Basketball James Naismith, 1996-01-01 James Naismith was teaching physical education at the Young Men's Christian Association Training College in Springfield, Massachusetts, and felt discouraged because calisthenics and gymnastics didn't engage his students. What was needed was an indoor wintertime game that combined recreation and competition. One evening he worked out the fundamentals of a game that would quickly catch on. Two peach half-bushel baskets gave the name to the brand new sport in late 1891. *Basketball: Its Origin and Development* was written by the inventor himself, who was inspired purely by the joy of play. Naismith, born in northern Ontario in 1861, gave up the ministry to preach clean living through sport. He describes Duck on the Rock, a game from his Canadian childhood, the creative reasoning behind his basket game, the eventual refinement of rules and development of equipment, the spread of amateur and professional teams throughout the world, and the growth of women's basketball (at first banned to male spectators because the players wore bloomers). Naismith lived long enough to see basketball included in the Olympics in 1936. Three years later he died, after nearly forty years as head of the physical education department at the University of Kansas. This book, originally published in 1941, carries a new introduction by William J. Baker, a professor of history at the University of Maine, Orono. He is the author of *Jesse Owens: An American Life and Sports in the Western World*.

The Webster-Hayne Debate on the Nature of the Union Daniel Webster, Robert Young Hayne, 2000 The debates between Daniel Webster of Massachusetts and Robert Hayne of South Carolina gave fateful utterance to the differing understandings of the nature of the American Union that had come to predominate in the North and the South by 1830. To Webster, the Union was the indivisible expression of one nation of people. To Hayne, the Union was the voluntary compact among sovereign states. The Webster-Hayne Debate consists of speeches delivered in the United States Senate in January of 1830. Herman Belz is Professor of History at the University of Maryland. Visual Global Politics Roland Bleiker, 2018-02-13 We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance

cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, Visual Global Politics is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today's world.

Curriculum 21 Heidi Hayes Jacobs, 2010-01-05 What year are you preparing your students for? 1973? 1995? Can you honestly say that your school's curriculum and the program you use are preparing your students for 2015 or 2020? Are you even preparing them for today? With those provocative questions, author and educator Heidi Hayes Jacobs launches a powerful case for overhauling, updating, and injecting life into the K-12 curriculum. Sharing her expertise as a world-renowned curriculum designer and calling upon the collective wisdom of 10 education thought leaders, Jacobs provides insight and inspiration in the following key areas: * Content and assessment: How to identify what to keep, what to cut, and what to create, and where portfolios and other new kinds of assessment fit into the picture. * Program structures: How to improve our use of time and space and groupings of students and staff. * Technology: How it's transforming teaching, and how to take advantage of students' natural facility with technology. * Media literacy: The essential issues to address, and the best resources for helping students become informed users of multiple forms of media. * Globalization: What steps to take to help students gain a global perspective. * Sustainability: How to instill enduring values and beliefs that will lead to healthier local, national, and global communities. * Habits of mind: The thinking habits that students, teachers, and administrators need to develop and practice to succeed in school, work, and life. The answers to these questions and many more make Curriculum 21 the ideal guide for transforming our schools into what they must become: learning organizations that match the times in which we live.

The Yosemite John Muir, 1912 In the classic nature work, *The Yosemite*, the great American naturalist, John Muir, describes the Yosemite valley's geography and the myriad types of trees, flowers, birds, and other animals that can be found there. *The Yosemite* is among the finest examples of John Muir nature writings. *The Yosemite* is a classic nature/outdoor adventure text and a fine example of John Muir nature writings. In this volume, Muir describes the Yosemite valley's geography and the various types of trees, flowers and animals that can be found there. John Muir (April 21, 1838 - December 24, 1914) was a Scottish-American naturalist, author, environmental philosopher and early advocate of preservation of wilderness in the United States. His letters, essays, and books telling of his adventures in nature, especially in the Sierra Nevada mountains of California, have been read by millions. His activism helped to preserve the Yosemite Valley, Sequoia National Park and other wilderness areas. The Sierra Club, which he founded, is a prominent American conservation organization. The 211-mile (340 km) John Muir Trail, a hiking trail in the Sierra Nevada, was named in his honor.[2] Other such places include Muir Woods National Monument, Muir Beach, John Muir College, Mount Muir, Camp Muir and Muir Glacier. In Scotland, the John Muir Way, a 130 mile long distance route, was named in honor of him. In his later life, Muir devoted most of his time to the preservation of the Western forests. He petitioned the U.S. Congress for the National Park bill that was passed in 1890, establishing Yosemite National Park. The spiritual quality and enthusiasm toward nature expressed in his writings inspired readers, including presidents and congressmen, to take action to help preserve large nature areas. He is today referred to as the Father of the National Parks and the National Park Service has produced a short documentary about his life. Muir has been considered 'an inspiration to both Scots and Americans'. Muir's biographer, Steven J. Holmes, believes that Muir has become one of the patron saints of twentieth-century American environmental activity, both political and recreational. As a result, his writings are commonly discussed in books and journals, and he is often quoted by nature photographers such as Ansel Adams. Muir has profoundly shaped the very categories through which Americans understand and envision their relationships with the natural world, writes Holmes. Muir was noted for being an ecological thinker, political spokesman, and religious prophet, whose writings became a personal guide into nature for countless individuals, making his name almost ubiquitous in the modern environmental consciousness. According to author William Anderson, Muir

exemplified the archetype of our oneness with the earth, [while biographer Donald Worster says he believed his mission was ...saving the American soul from total surrender to materialism. 403 On April 21, 2013, the first ever John Muir Day was celebrated in Scotland, which marked the 175th anniversary of his birth, paying homage to the conservationist. Muir was born in the small house at left. His father bought the adjacent building in 1842, and made it the family home.

The Macabresque Edward Weisband,2018 Studies of genocide and mass atrocity most often focus on their causes and consequences, their aims and effects, and the number of people killed. But if the main goal is death, why is torture necessary? By understanding how and why mass violence occurs and the reasons for its variations, *The Macabresque* aims to explain why so many seemingly normal or ordinary people participate in mass atrocity across cultures and why such egregious violence occurs repeatedly through history.
