Island of Vice Richard Zacks, 2012-03-13 A ROLLICKING NARRATIVE HISTORY OF THEODORE ROOSEVELT'S EMBATTLED TENURE AS POLICE COMMISSIONER OF CORRUPT, PLEASURE-LOVING NEW YORK CITY IN THE 1880s, AND HIS DOOMED MISSION TO WIPE OUT VICE In the 1890s, New York City was America's financial, manufacturing, and entertainment capital, and also its preferred destination for sin, teeming with 40,000 prostitutes, glittering casinos, and all-night dives packed onto the island's two dozen square miles. Police captains took hefty bribes to see nothing while reformers writhed in frustration. In *Island of Vice*, bestselling author Richard Zacks paints a vivid picture of the lewd underbelly of 1890s New York, and of Theodore Roosevelt, the cocksure crusading police commissioner who resolved to clean up the bustling metropolis, where the silk top hats of Wall Street bobbed past teenage prostitutes trawling Broadway. Writing with great wit and zest, Zacks explores how Roosevelt went head-to-head with corrupt Tammany Hall, took midnight rambles with muckraker Jacob Riis, banned barroom drinking on Sundays, and tried to convince 2 million New Yorkers to enjoy wholesome family fun. In doing so, Teddy made a ruthless enemy of police captain "Big Bill" Devery, who grew up in the Irish slums and never tired of fighting "tin soldier" reformers. Roosevelt saw his mission as a battle of good versus evil; Devery saw prudery standing in the way of fun and profit. When righteous Roosevelt's vice crackdown started to succeed all too well, many of his own supporters began to turn on him. Cynical newspapermen mocked his quixotic quest, his own political party abandoned him, and Roosevelt discovered that New York loves its sin more than its salvation. Zacks's meticulous research and wonderful sense of narrative verve bring this disparate cast of both pious and bawdy New Yorkers to life. With cameos by Stephen Crane, J. P. Morgan, and Joseph Pulitzer, plus a horde of very angry cops, *Island of Vice* is an unforgettable portrait of turn-of-the-century New York in all its seedy glory, and a brilliant portrayal of the energetic, confident, and zealous Roosevelt, one of America's most colorful public figures.

principles such as hierarchy, human scale, unity, harmony, asymmetry, colour, form and texture. This is followed by an examination of project management and landscape management techniques. Finally, the book explores educational and employment opportunities and the future of the profession in the context of climate change and sustainability. Exploring Digital Design Ina Wagner, Tone Bratteteig, Dagny Stuedahl, 2010-08-12 *Exploring Digital Design* takes a multi-disciplinary look at digital design research where digital design is embedded in a larger socio-cultural context. Working from socio-technical research areas such as Participatory Design (PD), Computer Supported Cooperative Work (CSCW) and Human-Computer Interaction (HCI), the book explores how humanities offer new insights into digital design, and discusses a variety of digital design research practices, methods, and theoretical approaches spanning established disciplinary borders. The aim of the book is to explore the diversity of contemporary digital design practices in which commonly shared aspects are interpreted and integrated into different disciplinary and interdisciplinary conversations. It is the conversations and explorations with humanities that further distinguish this book within digital design research. Illustrated with real examples from digital design research practices from a variety of research projects and from a broad range of contexts *Exploring Digital Design* offers a basis for understanding the disciplinary roots as well as the interdisciplinary dialogues in digital design research, providing theoretical, empirical, and methodological sources for understanding digital design research. The first half of the book *Exploring Digital Design* is authored as a multi-disciplinary approach to digital design research, and represents novel perspectives and analyses in this research. The contributors are Gunnar Liestøl, Andrew Morrison and Christina Mörtberg in addition to the editors. Although primarily written for researchers and graduate students, digital design practitioners will also find the book useful. Overall, *Exploring Digital Design* provides an excellent introduction to, and resource for, research into digital design.

Francis Kéré and Iwan Baan: Momentum of Light, 2021-09-07 Two stars of contemporary architecture explore the unique handling of light and heat in the architecture of Burkina Faso Across the African continent, but especially in the sub-Saharan regions, the light has a particularly stark quality, which becomes most apparent in relation to older buildings. Before electricity, architecture was required to make use of the sun as a light source within a building, while also protecting its inhabitants from the heat. This resulted in vernacular architecture that features very few or small openings, which consequently render the inside of a building near pitch black, while the outside is illuminated by sunshine that bears down mercilessly. On the initiative of the lighting technology company Zumtobel Group, photographer Iwan Baan (born 1975) and architect Francis Kéré (born 1965) set out to capture how the sun's natural light cycle shapes vernacular architecture in

Burkina Faso with little to no artificial light sources. They traveled to three exemplary locations: communal compounds in Gando; the main mosque of Bobo Dioulasso; and the terraced houses in Dano. Baan's pictures are accompanied by architectural sketches by Francis Kéré, who himself grew up in this light environment and whose architecture is inspired by it. The stunning photographs are printed using a special technique, to give a sense of being immersed in the very light conditions documented here.

