*Engineering, Poverty, and the Earth* George D. Catalano, 2022-05-31 In the present work, the growing awareness in engineering of the profession's responsibility towards the environment and the poor is considered. The following approach is taken: a brief overview of the issues of poverty particularly in the U.S. and the deterioration of the natural world with a focus on the Arctic is provided. Case studies involving New Orleans in the aftermath of Hurricane Katrina and the status of polar bears in a time of shrinking Arctic ice cover are detailed. Recent developments in engineering related to the issues of poverty and the environment are discussed. A new paradigm for engineering based on the works of Leonardo Boff and Thomas Berry, one that places an important emphasis upon a community, is explored.

*Service-Oriented Mapping* Jürgen Döllner, Markus Jobst, Peter Schmitz, 2018-06-07 This book gathers various perspectives on modern map production. Its primary focus is on the new paradigm of "sharing and reuse," which is based on decentralized, service-oriented access to spatial data sources. Service-Oriented Mapping is one of the main paradigms used to embed big data and distributed sources in modern map production, without the need to own the sources. To be stable and reliable, this architecture requires specific frameworks, tools and procedures. In addition to the technological structures, organizational aspects and geographic information system (GIS) capabilities provide powerful tools to make modern geoinformation management successful. Addressing a range of aspects, including the implementation of the semantic web in geoinformatics, using big data for geospatial visualization, standardization initiatives, and the European spatial data infrastructure, the book offers a comprehensive introduction to decentralized map production. .

**The Roman Republic and the Hellenistic Mediterranean** Joel Allen,2019-04-17 Presents a history of the Roman Republic within the wider Mediterranean world, focusing on 330 to 30 BCE Broad in scope, this book uniquely considers the history of the Roman Republic in tandem with the rich histories of the Hellenistic kingdoms and city-states that endured after the death of Alexander the Great. It provides students with a full picture of life in the ancient Mediterranean world and its multitude of interconnections—not only between Rome and the Greek East, but also among other major players, such as Carthage, Judaea, and the Celts. Taking a mostly chronological approach, it incorporates cultural change alongside political developments so that readers get a well-balanced introduction to the era. The Roman Republic and the Hellenistic Mediterranean: From Alexander to Caesar offers great insight into a momentous era with chapters on Alexanders in Asia and Italy; Mediterranean Cosmopolitanism; The Path of Pyrrhus; The Three Corners of Sicily; The Expanding Roman Horizon; Hercules and the Muses; The Corinth-Carthage Coincidence; The Movements of the Gracchi; The New Men of Rome and Africa; The Conspiracies of Cicero and Catiline; The World According to Pompey; Roman Alexanders; and more. It also looks at the phenomenon of excessive violence, particularly in the cases of Marius, Sulla, and Mithridates. The final chapter covers the demise of Cleopatra and examines how the seeds planted by Octavian, Octavia, and Antony sprouted into full Hellenistic trappings of power for the centuries that followed. Situates the development of Rome, after the death of Alexander the Great, in the context of significant contemporaneous regimes in Asia Minor, the Levant, and Egypt Provides students with insight into how various societies respond to contact and how that contact can shape and create larger communities Highlights the interconnectedness of Mediterranean cultures Strikes a balance between political, geopolitical, and cultural inquiries Considers how modes of international diplomacy affect civilizations Includes helpful pedagogical features, such as sources in translation, illustrations, and further readings Roman Republic and the Hellenistic Mediterranean is an excellent book for undergraduate courses on the Roman Republic, the Hellenistic World, and the ancient Mediterranean.
