**Professional and Business Ethics Through Film** Jadranka Skorin-Kapov, 2018-08-10 This book considers ethical issues arising in professional and business settings and the role of individuals making decisions and coping with moral dilemmas. Readers can benefit from engagement in filmic narratives, as a simulated environment for developing a stance towards ethical challenges. The book starts by elaborating on critical thinking and on normative ethical theories, subsequently presenting the structure and cinematic elements of narrative film. These two avenues are tools for evaluating films and for discussions on various ethical problems in contemporary business, including: the corporate and banking financial machinations (greed, fraud, social responsibility); workplace ethical challenges (harassment, violence, inequity, inequality); professional and business ethical challenges (corruption, whistleblowing, outsourcing, downsizing, competition,

and innovation); environmental and social issues; international business and human rights; and personal responsibility and identity challenges due to career pressures, loss of privacy and cyber harassment, and job structure changes in light of changing technology.

**History of English** Dan McIntyre,2020-08-25 Routledge English Language Introductions cover core areas of language study and are one-stop resources for students. Assuming no prior knowledge, books in the series offer an accessible overview of the subject, with activities, study questions, sample analyses, commentaries and key readings – all in the same volume. The innovative and flexible ‘two-dimensional’ structure is built around four sections – introduction, development, exploration and extension – which offer self-contained stages for study. Each topic can also be read across these sections, enabling the reader to build gradually on the knowledge gained. This revised second edition of History of English includes: □ a comprehensive introduction to the history of English covering the origins of English, the change from Old to Middle English, and the influence of other languages on English; □ increased coverage of key issues, such as the standardisation of English; □ a wider range of activities, plus answers to exercises; □ new readings of well-known authors such as Manfred Krug, Colette Moore, Merja Stenroos and David Crystal; □ a timeline of important external events in the history of English. Structured to reflect the chronological development of the English language, History of English describes and explains the changes in the language over a span of 1,500 years, covering all aspects from phonology and grammar, to register and discourse. In doing so, it incorporates examples from a wide variety of texts and provides an interactive and structured textbook that will be essential reading for all students of English language and linguistics.

**God's Exiles and English Verse** John D. Niles,2019-07-31 This monograph is a critical study of the medieval manuscript

held in Exeter Cathedral Library, popularly known as 'The Exeter Book'. Recent scholarship, including the standard edition of the text, published by UEP in 2000 (2 ed'n 2006), has re-named the manuscript 'The Exeter Anthology of Old English Poetry'. The book gives us intelligent, sensitive literary criticism, profound readings of all of the poems of the Anthology. *God's Exiles and English Verse* is the first integrative, historically grounded book to be written about the Exeter Book of Old English poetry. By approaching the Exeter codex as a whole, the book seeks to establish a sound footing for the understanding of any and all of its parts, seen as devout yet cosmopolitan expressions of late Anglo-Saxon literary culture. The poems of the Exeter Book have not before been approached primarily from a codicological perspective. They have not before been read as an integrated expression of a monastic poetic: that is to say, as a refashioning of the medium of Old English verse so as to serve as an emotionally powerful, intellectually challenging vehicle for Christian doctrine and moral instruction. Part One, consisting of three chapters, introduces certain of the book's main themes, addresses matters of date, authorship, audience, and the like, and evaluates hypotheses that have been put forth concerning the origins of the Exeter Anthology in the south of England during the period of the Benedictine Reform. Part Two, the main body of the book, begins with a long chapter, divided into seven sections, that introduces the contents of the Exeter Anthology poem by poem in a more systematic fashion than before, with attention to the overall organization of the Anthology and certain factors in it that have a unifying function. The five shorter chapters that follow are devoted to topics of special interest, including the volume's possible use as a guide to vernacular poetic techniques, its underlying worldview, its reliance on certain thematically significant keywords, and its intertextual versus intratextual relations. The riddles, especially those of a sexual content, receive attention in a chapter of their own. In addition, there is a translation of the popular poem *The Wanderer* into modern English prose, a folio-by-folio listing of the contents of the Exeter Anthology, and a listing of a number of the poems of the Anthology with notes on their genre, according to Latin generic terms familiar to educated Anglo-Saxons. This book is the first of its kind - an integrative, book-length critical study of the Exeter Anthology.

**West Cotton, Raunds** Andy Chapman, Marion Archibald, 2010 The open area excavation of nearly a half of the small deserted medieval hamlet of West Cotton, Raunds, Northamptonshire has revealed the dynamic processes of constant development in a way that has rarely been achieved on other comparable sites in England. Its origins have been seen to lie in the mid tenth-century plantation of a planned settlement based on regular one-acre plots, which occurred within the political

context of the reconquest of eastern England by the Saxon kings and the subsequent reorganisation of settlement and society within the Danelaw. The settlement contained a major holding comprising a timber hall with ancillary buildings and an adjacent watermill, with perhaps a second similar holding and dependent peasants nearby. It was established on the edge of the floodplain at the confluence of a tributary stream with the River Nene, on a major valley-bottom route way. The processes of redevelopment which led to the rebuilding in stone in the twelfth century, as a small Norman manor house; the probable relocation of the manor buildings in the thirteenth century; and its final form in the fourteenth to mid-fifteenth century as a hamlet of peasant tenements have been well documented by the archaeological evidence. In particular, it has been vividly shown how the final form of the settlement, preserved in earthwork, was merely a fairly brief episode at the end of this extended process of development, while the historic evidence provides no hint of the higher-status elements that had formed an integral part of the settlement until the final century of its occupation. Desertion appears to have been a gradual process, with the tenements abandoned one-by-one through a century of economic and social disasters, of which the Black Death was the most notable, as families presumably moved to better quality land then readily available elsewhere. The role of the local environment in the processes of change has also been well documented, with the abandonment of the watermill in the twelfth century resulting from a disruption of the water supply caused by a period of intense flooding and alluviation, when the very survival of the settlement was only ensured by the construction of a protective flood bank. The excavated structural evidence is of high quality, and has provided numerous complete building plans ranging from the timber halls of the tenth and eleventh centuries, through the manor house of the twelfth to thirteenth centuries, to the well-preserved tenements of the fourteenth century. This is complemented by substantial artefact assemblages, and the consideration of the local economy and environment is largely dependent on the analysis of the faunal evidence and the environmental evidence derived from an extensive programme of soil sampling.
