Handbook of Research on Pedagogical Models for Next-Generation Teaching and Learning Keengwe, Jared, 2017-10-31 Every generation of students comes to the classroom with different needs than that of their predecessors. Implementing new methods and styles of teaching to meet these diverse needs will provide students with the best chance of success in their educational careers. The Handbook of Research on Pedagogical Models for Next-Generation Teaching and Learning is a critical scholarly source that examines the most effective and efficient techniques for implementing new educational strategies in a classroom setting. Featuring pertinent topics including mixed reality simulations, interactive lectures, reflexive teaching models, and project-based learning, this is an ideal publication for educators, academicians, students, and researchers that are interested in discovering more about the recent advances in educational fields.

Understanding by Design Grant P. Wiggins, Jay McTighe, 2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

First Principles of Instruction M. David Merrill, 2012-10-06 This handy resource describes and illustrates the concepts

underlying the “First Principles of Instruction” and illustrates First Principles and their application in a wide variety of instructional products. The book introduces the e3 Course Critique Checklist that can be used to evaluate existing instructional product. It also provides directions for applying this checklist and illustrates its use for a variety of different kinds of courses. The Author has also developed a Pebble-in-the-Pond instructional design model with an accompanying e3 ID Checklist. This checklist enables instructional designers to design and develop instructional products that more adequately implement First Principles of Instruction.

Cross-Cultural Online Learning in Higher Education and Corporate Training Keengwe, Jared, 2014-01-31 This book brings together researchers who study and professionals who design and deliver online training across cultures in both higher education and corporate training settings to share paradigms, perspectives, insights, best practices, challenges and best practices--Provided by publisher.

Water-Quality Engineering in Natural Systems David A. Chin, 2012-11-28 Provides the tools needed to control and remediate the quality of natural water systems Now in its Second Edition, this acclaimed text sets forth core concepts and principles that govern the fate and transport of contaminants in water, giving environmental and civil engineers and students a full set of tools to design systems that effectively control and remediate the quality of natural waters. Readers will find coverage of all major classes of water bodies. Moreover, the author discusses the terrestrial fate and transport of contaminants in watersheds, underscoring the link between terrestrial loadings and water pollution. *Water-Quality Engineering in Natural Systems* begins with an introduction exploring the sources of water pollution and the control of water pollution. It then presents the fundamentals of fate and transport, including the derivation and application of the advection-diffusion equation. Next, the text covers issues that are unique to: Rivers and streams Groundwater Watersheds Lakes and reservoirs Wetlands Oceans and estuaries The final two chapters are dedicated to analyzing water-quality measurements and modeling water quality. This Second Edition is thoroughly updated based on the latest findings, practices, and standards. In particular, readers will find new methods for calculating total maximum daily loads for river contaminants, with specific examples detailing the fate and transport of bacteria, a pressing problem throughout the world. With end-of-chapter problems and plenty of worked examples, *Water-Quality Engineering in Natural Systems* enables readers to not only understand what happens to contaminants in water, but also design systems to protect people from toxic pollutants.

BTEC National IT Practitioners Alan Jarvis, 2003 This text provides all the necessary underpinning knowledge for the BTEC National IT Practitioners qualification. It offers: case studies to enable students to apply theory to vocational practice, portfolio builders providing activities and guidance, and IVA Advice on completing assignments.

Teaching Poetry Writing Tom C. Hunley,2007-01-01 Teaching Poetry Writing: A Five-Canon Approach is a comprehensive alternative to the full-class workshop approach to poetry writing instruction. In the five-canon approach, peer critique of student poems takes place in online environments, freeing up class time for writing exercises and lessons based on the five canons of classical rhetoric: invention, arrangement, style, memory, and delivery.

Constructing Buildings for Model Railways David Ashwood,2023-09-30 At some time during ownership a train set crosses an arbitrary threshold and becomes a model railway. The aspiring modeler then has the challenge of filling in all the gaps. Whether the line runs through the countryside, a village or town, some type of infrastructure is needed to represent the station, home, or factory. This can be a challenge to the modeler as there are a wide variety of offerings at differing price points and detail levels. This book progresses through planning and thought processes aiming to demonstrate pictorially several different build types. From the simple paper kit to mighty scratch-built edifices, each is broken down to show how the build is undertaken. This book also follows some of the rebuilding process undertaken by the Market Deeping Model Railway Club as layouts were repaired, enhanced, or replaced following their annual show being vandalized on the night before public opening in May 2019. As the news of this sad event broke, it went worldwide through the modeling community and public in general. The images of layouts broken to matchwood showed many years of skilled building and devoted operation which were lost. This gave the opportunity for experienced club members to build a mini movie set, construct a major London terminus and patch repair what could be saved from damaged originals. The photographic capture of these projects has been used within this book alongside the detailed work of other modelers, clubs, and societies.

Handbook of Loss Prevention Engineering Joel M. Haight,2013-03-19 Loss prevention engineering describes all activities intended to help organizations in any industry to prevent loss, whether it be through injury, fire, explosion, toxic release, natural disaster, terrorism or other security threats. Compared to process safety, which only focusses on preventing loss in the process industry, this is a much broader field. Here is the only one-stop source for loss prevention principles, policies, practices, programs and methodology presented from an engineering vantage point. As such, this handbook discusses the engineering needs for manufacturing, construction, mining, defense, health care, transportation and quantification, covering the topics to a depth that allows for their functional use while providing additional references should more information be required. The reference nature of the book allows any engineers or other professionals in charge of safety concerns to find the information needed to complete their analysis, project, process, or design.

