Ice Rivers Jemma Wadham, 2022-10-25 A passionate eyewitness account of the mysteries and looming demise of glaciers—and what their fate means for our shared future The ice sheets and glaciers that cover one-tenth of Earth's land surface are in grave peril. High in the Alps, Andes, and Himalaya, once-indomitable glaciers are retreating, even dying. Meanwhile, in Antarctica, thinning glaciers may be unlocking vast quantities of methane stored for millions of years beneath the ice. In *Ice Rivers*, renowned glaciologist Jemma Wadham offers a searing personal account of glaciers and the rapidly unfolding crisis that they—and we—face. Taking readers on a personal journey from Europe and Asia to Antarctica and South America, Wadham introduces majestic glaciers around the globe as individuals—even friends—each with their own unique character and place in their community. She challenges their first appearance as silent, passive, and lifeless, and reveals that glaciers are, in fact, as alive as a forest or soil, teeming with microbial life and deeply connected to almost everything we know. They influence crucial systems on which people depend, from lucrative fisheries to fertile croplands, and represent some of the most sensitive and dynamic parts of our world. Their fate is inescapably entwined with our own, and unless we act to abate the greenhouse warming of our planet the potential consequences are almost unfathomable. A riveting blend of cutting-edge research and tales of encounters with polar bears and survival under the midnight sun, *Ice Rivers* is an unforgettable portrait of—and love letter to—our vanishing icy wildernesses.

*39 Ways to Save the Planet* Tom Heap, 2021-10-14 We got ourselves into this. Here's how we can get ourselves out. We know the problem: the amount of biodiversity loss, the scale of waste and pollution, the amount of greenhouse gas we pump into the air... it's unsustainable. We have to do something. And we are resourceful, adaptable and smart. We have already devised many ways to reduce climate change - some now proven, others encouraging and craving uptake. Each one is a solution to get behind. In *39 Ways to Save the Planet*, Tom Heap reveals some of the real-world solutions to climate change that are happening around the world, right now. From tiny rice seeds and fossil fuel free steel to grazing elk and carbon-capturing seagrass meadows, each chapter reveals the energy and optimism in those tackling the fundamental problem of our age. Accompanying a major BBC Radio 4 series in collaboration with the Royal Geographical Society, *39 Ways to Save the Planet* is a fascinating exploration of our attempt to build a better future, one solution at a time. A roadmap to global action on climate change, it will encourage you to add your own solutions to the list.

**Antarcticness** Ilan Kelman, 2022-02-08 Antarcticness joins disciplines, communication approaches and ideas to explore meanings and depictions of Antarctica. Personal and professional words in poetry and prose, plus images, present and represent Antarctica, as presumed and as imagined, alongside what is experienced around the continent and by those watching from afar. These understandings explain how the Antarctic is viewed and managed while identifying aspects which should be more prominent in policy and practice. The authors and artists place Antarctica, and the perceptions and knowledge through Antarcticness, within inspirations and imaginations, without losing sight of the multiple interests pushing the continent's governance as it goes through rapid political and environmental changes. Given the diversity and disparity of the influences and changes, the book's contributions connect to provide a more coherent and encompassing perspective of how society views Antarctica, scientifically and artistically, and what the continent provides and could provide politically, culturally and environmentally. Offering original research, art and interpretations of different experiences and explorations of Antarctica, explanations meld with narratives while academic analyses overlap with first-hand experiences of what Antarctica does and does not – could and could not – bring to the world.

*The Ministry for the Future* Kim Stanley Robinson, 2020-10-06 ONE OF BARACK OBAMA'S FAVOURITE READS OF THE YEAR 'If I could get policymakers and citizens everywhere to read just one book this year, it would be Kim Stanley Robinson's *The Ministry for the Future*' Ezra Klein, Vox 'A great read' Bill Gates *The Ministry for the Future* is a masterpiece of the imagination, using fictional eyewitness accounts to tell the story of how climate change will affect us all. Its setting is not a desolate, postapocalyptic world, but a future that is almost upon us. Chosen by Barack Obama as one of his favorite books of the year, this extraordinary novel from visionary writer Kim Stanley Robinson will change the way you think about the climate crisis. 'A novel that presents a rousing vision of how we might unite to overcome the greatest challenge of our time' TED.com 'A breathtaking look at the challenges that face our planet in all their sprawling magnitude and also in their intimate, individual moments of humanity' Booklist (starred review) 'Gutsy, humane . . . a must-read for anyone worried about the future of the planet' Publishers Weekly (starred review) 'A sweeping epic about climate change and humanity's efforts to try and turn the tide before it's too late' Polygon (Best of the Year) 'Steely, visionary optimism' Guardian

**Africa Is Not a Country** Dipo Faloyin, 2022-04-07 Definitive proof that Africa is \*not\* a country. A lively, entertaining and informative portrait of modern Africa that pushes back against harmful stereotypes. Over a billion people have been reduced to one simple story. *Africa Is Not a Country* fills in the gaps. So often Africa is depicted simplistically as a red landscape of safaris and famines. In this funny, insightful book Dipo Faloyin corrects this view to create a fresh and positive view of the continent. By turns intimate and political, he looks at buzzy urban life in Lagos and the lively West African rivalry over who makes the best jollof rice, before giving us the story of democracy in seven dictatorships, an insight into different

regional accents and the colonial foundation of many countries which are still younger than your grandparents. We learn about the dangers of white saviours and the cultural significance of Aunties, and he provides us with a tour guide of where citizens of several African countries need to travel to visit their own cultural artefacts - 90% of which are in museums outside the continent. We immerse ourselves in the energy and fabric of many different cultures and communities as Dipo shows his deep love of the region - as a concept, as a promise and as a reality.
