. -- Cover, page [4]

Photographing Plants and Gardens, 1999 This book is written for both those who consider themselves to be primarily gardeners and those who consider themselves photographers. John Doornkamp clearly explains his practical approach and how to master some basic skills that will ensure success in this branch of photography. What the book does not demand is a technical knowledge about either gardening or photography. It does, however, assume a love of creativity and beauty, and perhaps a willingness to master a few basic skills that will ensure success in this branch of photography. Only a comparatively brief description is given here of cameras and other equipment.

Details and Vignettes Saxon Holt, 2015-02-07 A camera is a great tool that helps you distill overall impressions into a distinct capture—those details we really see. This lesson will help you learn to find the photo within the photo. Details and

Vignettes is the sixth and final lesson in THINK LIKE A CAMERA, the second series of the PhotoBotanic Garden Photography Workshop with garden photographer Saxon Holt. The camera is an artistic tool that frames a composition in two dimensions. Learn techniques of lines, shape, and focal points found in all good gardens to fill the frame with strong compositions. Whether you have a big megapixel SLR camera or just a smart phone, your pictures will improve as soon as you think about what the camera is seeing—versus what you are seeing. Use the camera frame to fill your photograph with only those elements that tell your story.

The American Meadow Garden John Greenlee, 2009-09-01 If there's one lesson every homeowner must learn, it's this: The traditional lawn is a huge, time consuming, synthetic-chemical sucking mistake. The time has come to look for new ways to create friendly, livable spaces around our homes. In *The American Meadow Garden*, ornamental grass expert John Greenlee creates a new model for homeowners and gardeners. For Greenlee, a meadow isn't a random assortment of messy, anonymous grasses. Rather, it is a shimmering mini-ecosystem, in which regionally appropriate grasses combine with colorful perennials to form a rich tapestry that is friendly to all life — with minimal input of water, time, and other scarce resources. Kids and pets can play in complete safety, and birds and butterflies flock there. A prairie style planting is a place you want to be. With decades of experience as a nurseryman and designer, John Greenlee is the perfect guide. He details all the practicalities of site preparation, plant selection, and maintenance; particularly valuable are his explanations of how ornamental grasses perform in different climates and areas. Gorgeous photography by Saxon Holt visually illustrates the message with stunning examples of meadow gardens from across the country. We've reached a stage where we can no longer follow past practices unthinkingly, particularly when those practices are wasteful and harmful to the environment. It's time to get rid of the old-fashioned lawn and embrace a sane and healthy future: the American meadow garden.

The Garden, 1884

Fearless Color Gardens Keeyla Meadows, 2009-09-01 Renowned garden artist Keeyla Meadows sees the world in strong, saturated shades. *Fearless Color Gardens* brings this unique vision to life by showing how to use wild, uninhibited color to connect indoor and outdoor spaces and turn a garden into a work of art. Learn how to pick colors that work together; how to coordinate the colors of walls, benches, containers, and garden art; how to organize garden spaces through the use of color; and how to translate personal color preferences into tangible form in the garden. *Fearless Color Gardens* also features

a new way of looking at color with Keeyla's Color Triangle; easy-to use tips on growing edibles in color themed gardens; and Keeyla's favorite plants for specific colors. In the end, readers will want to reinvent the staid rules of the color wheel and turn their color preferences into intoxicatingly vibrant garden expressions.

Bringing Nature Home Douglas W. Tallamy,2009-09-01 "With the twinned calamities of climate change and mass extinction weighing heavier and heavier on my nature-besotted soul, here were concrete, affordable actions that I could take, that anyone could take, to help our wild neighbors thrive in the built human environment. And it all starts with nothing more than a seed. Bringing Nature Home is a miracle: a book that summons butterflies. —Margaret Renkl, The Washington Post As development and habitat destruction accelerate, there are increasing pressures on wildlife populations. In his groundbreaking book Bringing Nature Home, Douglas W. Tallamy reveals the unbreakable link between native plant species and native wildlife—native insects cannot, or will not, eat alien plants. When native plants disappear, the insects disappear, impoverishing the food source for birds and other animals. Luckily, there is an important and simple step we can all take to

help reverse this alarming trend: everyone with access to a patch of earth can make a significant contribution toward sustaining biodiversity by simply choosing native plants. By acting on Douglas Tallamy's practical and achievable recommendations, we can all make a difference.

A Tapestry Garden Ernie O'Byrne, Marietta O'Byrne, 2018-04-26 "This is a love story about a couple and their relationship with an acre-and-a-half of land. . . with exceptional plant descriptions that read like character references for old friends. . . beautiful photographs and prose await." —Library Journal Marietta and Ernie O'Byrne's garden—situated on one and a half acres in Eugene, Oregon—is filled with an incredible array of plants from around the world. By consciously leveraging the garden's many microclimates, they have created a stunning patchwork of exuberant plants that is widely considered one of America's most outstanding private gardens. In *A Tapestry Garden*, the O'Byrnes share their deep knowledge of plants and essential garden advice. Readers will discover the humble roots of the garden, explore the numerous habitats and the plants that make them shine, and find inspiration in photography that captures the garden's astonishing beauty. There is something here for every type of gardener: a shade garden, perennial borders, a chaparral garden, a kitchen garden, and more. Profiles of the O'Byrne's favorite plants—including hellebores, trilliums, arisaemas, and alpine plants—include comprehensive growing information and tips on pruning and care. *A Tapestry Garden* captures the spirit of a very special place.

The Humane Gardener Nancy Lawson, 2017-04-18 In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. *The Humane Gardener* fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.

Hugh Johnson In The Garden Hugh Johnson, 2009-06-04 *Tradescant's Diary*, a column of garden jottings, first

appeared in the RHS magazine, The Garden, in June 1975. Hugh Johnson was its author (in addition to his being Editorial Director of the magazine) and it became a monthly fixture for the RHS's committed gardeners. Hugh's writings are filled with an eclectic mixture of topical, whimsical and humorous anecdotes and are organised to follow a gardener's monthly calendar. Under the name Tradescant's Diary, a name taken from John Tradescant, gardener to Lord Cecil at Hatfield House and to King James I, who was one of the first men to introduce plants from foreign countries to his own garden, Hugh's writings appeared in The Garden from 1975-2006, in Gardens Illustrated in 2007, and in 2008 still appear as monthly blogs through his own website (www.tradsdiary.com).