Victorian Fairy Tales Michael Stuart Newton, 2015 The Victorian fascination with fairyland is reflected in the literature of the period, which includes some of the most imaginative fairy tales ever written. They offer the shortest path to the age's dreams, desires, and wishes. Authors central to the nineteenth-century canon such as Thackeray, Oscar Wilde, Ford Madox Ford, and Rudyard Kipling wrote fairy tales, and authors primarily famous for their work in the genre include George MacDonald, Juliana Ewing, Mary De Morgan, and Andrew Lang. This anthology brings together fourteen of the best stories, by these and other outstanding practitioners, to show the vibrancy and variety of the form and its ability to reflect our deepest concerns. The stories in this selection range from pure whimsy and romance to witty satire and darker, uncanny mystery. Paradox proves central to a form offered equally to children and adults. Fairyland is a dynamic and beguiling place, one that permits the most striking explorations of gender, suffering, love, family, and the travails of identity. Michael Newton's introduction and notes explore the literary marketplace in which these tales appeared, as well as the role they played in contemporary debates on scepticism and belief. The book also includes a selection of original illustrations by some of the masters of the field such as Richard Doyle, Arthur Hughes, and Walter Crane.

Landscapes of Pilgrimage in Medieval Britain Martin Locker, 2015-02-13 This book seeks to address the journeying context of pilgrimage within the landscapes of Medieval Britain. Using four case studies, an interdisciplinary methodology developed by the author is applied to four different geographical and cultural areas of Britain (Norfolk, Wiltshire/Hampshire, Flintshire/Denbighshire and Cornwall), to investigate the practicalities of travel along the Medieval road network including the routes themselves, accommodation, the built environments and natural topographies encountered. An introduction, assessment of current theory and scholarship is provided, followed by an explanation of the methodology used. The four case studies are then presented (Ely to Walsingham, Salisbury to Winchester, St Asaph to Holywell, and Camelford to Bodmin). Within each case study, both the selected starting point for the pilgrimage (typically either a locale confirmed in the historical record as linked to the pilgrim destination, or a settlement of some significance within the local area and thus well connected to the route network), and the site of the saint cult itself are analysed for their growth, reaction and accommodation to the pilgrim phenomenon. Also addressed are the route networks of the county as a whole, relationships to economic centres and their impact on travel possibilities, the topography, the distribution patterns for saint dedications in parish churches within the area, material culture and the ecclesiastical built environment (for example pilgrim badges, monasteries), and the physical landscapes through which the pilgrim travels. Here, the interaction between the pilgrim and the environments through which they move is addressed. Considerations include fatigue, exertion, panoramas and way-finding, route visibility, sight lines to monuments, folklore within the landscape, and the potential echoing of Christian scriptural motifs within certain landscape types/features (e.g. wilderness and sanctuary). Within the final section of the book these themes are compared and expanded into the broader context of pilgrimage not only in Medieval Christendom, but within Buddhist, Hindu and Islamic religious traditions, in order to demonstrate the methodology's validity and flexibility in addressing pilgrimage holistically. Comparisons are made between the local and universal pilgrim routes in terms of material culture, landscape interaction and travel practicalities, and suggestions for future research and development of the pilgrim

studies field are also provided.

The Central Park Cynthia S. Brenwall, Martin Filler, 2019-04-16 A pictorial history of the development of New York City's Central Park from conception to completion. Drawing on the unparalleled collection of original designs for Central Park in the New York City Municipal Archives, Cynthia S. Brenwall tells the story of the creation of New York's great public park, from its conception to its completion. This treasure trove of material ranges from the original winning competition entry; to meticulously detailed maps; to plans and elevations of buildings, some built, some unbuilt; to elegant designs for all kinds of fixtures needed in a world of gaslight and horses; to intricate engineering drawings of infrastructure elements. Much of it has never been published before. A virtual time machine that takes the reader on a journey through the park as it was originally envisioned, *The Central Park* is both a magnificent art book and a message from the past about what brilliant urban planning can do for a great city.

