Applied Mathematics And Modeling For Chemical Engineers Richard G. Rice, Duong D. Do, 2012-10-16 This Second Edition of the go-to reference combines the classical analysis and modern applications of applied mathematics for chemical engineers. The book introduces traditional techniques for solving ordinary differential equations (ODEs), adding new material on approximate solution methods such as perturbation techniques and elementary numerical solutions. It also includes analytical methods to deal with important classes of finite-difference equations. The last half discusses numerical solution techniques and partial differential equations (PDEs). The reader will then be equipped to apply mathematics in the formulation of problems in chemical engineering. Like the first edition, there are many examples provided as homework and worked examples.

Reintroduction of Top-Order Predators Matt W. Hayward, Michael Somers, 2009-04-13 Large predators are among the most threatened species on the planet and ways of conserving them in the face of increasing human populations and associated resource requirements are becoming critical. This book draws upon the experiences of some of the world's foremost large carnivore specialists to discuss the numerous issues associated reintroducing large predators back into their natural habitats. Reviews of internationally renowned reintroduction programs for wolves, European lynx and African wild dog reveal the successes and failures of these actions. Experts on tigers, snow leopards and jaguars contend that there are other conservation options of higher priority that will ensure their security in the long-term. Other experts discuss more theoretical aspects such as whether we know enough about these species to be able to predict their behavioural or ecological response to the reintroduction process. Social, economic, political and genetic considerations are also addressed.

The Academy of Management Annals James P. Walsh, Arthur P. Brief, 2007 The Academy of Management is proud to announce the inaugural volume of The Academy of Management Annals. This exciting new series follows one guiding principle: The advancement of knowledge is possible only by conducting a thorough examination of what is known and unknown in a given field. Such assessments can be accomplished through comprehensive, critical reviews of the literature--crafted by informed scholars who determine when a line of inquiry has gone astray, and how to steer the research back onto the proper path. The Academy of Management Annals provide just such essential reviews. Written by leading management scholars, the reviews are invaluable for ensuring the timeliness of advanced courses, for designing new investigative

approaches, and for identifying faulty methodological or conceptual assumptions. The Annals strive each year to synthesize a vast array of primary research, recognizing past principal contributions while illuminating potential future avenues of inquiry. Volume 1 of the Annals explores a wide spectrum of research: corporate control; nonstandard employment; critical management; physical work environments; public administration team learning; emotions in organizations; leadership and health care; creativity at work; business and the environment; and bias in performance appraisals. Ultimately, academic scholars in management and allied fields (e.g., sociology of organizations and organizational psychology) will see The Academy of Management Annals as a valuable resource to turn to for comprehensive, up-to-date information--published in a single volume every year by the preeminent association for management research.

The Bewitching Braid David Brookshaw,2004-08-01 The Bewitching Braid, set in Macau in the 1930s, is a tale of forbidden love between a Macanese boy from a privileged family in the 'Christian' city and a beautiful water-seller from the 'Chinese' quarter of Cheok Chai Un. Against a background of small-town prejudice, the story traces the trials and tribulations of the couple in their attempts to be accepted in their respective communities and to understand each other across their cultural divides. The novel is a look into the inner world of the Eurasian inhabitants of the city, and their relationship with their Chinese and Portuguese legacies. Here, Senna Fernandes depicts the emergence of a new, more liberal Macao, in which its Portuguese and Chinese traditions are harmonized by true love. The original Portuguese version, A Tranca Feiticeira, was made into a successful film in 1997.

Genes for Africa Jennifer A. Thomson,2002 Jennifer Thomson separates fact from fiction and explains why and how GM crops can help us combat poverty, starvation and disease in the developing world, in a safe and responsible way. She explains the technology and looks at the differences and similarities between genetic modification, conventional plant breeding, and natural processes such as cross pollination and mutations. There are chapters devoted to controversial issues such as food safety (for GM crops and organically grown food), patents labelling, regulations and controls, and a section dealing with frequently-asked questions. It ends with a focus on Africa and possible future developments in GM technology. Technical terms are explained and appendices provide additional information on testing for allergens, horizontal gene transfer, and international food safety assessment documents. For those who wish to explore the subject further, it also provides a list of more than 60 web sites dealing with issues related to the GM debate.

