Birds of Prey of the West Brian K. Wheeler, 2018-06-19 Birds of Prey of the West and its companion volume, Birds of Prey of the East, are the most comprehensive and authoritative field guides to North American birds of prey ever published. Written and lavishly illustrated with stunning, lifelike paintings by leading field-guide illustrator, photographer, and author Brian Wheeler, the guides depict an enormous range of variations of age, sex, color, and plumage, and feature a significant amount of plumage data that has never been published before. The painted figures illustrate plumage and species comparisons in a classic field-guide layout. Each species is shown in the same posture and from the same viewpoint, which further assists comparisons. Facing-page text includes quick-reference identification points and brief natural history accounts that incorporate the latest information. The range maps are exceptionally accurate and much larger than those in other guides. They plot the most up-to-date distribution information for each species and include the location of cities for more accurate reference. Finally, the guides feature color habitat photographs next to the maps. The result sets a new standard for guides to North America's birds of prey. Lavishly illustrated with stunning, lifelike paintings Written and illustrated by a leading authority on North American birds of prey Depicts more plumages than any other guide Concise facing-page text includes quick-reference identification points Classic field-guide layout makes comparing species easy Large, accurate range maps include up-to-date distribution information Unique color habitat photographs next to the maps

Modernism versus Traditionalism Gretchen K. McKay, Nicolas W. Proctor, Michael A. Marlais, 2018-03-01 Modernism vs. Traditionalism: Art in Paris 1888-1889 considers questions surrounding artistic developments at the end of the nineteenth century in Paris. Students will debate principles of artistic design in the context of the revolutionary changes that began shaking the French art world in 1888-1889. Images from the 1888 Salon and the tumultuous year that followed provide some of the texts that form the intellectual heart of every reacting game. Styles include conservative art espoused by the Academy, as well as more avant-garde art created by artists such as Van Gogh and Gauguin. Also included are the Impressionists and American artists in Paris. Students must read paintings as texts and use them as the basis of their positions in advocating for the future of art. In addition to these visual texts, students will read art criticism from the period, which will help form the

basis of their own presentations in favor of one art style over another. These discussions are complicated and enriched by secondary debates over the economics of art, the rise of independent art dealers, and the government's role as a patron of the arts. The game culminates at the 1889 World Exposition in Paris.

3D Surface Reconstruction Francesco Bellocchio, N. Alberto Borghese, Stefano Ferrari, Vincenzo Piuri, 2012-10-28 3D Surface Reconstruction: Multi-Scale Hierarchical Approaches presents methods to model 3D objects in an incremental way so as to capture more finer details at each step. The configuration of the model parameters, the rationale and solutions are described and discussed in detail so the reader has a strong understanding of the methodology. Modeling starts from data captured by 3D digitizers and makes the process even more clear and engaging. Innovative approaches, based on two popular machine learning paradigms, namely Radial Basis Functions and the Support Vector Machines, are also introduced. These paradigms are innovatively extended to a multi-scale incremental structure, based on a hierarchical scheme. The resulting approaches allow readers to achieve high accuracy with limited computational complexity, and makes the approaches appropriate for online, real-time operation. Applications can be found in any domain in which regression is required. 3D Surface Reconstruction: Multi-Scale Hierarchical Approaches is designed as a secondary text book or reference for advanced-level students and researchers in computer science. This book also targets practitioners working in computer vision or machine learning related fields.

Orgy of Souls Wrath James White, Maurice Broaddus, 2008-06

Savannah's Midnight Hour Lisa L. Denmark, 2019 Savannah's Midnight Hour argues that Savannah's development is best understood within the larger history of municipal finance, public policy, and judicial readjustment in an urbanizing nation. In providing such context, Lisa Denmark adds constructive complexity to the conventional Old South/New South dichotomous narrative, in which the politics of slavery, secession, Civil War, and Reconstruction dominate the analysis of economic development. Denmark shows us that Savannah's fiscal experience in the antebellum and postbellum years, while exhibiting some distinctively southern characteristics, also echoes a larger national experience. Her broad account of municipal decision making about improvement investment throughout the nineteenth century offers a more nuanced look at the continuity and change of policies in this pivotal urban setting. Beginning in the 1820s and continuing into the 1870s, Savannah's resourceful government leaders acted enthusiastically and aggressively to establish transportation links and to construct a modern infrastructure. Taking the long view of financial risk, the city/municipal government invested in an ever-widening array of projects--canals, railroads, harbor improvement, drainage-- because of their potential to stimulate the city's economy. Denmark examines how this ideology of over-optimistic risk-taking, rooted firmly in the antebellum period, persisted after the Civil War and eventually brought the city to the brink of bankruptcy. The struggle to strike the right balance between using public policy and public money to promote economic development while, at the same time, trying to maintain a sound fiscal footing is a question governments still struggle with today.

My friends have also convinced me that the best way to boost my fragile self-esteem is through a one-night-stand. A dating App. A hotel bar. I assumed he was passing through town. I assumed he was a businessman, or maybe an investor, or accountant, or literally anything other than a professional hockey player. I assumed I'd never see him again. I assumed wrong.
