**Art Matters** Neil Gaiman, Chris Riddell, 2019-01-15 A stunning and timely creative call-to-arms combining four extraordinary written pieces by Neil Gaiman illustrated with the striking four-color artwork of Chris Riddell. “The world always seems brighter when you’ve just made something that wasn’t there before.”—Neil Gaiman Drawn from Gaiman’s trove of published speeches, poems, and creative manifestos, *Art Matters* is an embodiment of this remarkable multi-media artist’s vision—an exploration of how reading, imagining, and creating can transform the world and our lives. *Art Matters* bring together four of Gaiman’s most beloved writings on creativity and artistry: “Credo,” his remarkably concise and relevant manifesto on free expression, first delivered in the wake of the Charlie Hebdo shootings “Make Good Art,” his famous 2012 commencement address delivered at the Philadelphia University of the Arts “Making a Chair,” a poem about the joys of creating something, even when words won’t come “On Libraries,” an impassioned argument for libraries that illuminates their importance to our future and celebrates how they foster readers and daydreamers Featuring original illustrations by Gaiman’s longtime illustrator, Chris Riddell, *Art Matters* is a stirring testament to the freedom of ideas that inspires us to make art in the face of adversity, and dares us to choose to be bold.

*Metal Soaps in Art* Francesca Casadio, Katrien Keune, Petria Noble, Annelies Van Loon, Ella Hendriks, Silvia A. Centeno, Gillian Osmond, 2019-03-23 This go-to reference work surveys the current state of knowledge in the field of metal soap-related degradation phenomena in art works. It contains detailed descriptions and images of the different phenomena and addresses the practical aspects of soap formation, preventive conservation, and treatment. The occurrence of metal soaps is one of the defining issues in the conservation of painted surfaces, and one that presently leaves innumerable open questions. It is estimated that around 70% of paintings in museum collections are affected by some form of metal soap-related degradation. In recent years, significant advances have been made in the detection and characterization of these compounds through interdisciplinary approaches including conventional spectroscopy and microscopy as well as emerging synchrotron-based techniques. This book for the first time captures a panoramic overview of the state of knowledge of metal soaps related to both scientific analysis and implications for conservation and treatment. It also critically examines open questions. The book is accessible to audiences with varied backgrounds (e.g. conservators, students of conservation science) while simultaneously presenting the technical details indispensable for academics and researchers active in this field.

North American Women Artists of the Twentieth Century Jules Heller, Nancy G. Heller, 2013-12-19 First Published in 1997. North American Women Artists of the Twentieth Century: A Biographical Dictionary was created to fill a gap of there being a comprehensive reference work like this available, even though the bibliography in English on various aspects of the history of women artists has grown exponentially during the past ten years. As researchers, the editors have been frustrated many times by being unable to locate basic information about many of the artists included in this volume—especially those working outside the United States. This leads directly to another reason for producing this particular kind of reference book—to try and create a better understanding between and among the artists and art audiences in these countries.

It is the ambition of this book to bring together the various aspect of time in photography as well as of photography in time, and to illustrate them in a series of case studies that focus on seminal authors (e.g. Fox Talbot, Victor Burgin, Robert Morris) and genres (e.g. spirit photography, montage photobooks and tableau photography), with examples ranging from the very first photographic pictures to the most recent cross-medial uses of photography in and outside art.