Urban Nature Conservation Stephen Forbes,Tony Kendle,2013-05-13 Urban nature conservation is a field that has grown rapidly in importance over the past 20 years and will continue to do so in the coming years as landscape ecology and greenspace planning become established disciplines. A widespread concern and interest in the wild plants and animal life found in urban areas now influences the policies and practices of land management organizations. This book provides a

comprehensive overview of the subject. It will assist professionals in formulating strategic management policies that integrate urban nature conservation into the wider context of landscape management and urban planning.

Superman (2018-) #22 Brian Michael Bendis, 2020-06-16 The battle for the United Planets hits a fever pitch as the galactic conqueror Mongul beats some of the rulers of the galaxy to death and then heads for Earth! The only thing standing in his way? Superman! Meanwhile, back on Earth, the truth that Clark Kent is Superman continues to spiral out all over the world, and now the Daily Planet's competition is gunning for his wife, Lois Lane!

Himalaya Richard C. Blum, Erica Stone, Broughton Coburn, 2006 Both a magnificent celebration and a call for compassion, Himalaya is a panorama of the unique history and uncertain future of the world's highest region and its colorful inhabitants. The awesome beauty of these lofty peaks, including Everest, Kanchenjunga, and Annapurna, is brought to life by gifted photographers like Steve McCurry, Art Wolfe, and many more, while such notable contributors as Jimmy Carter, the Dalai Lama, Sir Edmund Hillary, Tenzing Norgay, and over two dozen others share vivid personal tales of Himalayan life, recount their efforts to encourage hope and opportunity, and emphasize the urgent need to preserve the vibrant variety of these ancient landscapes and cultures as they face the mixed blessings of the modern world. The book begins by introducing the region: its astonishing biodiversity, its mountaineering history, its rich ethnic heritage, and the interplay between two major religions, Hinduism and Buddhism. Himalaya addresses challenges to these mountainous domains: political turmoil, population growth, touristic demands, and ecological stresses. Finally, a compelling conclusion comes in the stories of doctors, conservationists, environmentalists, and volunteers of every kind, whose efforts provide a global model for practical results and lasting relief, still respecting, honoring, and protecting the magic of a place unlike any other on Earth.

Plant Genetics and Biotechnology Edgar Crombie, 2019-06-18 Plant biotechnology is the science of developing methods of genetic modification in plants to achieve certain desired characteristics. Genetic modification is the altering of plants' genetic traits by manipulating genes. In recent years, plant breeders have developed innovative methods of genetic modification for increased crop yield. The techniques related to this field have applications across a number of scientific fields such as plant physiology, botany, agronomy, plant biochemistry, plant pathology, etc. This book presents upcoming concepts and theories related to the fields of plant biotechnology and genetics. It strives to provide a fair idea about this discipline and to help develop a better understanding of the latest advances within this field. Those in search of information to further their knowledge will be greatly assisted by this book.

These Twisted Bonds Lexi Ryan, 2022-07-19 #1 New York Times bestseller! In this thrilling conclusion to *These Hollow Vows*—the sexy, action-packed fantasy that started it all—Brie finds herself caught between two princes and two destinies

while the future of the fae realm hangs in the balance. After Abriella's sister was sold to the fae, she thought life couldn't get any worse. But when she suddenly finds herself caught in a web of lies of her own making--loving two princes and trusting neither--things are not quite as clear as she once thought. As civil war wages in the Unseelie Court, Brie finds herself unable to choose a side. How can she know where she stands when she doesn't even know herself anymore? In this darkly romantic thrill ride, the more Faerie is torn apart from the inside, the clearer it becomes that prophecies don't lie and Brie has a role to play in the fate of this magical realm--whether she likes it or not.

MIND MGMT Volume 1: The Manager Matt Kindt, 2013-04-09 Reporting on a commercial flight where everyone aboard lost their memories, a young journalist stumbles onto a much bigger story, the topsecret Mind Management program. Her ensuing journey involves weaponized psychics, hypnotic advertising, talking dolphins, and seemingly immortal pursuers, as she attempts to find the flight's missing passenger, the man who was MIND MGMT's greatest success—and its most devastating failure. But in a world where people can rewrite reality itself, can she trust anything she sees? Collects MIND MGMT #1#6. Matt Kindt is the man. Superb series. —Junot Diaz, Pulitzer Prizewinning author
