Transdisciplinary Systems Engineering Azad M. Madni,2017-10-05 This book explores the ways that disciplinary convergence and technological advance are transforming systems engineering to address gaps in complex systems engineering: Transdisciplinary Systems Engineering (TSE). TSE reaches beyond traditional disciplines to find connections—and this book examines a range of new methods from across such disparate areas of scholarship as computer science, social science, human studies, and systems design to reveal patterns, efficiencies, affordances, and pathways to intuitive design. Organized to serve multiple constituencies, the book stands as an ideal textbook supplement for graduate courses in systems engineering, a reference text for program managers and practicing engineers in all industries, and a primary source for researchers engaged in multidisciplinary research in systems engineering and design.

Written by a group of researchers and experienced practitioners, the book presents a combination of theory, hands-on experience, and insight from DHH students. The book brings together a variety of tried and tested teaching ideas primarily designed to be used for classroom work as a basis for standby lessons or to supplement courses. Placing considerable emphasis on practical strategies, it provides educators and practitioners with stimulating ideas that facilitate the emergence of fluency and communication skills. The chapters cover a wide range of interventions and strategies including early education teaching strategies, using sign -bilingualism in the classroom,

enhancing oral communication, speech visualization, improving pronunciation, using films and cartoons, lip reading techniques, written support, and harnessing writing as a memory strategy. Full of practical guidance grounded in theory, the book will be a useful resource for English teachers and all those involved in the education of deaf and hard of hearing learners across the world; including researchers, student teachers, newly qualified teachers, school supervisors, and counsellors.

English as a Foreign Language for Deaf and Hard-of-Hearing Persons Ewa Domagała-Zyśk, Edit H. Kontra, 2016-09-23 Deaf and hard-of-hearing students form a specific group of foreign language learners. They need to use foreign languages just like their hearing peers if they want to enjoy the same benefits of globalization and technical advancements of today, yet they cannot take part in the same foreign language education. As sign language users, lip-readers or persons relying on hearing aids or cochlear implants in their everyday communication, they need special support in learning a foreign language. This book has been written by teachers and researchers involved in teaching English as a foreign language (EFL) to deaf and hard-of-hearing students in various different European countries, including the Czech Republic, France, Hungary, Norway, Poland, and Serbia. The chapters mirror both the authors' personal journeys through this field and give insight into various aspects of empirical research into the foreign language acquisition of hearing-impaired learners. They discuss mainly the issue of specific methodology for teaching EFL vocabulary, grammar, reading, writing and speaking to deaf and hard-of-hearing persons and the challenge of effective communication during the classes via sign language, cued speech or the oral approach. Special chapters are also devoted to EFL teachers' experience in special schools for the deaf. Educators interested in practical advice, responses to challenges and worked-out solutions to problems will particularly welcome this book as a useful source of ideas. It will also help novice teachers embarking on their careers in English language education for deaf and hard-of-hearing children and adults.

Variations on Uzbek Identity Peter Finke, 2014-02-28 Throughout its history the concept of Uzbekness, or more generally of a Turkic-speaking sedentary population, has continuously attracted members of other groups to join, as being Uzbek promises opportunities to enlarge one's social network. Accession is comparatively easy, as Uzbekness is grounded in a cultural model of territoriality, rather than genealogy, as the basis for social attachments. It acknowledges regional variation and the possibility of membership by voluntary decision. Therefore, the boundaries of being Uzbek vary almost by definition, incorporating elements of local languages, cultural patterns and social organization. This book combines an historical analysis with thorough ethnographic field research, looking at differences in the conceptualization of group boundaries and the social practices they entail. It does so by analysing decision-making processes by Uzbeks on the individual as well as cognitive level and the political configurations that surround them.

Reassembling the Republic of Letters in the Digital Age Howard Hotson, Thomas Wallnig, 2019 Between 1500 and 1800, the rapid evolution of postal communication allowed ordinary men and women to scatter letters across Europe like never before. This exchange helped knit together what contemporaries called the 'respublica litteraria', a knowledge-based civil society, crucial to that era's intellectual breakthroughs, formative of many modern values and institutions, and a potential cornerstone of a transnational level of European identity. Ironically, the exchange of letters which created this community also dispersed the documentation required to study it, posing enormous difficulties for historians of the subject ever since. To reassemble that scattered material and chart the history of that imagined community, we need a revolution in digital

communications. Between 2014 and 2018, an EU networking grant assembled an interdisciplinary community of over 200 experts from 33 different countries and many different fields for four years of structured discussion. The aim was to envisage transnational digital infrastructure for facilitating the radically multilateral collaboration needed to reassemble this scattered documentation and to support a new generation of scholarly work and public dissemination. The framework emerging from those discussions – potentially applicable also to other forms of intellectual, cultural and economic exchange in other periods and regions – is documented in this book.

The Iraq War Ronald D. Lankford, Jr., 2010 Behind each policy debate over welfare reform, AIDS funding, and hate crime laws are the people struggling with poverty, illness, and discrimination. While the experts cite statistics and employ rhetoric about drug abuse, crime, and child abuse, individuals confront the horrors of addiction and the trauma of victimization.
