Purchase of the print or Kindle book includes a free PDF eBook

Key Features

- Learn to diagnose the need for regularization in any machine learning model
- Regularize different ML models using a variety of techniques and methods
- Enhance the functionality of your models using state of the art computer vision and NLP techniques

Book Description

Regularization is an infallible way to produce accurate results with unseen data, however, applying regularization is challenging as it is available in multiple forms and applying the appropriate technique to every model is a must. The Regularization Cookbook provides you with the appropriate tools and methods to handle any case, with ready-to-use working codes as well as theoretical explanations. After an introduction to regularization and methods to diagnose when to use it, you'll start implementing regularization techniques on linear models, such as linear and logistic regression, and tree-based models, such as random forest and gradient boosting. You'll then be introduced to specific regularization methods based on data, high cardinality features, and imbalanced datasets. In the last five chapters, you'll discover regularization for deep learning models. After reviewing general methods that apply to any type of neural network, you'll dive into more NLP-specific methods for RNNs and transformers, as well as using BERT or GPT-3. By the end, you'll explore regularization for computer vision, covering CNN specifics, along with the use of generative models such as stable diffusion and Dall-E. By the end of this

book, you'll be armed with different regularization techniques to apply to your ML and DL models. What you will learn

The First Wife Erica Spindler,2015-02-10 As a child, Bailey Browne dreamed of a knight in shining armor swooping in to rescue her and her mother. As she grows older, those dreams transform, becoming ones of a mysterious stranger who will sweep her off her feet and whisk her away from her ordinary existence. Then, suddenly, there he is. Despite the ten year difference in their ages, her working class upbringing and his of privilege, Logan Abbott and Bailey fall deeply in love. Marriage quickly follows. But when Logan brings her home to his horse farm in Louisiana, a magnificent estate on ninety wooded acres, her dreams of happily-ever-after begin to unravel. A tragic family history she knew nothing about surfaces, plus whisperings about the disappearance of his first wife, True, and rumors about the women from the area who have gone missing—and when another woman disappears, all signs point to her husband's involvement. At first Bailey ignores the whispers, even circumstantial evidence against Logan mounts. But finally, Bailey must make a choice: believe what everyone says—or bet her life on the man she loves, but is realizing she hardly knows. From the author of *Justice for Sara*, Erica

Signal Traffic Lisa Parks, Nicole Starosielski, 2015-05-14 The contributors to *Signal Traffic* investigate how the material artifacts of media infrastructure--transoceanic cables, mobile telephone towers, Internet data centers, and the like--intersect with everyday life. Essayists confront the multiple and hybrid forms networks take, the different ways networks are imagined and engaged with by publics around the world, their local effects, and what human beings experience when a network fails. Some contributors explore the physical objects and industrial relations that make up an infrastructure. Others venture into the marginalized communities orphaned from the knowledge economies, technological literacies, and epistemological questions linked to infrastructural formation and use. The wide-ranging insights delineate the oft-ignored contrasts between industrialized and developing regions, rich and poor areas, and urban and rural settings, bringing technological differences into focus. Contributors include Charles R. Acland, Paul Dourish, Sarah Harris, Jennifer Holt and Patrick Vonderau, Shannon Mattern, Toby Miller, Lisa Parks, Christian Sandvig, Nicole Starosielski, Jonathan Sterne, and Helga Tawil-Souri.

The Thika Highway Improvement Project Renard Teipelke,2013-12-04 Theory and practice of high-capacity infrastructure projects are the major focus in the development of countries in the Global South. Aiming at a more fine-grained understanding of such projects, Renard Teipelke studies the Thika Highway Improvement Project (THIP) and its outcomes in the peri-urban Northern Nairobi Metropolitan Region. The THIP is a large transportation infrastructure project that expanded the dual carriageway Thika Road into an eight-lane highway from 2008 until 2012. Based on a strategic mix of methodological approaches, such as interviews with experts in Kenya, literature research and field visits, the 'black box' THIP is opened up. In the empirical analysis, the project's idea, its design, and its implementation are studied. It is concluded that the project's outcomes are ambivalent - partly living up to the expectations of THIP proponents but not resulting in shared benefits for all concerned stakeholders due to flaws in managing the development in this peri-urban transport corridor area, thereby fitting into the Kenyan context of politics and planning.

Poke the Box Seth Godin,2015-09-15 A one-two punch! Half kick in the ass, half cheerleading encouragement. —Steven Pressfield, author of *The War of Art* If you are happy being just a dreamer, perhaps you don't need this book. If you're enjoying the status quo, don't even consider reading this book. If you are content waiting for success to find you, please put this book down and go find something else to read. Why has *Poke the Box* become a cult classic? Because it's a book that dares readers to do something they're afraid of. It could be what you need, too. Is Seth Godin the Pied Piper for however

New Zealand with a Hobbit Botherer John Gisby, 2005-01-01 What should you do if your spouse becomes addicted to the Lord of the Rings movies and swoons at the very mention of Orlando Bloom's name? (Thud. Quick, fetch the smelling salts.) How about taking the advice of a strange apparition that reveals itself in a dream? An apparition that looks remarkably like the director of the movies, Peter Jackson, but not quite remarkably enough to prompt legal action. An apparition that recommends touring New Zealand in an effort to prove that its sheep pastures aren't really filled by frolicking Hobbits. Just sheep and the occasional zorbing local. This is the hilarious tale of such a tour, featuring snow capped mountains and turquoise lakes, flightless birds and flying cattle, bungy jumping grannies and the carrot mafia, strange yellow eyes peering up from a road map and hotel receptionists always desperate to know win you are living.