The Design-Build Studio Tolya Stonorov, 2017-09-20 The Design-Build Studio examines sixteen international community driven design-build case studies through process and product, with preceding chapters on community involvement, digital and handcraft methodologies and a graphic Time Map. Together these projects serve as a field guide to the current trends in academic design-build studios, a window into the different processes and methodologies being taught and realized today. Design-build supports the idea that building, making and designing are intrinsic to each other: knowledge of one strengthens and informs the expression of the other. Hands-on learning through the act of building what you design translates theories and ideas into real world experience. The work chronicled in this book reveals how this type of applied knowledge grounds us in the physicality of the world in which we live.

The Well-Tempered City Jonathan F. P. Rose, 2016-09-13 2017 PROSE Award Winner: Outstanding Scholarly Work by a Trade Publisher In the vein of Jane Jacobs's *The Death and Life of Great American Cities* and Edward Glaeser's *Triumph of the City*, Jonathan F. P. Rose—a visionary in urban development and renewal—champions the role of cities in addressing the environmental, economic, and social challenges of the twenty-first century. Cities are birthplaces of civilization; centers of culture, trade, and progress; cauldrons of opportunity—and the home of eighty percent of the world's population by 2050. As the 21st century progresses, metropolitan areas will bear the brunt of global megatrends such as climate change, natural resource depletion, population growth, income inequality, mass migrations, education and health disparities, among many others. In *The Well-Tempered City*, Jonathan F. P. Rose—the man who “repairs the fabric of cities”—distills a lifetime of interdisciplinary research and firsthand experience into a five-pronged model for how to design and reshape our cities with the goal of equalizing their landscape of opportunity. Drawing from the musical concept of “temperament” as a way to achieve harmony, Rose argues that well-tempered cities can be infused with systems that bend the arc of their development

toward equality, resilience, adaptability, well-being, and the ever-unfolding harmony between civilization and nature. These goals may never be fully achieved, but our cities will be richer and happier if we aspire to them, and if we infuse our every plan and constructive step with this intention. A celebration of the city and an impassioned argument for its role in addressing the important issues in these volatile times, *The Well-Tempered City* is a reasoned, hopeful blueprint for a thriving metropolis—and the future.

The Cemetery Keeper's Wife Maryann McFadden, 2018-05-08 Indie Award winner Maryann McFadden takes you from present day to Victorian Hackettstown, NJ, as Rachel, the new cemetery keeper's wife, tries to unravel the mysterious rape and murder of Tillie Smith in 1886. *THE CEMETERY KEEPER'S WIFE* is a story about the power of the past and the hope of redemption that comes from uncovering the truth.

The Accidental Playground Daniel Campo, 2013-09-10 *The Accidental Playground* explores the remarkable landscape created by individuals and small groups who occupied and rebuilt an abandoned Brooklyn waterfront in Williamsburg. Without formal authority, capital, professional assistance, grand vision, consensus, or coordination with each other, these vernacular builders transformed a vacated waterfront railroad yard into a unique setting for recreation and creative endeavor. With the Manhattan skyline as its backdrop, the collapsing piers, eroded bulkhead, and remaining building foundations of the former Brooklyn Eastern District Terminal (BEDT) became the raw materials for various forms of waterside leisure and social spaces. Lacking predetermined rules governing its use, this waterfront evolved into the home turf for unusual and sometimes spectacular recreational, social, and creative subcultures. These included skateboarders who built a short-lived, but nationally renowned skatepark; a twenty-five-piece public marching band, fire performance troupes, and a variety of artists, photographers, and filmmakers. At the same time the site also served basic recreational needs of local residents. Collapsing piers became great places to catch fish, sunbathe, or take in the Manhattan skyline; the foundation of a demolished warehouse became an ideal place to practice music or skateboard; rubble-strewn earth became a compelling setting for film and fashion shoots; broken bulkhead became a beach; and thick patches of weeds dotted by ailanthus trees became a jungle. Drawing on a rich mix of documentary strategies including observation, ethnography, photography, and first-person narrative, Daniel Campo probes this accidental playground, allowing those who created it to share and examine their own narratives, perspectives, and conflicts. The multiple constituencies of this Williamsburg waterfront were surprisingly diverse, their stories colorful and provocative. When taken together, Campo argues, they suggest a radical reimagining of urban public space, the waterfront, and the practices by which they are created and maintained. *The Accidental Playground*, which treats readers to an utterly compelling story, is an exciting and distinctive contribution to the growing literature on the unplanned and the undesigned spaces and activities in cities today.
