*The Analytical Chemistry of Cannabis* Brian F Thomas, Mahmoud ElSohly, 2015-12-01 A volume in the Emerging Issues in Analytical Chemistry series, *The Analytical Chemistry of Cannabis: Quality Assessment, Assurance, and Regulation of Medicinal Marijuana and Cannabinoid Preparations* provides analytical chemistry methods that address the latest issues surrounding cannabis-based products. The plethora of marketed strains of cannabis and cannabinoid-containing products, combined with the lack of industry standards and labelling requirements, adds to the general perception of poor quality control and limited product oversight. The methods described in this leading-edge volume help to support the manufacturing, labelling, and distribution of safe and consistent products with known chemical content and demonstrated performance characteristics. It treats analytical chemistry within the context of the diverse issues surrounding medicinal and recreational cannabis in a manner designed to foster understanding and rational perspective in non-scientist stakeholders as well as scientists who are concerned with bringing a necessary degree of order to a field now characterized by confusion and contradiction. The Emerging Issues in Analytical Chemistry series is published in partnership with RTI International and edited by Brian F. Thomas. The Fourth Industrial Revolution Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller

than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

The Glutathione Revolution Nayan Patel, 2020-09-08 Ward off life-threatening disease and symptoms of aging with this guide to boosting your levels of glutathione (GSH), the master antioxidant. The body has a remarkable ability to ward off disease and heal itself--and it does it with the help of the most important antioxidant you've never heard of: glutathione (GSH), the master antioxidant. This indispensable molecule--which we make ourselves--holds the key to immunity, vitality, and lifelong health, helping to flush out toxins, fight DNA-damaging free radicals, and rebuild other essential antioxidants like Vitamins C and E. It's been linked to longevity in centenarians, and it protects against diseases like cancer, diabetes, and Alzheimer's. It plays a role in lesser ailments too: low glutathione levels could be the culprit behind your fatigue, aches, and pains. At the forefront of the latest GSH research, Dr. Nayan Patel shares all the information you need to boost your glutathione levels, revitalize your body, and transform your life with this naturally-occurring super antioxidant. In *The Glutathione Revolution*, he addresses the most important questions about GSH: What exactly is glutathione? What happens when your GSH levels are low? What diseases does GSH ward off? How can you naturally increase the amount of GSH your cells produce? What foods should you eat--and not eat? What are the safest and most effective GSH supplements? With a wealth of practical information and three easy, accessible action plans that you can tailor to your own life and health concerns, you too can harness the power of glutathione.

**Jubilee** Toni Tipton-Martin, 2019-11-05 “A celebration of African American cuisine right now, in all of its abundance and variety.”—Tejal Rao, *The New York Times* JAMES BEARD AWARD WINNER • IACP AWARD WINNER • IACP BOOK OF THE YEAR • TONI TIPTON-MARTIN NAMED THE 2021 JULIA CHILD AWARD RECIPIENT NAMED ONE OF THE BEST COOKBOOKS OF THE YEAR BY *The New York Times Book Review* • *The New Yorker* • NPR • *Chicago Tribune* • *The Atlantic* • *BuzzFeed* • *Food52* Throughout her career, Toni Tipton-Martin has shed new light on the history, breadth, and depth of African American cuisine. She’s introduced us to black cooks, some long forgotten, who established much of what’s considered to be our national cuisine. After all, if Thomas Jefferson introduced French haute cuisine to this country, who do you think actually cooked it? In *Jubilee*, Tipton-Martin brings these masters into our kitchens. Through recipes and stories, we cook along with these pioneering figures, from enslaved chefs to middle- and upper-class writers and entrepreneurs. With more than 100 recipes, from classics such as Sweet Potato Biscuits, Seafood Gumbo, Buttermilk Fried Chicken, and Pecan Pie with Bourbon to lesser-known but even more decadent dishes like Bourbon & Apple Hot Toddlies, Spoon Bread, and Baked Ham Glazed with Champagne, *Jubilee* presents techniques, ingredients, and dishes that show the roots of African American cooking—deeply beautiful, culturally diverse, fit for celebration. Praise for *Jubilee* “There are precious few feelings as nice as one that comes from falling in love with a cookbook. . . . New techniques, new flavors, new narratives—everything so thrilling you want to make the recipes over and over again . . . this has been my experience with Toni Tipton-Martin’s *Jubilee*.”—Sam Sifton, *The New York Times* “Despite their deep roots, the recipes—even the oldest ones—feel fresh and modern, a testament to the essentiality of African-American gastronomy to all of American cuisine.”—*The New Yorker* “*Jubilee* is part-essential history lesson, part-brilliantly researched culinary artifact, and wholly functional, not to mention deeply delicious.”—*Kitchn* “Tipton-Martin has given us the gift of a clear view of the generosity of the black hands that have flavored and shaped American cuisine for over two centuries.”—*Taste*

*The Perennial Kitchen* Beth Dooley, 2021-05-04 Recipes and resources connect thoughtfully grown, gathered, and prepared ingredients to a healthy future--for food, farming, and humankind Knowing how and where food is grown can add depth and richness to a dish, whether a meal of slow-roasted short ribs on creamy polenta, a steaming bowl of spicy Hmong soup, or a triple ginger rye cake, kissed with maple sugar, honey, and sorghum. Here James Beard Award-winning author Beth Dooley provides the context of food's origins, along with delicious recipes, nutrition information, and tips for smart sourcing. More than a farm-to-table cookbook, *The Perennial Kitchen* expands the definition of local food to embrace regenerative agriculture, the method of growing small and large crops with ecological services. These farming methods, grounded in a land ethic, remediate the environmental damage caused by the monocropping of corn and soybeans. In this thoughtful collection the home cook will find both recipes and insights into artisan grains, nuts, fruits, and vegetables that are delicious and healthy--and also help retain topsoil, sequester carbon, and return nutrients to the soil. Here are crops that enhance our soil, nurture pollinators and song birds, rebuild rural economies, protect our water, and grow plentifully without toxic chemicals. These ingredients are as good for the planet as they are on our plates. Dooley explains how to stock the pantry with artisan grains, heritage dry beans, fresh flour, healthy oils, and natural sweeteners. She offers pointers on working with grass-fed beef and pastured pork and describes how to turn leftovers into tempting soups and stews. She makes the most of each season's bounty, from fresh garlic scape pesto to roasted root vegetable hummus. Here we learn how best to use nature's fast foods, the quick-cooking egg and ever-reliable chicken; how to work with alternative flours, as in gingerbread with rye or focaccia with Kernza®; and how to make plant-forward, nutritious vegan and vegetarian fare. Among other sweet pleasures, Dooley shares the closely held secret recipe from the University of Minnesota's student association for the best apple pie. Woven throughout the recipes is the most recent research on nutrition, along with a guide to sources and information that cuts through the noise and confusion of today's food labels and trends. Beth Dooley looks back into ingredients' healthy beginnings and forward to the healthy future they promise. At the center of it all is the cook, linking into the regenerative and resilient food chain with every carefully sourced, thoughtfully prepared, and delectable dish.
