The Kuomintang and the Democratization of Taiwan Steven J Hood, 2020-03-31 Is the Kuomintang - the nationalist party of China - the villain it is sometimes portrayed to be? Or is it the embodiment of the political and moral good that partisans have claimed it to be? The party has managed a feat of economic modernization in Taiwan and has become a proponent of democracy, yet its reputation has been marred by brutal acts of repression and ineptitude. Focusing on the role of Kuomintang party elites in the democratization process in Taiwan, this book considers the Kuomintang's evolution from a Leninist state party to a fractious one in a competitive political system.

Aborigines of Taiwan Josiane Cauquelin, 2004-07-31 Based on extensive field research over a period of twenty years, this is the first comprehensive study of the Puyuma people of Taiwan. The Puyuma belong to the Austronesian peoples, which today number less than 370,000. In Taiwan, they are the least known of the aboriginal groups, numbering only 6000, and inhabiting the Southeastern province of Taitung. The study looks at the historical changes in the status and definition of these people in relation to the central state, the criteria by which people determine their own ethnic identity, and the evolution of that identity through history. The increasing awareness in the West of the importance of ethnic relations makes this an especially timely book.

Featuring contributions by recognized experts, China Steps Out analyzes and explains China's strategies in Southeast Asia, Central Asia, South Asia, Africa, Middle East, and Latin America, and evaluates their effectiveness. This book explains how other countries perceive and respond to China's growing engagement and influence. Using a regional approach, the authors are able to make comparisons among regions based on their economic, political, military, and social characteristics, and consider the unique features of Chinese engagement in each region and the developing world as a whole. China Steps Out will be of great interest to students and scholars of Chinese foreign policy, comparative political economy, and international relations.

Interior. Chinatown Charles Yu, Cum arată viața cuiva care nu se simte protagonistul propriei existențe? Care sunt constrângerile unei astfel de vieți? Ce și până unde îi este permis să viseze? Willis Wu și-a dorit dintotdeauna să fie Tipul Care Se Pricepe La Kung Fu, dar până una alta, trebuie să se mulțumească cu a fi unul dintre miile de Bărbați Asiatici Generici care-și găsesc un rost pe platourile de filmare ale serialelor polițiste de la Hollywood. Își va îndeplini el visul, va reuși el să-și găsească locul în marea narațiune americană și dacă da, cu ce preț? O deoalare caustică a visului american, o perspectivă empatică față de cei care se străduiesc, dar nu reușesc să se integreze și o explorare plină de umor și de autoironie a stereotipurilor rasiale din America.

Salvador Dalí: The Impossible Collection Paul Moorhouse, 2020-11-01 In the popular imagination, possibly no other artist's work is more recognizable than that of Salvador Dalí. Indeed, for many he is the ultimate mad artist, whose singular vision remorselessly probed his own psychological depths. His nightmarish visions and bizarre landscapes express the angst and turbulence of the twentieth century. Dalí's creativity embraced many different modes of expression and was never constrained by any one style. Over eight decades, the prodigious range of Dalí's activity spanned every conceivable medium, from painting and drawing to sculpture, film, furniture, books, stage design and jewelry, not to mention his highly eccentric public persona, which could be considered an art form in itself.

How Taiwan Became Chinese Tonio Andrade, 2008 At the beginning of the 1600s, Taiwan was a sylvan backwater, sparsely inhabited by headhunters and visited mainly by pirates and fishermen. By the end of the century it was home to more than a hundred thousand Chinese colonists, who grew rice and sugar for export on world markets. This book examines this remarkable transformation. Drawing primarily on Dutch, Spanish, and Chinese sources, it argues that, paradoxically, it was Europeans who started the large scale Chinese colonization of the island: the Spanish, who had a base on northern Taiwan from 1626 to 1642, and, more importantly, the Dutch, who had a colony from 1623 to 1662. The latter enticed people from the coastal province of Fujian to Taiwan with offers of free land, freedom from taxes, and economic subventions, creating a Chinese colony under European rule. Taiwan was thus the site of a colonial conjuncture, a system that the author calls co-colonization. The Dutch relied closely on Chinese colonists for food, entrepreneurship, translation, labor, and administrative help. Chinese colonists relied upon the Dutch for protection from the headhunting aborigines and, sometimes, from other Chinese groups, such as the pirates who ranged the China Seas. In its analysis the book sheds light on one of the most important questions of global history: how do we understand the great colonial movements that have shaped our modern world? By examining Dutch, Spanish, and Han colonization in one island, it offers a compelling answer: Europeans managed to establish colonies throughout the globe not primarily because of technological superiority but because their states sponsored overseas colonialism whereas Asian states, in general, did not. Indeed, when Asian states did, European colonies were vulnerable, and the book ends with the capture of Taiwan by a Chinese army, led by a Chinese warlord named Zheng Chenggong.

Disease Control Priorities, Third Edition (Volume 6) King K. Holmes, Stefano Bertozzi, Barry R. Bloom, Prabhat Jha, 2017-11-06 Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases.

Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases.