Teaching Labor History in Art and Design Kyunghye Pyun, Vincent G. Quan, 2024-06-14 Drawing from American history, fashion design, history of luxury, visual culture, museum studies, and women's history, among others, this book explores the challenges, rewards and benefits of teaching business and the labor history of art and design professions to those in higher education. Recognizing that artists and designers are no longer just creatives, but bosses, employees, members of professional associations, and citizens of nations that encourage and restrain their creative work in various ways, the book identifies a crucial need for art and design students to be taught the intricacies of these other roles, as well as how to navigate or challenge them. This empirically driven study features case studies in various pedagogical contexts, including museum exhibitions, group projects, lesson plans, discussion topics, and long-term assignments. The chapters also explore how the roles of designing and making became separated, how new technologies and the rise of mass production affected creative careers, the shifts back and forth between direct employment and freelancing, and the evolution of government interventions in creative fields. With a diverse and experienced range of contributors, and providing a unique set of conceptual tools to interpret, cope with, and react to the ever-changing conditions of capitalism, this volume will appeal to educators and researchers across education, history, art history, and sociology, with interests in experiential learning, capitalism, equity, social justice and neoliberalism.

Lessons Learned From The Use Of The Machine Gun During The Russo-Japanese War LCDR Daniel J.

Kenda, 2014-08-15 Dr. Richard Gatling invented the world's first practical machine gun in 1862. Between that weapon and subsequent improved designs, the world's armies had roughly 50 years to adopt the machine gun and perfect its employment before it helped wreak the carnage of World War I. However, for some reason or combination of reasons, none of the armies of the day saw fit to do so. This thesis explores the potential explanations behind this phenomenon by using the Russo-Japanese War as a case study. The Russo-Japanese War should have demonstrated to the world how the machine gun fundamentally altered the conduct of land warfare, especially since the major world powers all sent military observers to report on the war's events. This thesis will show, however, that because of a complex combination of the prevalent military tactical culture, bureaucratic pragmatism and logistical concerns, the five major protagonist armies of World War I generally failed to apply the lessons they learned about machine-gun employment from the Russo-Japanese War and as a result were completely surprised by the weapon's impact on the battlefield ten years later.

Stop Motion: Craft Skills for Model Animation Susannah Shaw, 2012-07-26 To make great animation, you need to know how to control a whole world: how to make a character, how to make that character live and be happy or sad. You need to create four walls around them, a landscape, the sun and moon - a whole life for them. You have to get inside that puppet

and first make it live, then make it perform. Susannah Shaw provides the first truly practical introduction to the craft skills of model animation. This is a vital book in the development of model animation which, following the success of Aardman's first full-length film, *Chicken Run*, is now at the forefront of modern animation. Illustrated in full colour throughout you are shown step by step how to create successful model animation. Starting with some basic exercises, you will learn about developing a story, making models, creating set and props, the mechanics of movement, filming, postproduction and how to set about finding that elusive first job in a modern studio. Susannah Shaw is Programme Development Manager for the Animated Exeter festival. She was head of the Bristol Animation Course from 1996 to 2000 at the University of the West of England and former camera assistant at Aardman (working on 'A Close Shave' among other films).

Varcarolis's Canadian Psychiatric Mental Health Nursing - E-Book Cheryl L. Pollard, Sonya L. Jakubec, 2022-05-07
Gain the knowledge and skills you need to provide psychiatric mental health nursing care in Canada! Varcarolis's Canadian Psychiatric Mental Health Nursing, 3rd Edition uses a practical clinical perspective to provide a clear understanding of this often-intimidating subject. It provides a foundation in nursing techniques and a guide to psychobiological disorders such as bipolar and depressive disorders, trauma interventions, and interventions for distinct populations such as children and older adults. Adapted to meet the needs of Canadian nurses by Cheryl L. Pollard and Sonya L. Jakubec, this market-leading text prepares you for practice with real-world examples presented within a Canadian legal, ethical, and cultural context. Canadian focus throughout includes key considerations such as our nation's cultural and social diversity with federal/provincial/territorial distinctions. Canadian research and statistics reflect mental health and mental health practice in Canada. Research Highlight boxes are updated with examples of Indigenous research methodologies by Indigenous researchers and settler allies. DSM-5 boxes provide criteria for disorders covered by the American Psychological Association. Learning features include key terms and concepts, learning objectives, key points to remember, critical thinking, and chapter reviews, reinforcing important information and helping to apply textbook content to the clinical setting. Assessment Guidelines boxes summarize the steps of patient assessment for various disorders. Drug Treatment boxes feature the most current generic and trade names for drugs used in Canada. Patient and Family Teaching boxes provide important details that should be discussed with patients and care givers. Integrative Therapy boxes highlight the different types of therapy may be used to enhance treatment. Considering Culture boxes discuss the importance of cultural safety in providing competent care to diverse populations within various clinical situations. NEW! Safety Tip boxes highlight important issues of safety for psychiatric mental health care, patient experiences, and nursing interventions. NEW! Added mental health content covers Indigenous populations, migrant populations, and gender differences with a focus on cultural safety, equity-informed approaches, relational and trauma-informed practices. Updated Chapter 29 covers recovery, survivorship, and public mental health approaches. Enhanced topics include substance use disorders, harm reduction, and support among nurses; changes

related to Medical Assistance in Dying (MAiD) legislation; and mental health in view of climate change and the COVID-19 pandemic.
