The Rhubarb Connection and Other Revelations Lars Öhrström,Jacques Covès,2018-12-05 Pink warships that vanish at dusk, urinary maladies of an emperor, and a gold test for cocaine - behold the chemistry of metal ions as never before. In this book you will learn about the sarcophagus molecule, the Chen-Kao test, and how murderers can be caught blue-handed with the wonders of glowing luminol. You will also meet the hidden chemistry of metal ions in everyday life, from the clever modern devices that measure blood-sugar levels, to the leather on your shoes and chewing gum stuck to their soles. Expect to encounter a fair share of heroes and villains, real and fictional, scientist and layperson. Such characters include an ex-MI5 employee running a hospital ward in London amid falling German V1 rockets, a notorious racing cyclist, a proud butler and the lady who first proposed nuclear fission (it's not who you think it is). With engaging, humorous and intelligent prose, the reader will discover the fascinating back-stories of chemical discoveries and inventions where metal ions have played a major role. Featuring a foreword by popular science communicator Dr Raychelle Burks of St. Edward's University, Texas.

Between the World and Me Ta-Nehisi Coates,2015-07-14 #1 NEW YORK TIMES BESTSELLER • NATIONAL BOOK AWARD WINNER • NAMED ONE OF TIME'S TEN BEST NONFICTION BOOKS OF THE DECADE • PULITZER PRIZE FINALIST • NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST • ONE OF OPRAH'S "BOOKS THAT HELP ME THROUGH" • NOW AN HBO ORIGINAL SPECIAL EVENT Hailed by Toni Morrison as "required reading," a bold and personal literary exploration of America's racial history by "the most important essayist in a generation and a writer who changed the national political conversation about race" (Rolling Stone) NAMED ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE BY CNN • NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY The New York Times Book Review • O: The Oprah Magazine • The Washington Post • People

• Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

The Connection Process Teal Swan, 2018-09-10 Connection can exist at any level of our being: We can be mentally linked, emotionally linked, energetically linked, and/or physically linked to something. The Connection Process presents three powerful esoteric processes that restore you from a state of separation to a state of connection with yourself and others. By engaging in the processes, you'll be able to: perceive fundamental truths about yourself and others; see, hear, feel, and understand yourself and others; and develop a deep sense of connectedness with the world. Think about how good it would feel for someone to completely understand you and how great it would be if they were so perceptive of your internal world that they knew exactly what you need or what to say. Think of how good it would be to enjoy harmony in your relationships instead of suffering through conflicts. Connect with yourself, others, and the world around you with your heart, body, emotion, and mind and enjoy the lasting joy that comes from making true connections.

The Ufo-Christianity Connection Fred R. David,2010-11-15 For many centuries, science and religion have remained staunchly independent. Whenever issues have developed that simultaneously touched on both areas, debate often ensued for example, when scientists first proposed that the earth revolved around the sun, or when the theory of evolution was proposed. There has always been a cultural disconnect between science and religion that has caused dissention and distrust. Research conducted by author Fred R. David, however, reveals that the missing link between science and religion may be UFOs or, more specifically, the beings inside those crafts. The UFOChristianity Connection: Fact or Fiction reveals that UFOs played a significant role in how ancient civilizations built megalithic structures and predicted celestial events perfectly; brings to life the close association that ancient civilizations had with ancient astronauts whom they called gods or sky people; reveals that many events described in ancient writings, including the Bible, involved UFO encounters; gives readers a unique perspective to engage others in discussing angels, God, UFOs, Bigfoot, Satan, giants, the underworld, the flood, Atlantis, and Jesus. The scientific information presented here is vital for people of all faiths on all continents. Explore the missing link that bridges the gap between science and religion.

A Mist Connection Katrin Kleemann,2023-06-06 In the summer of 1783, an unusual dry fog descended upon large parts of the northern hemisphere. The fog brought with it bloodred sunsets, a foul sulfuric odor, and a host of other peculiar weather events. Inspired by the Enlightenment, many naturalists attempted to find reasonable explanations for these occurrences. Between 8 June 1783 and 7 February 1784, a 27-kilometer-long fissure volcano erupted in the Icelandic highlands. It produced the largest volume of lava released by any volcanic eruption on planet Earth in the last millennium. In Iceland, the eruption led to the death of one-fifth of the population. The jetstream carried its volcanic gases further afield to

Europe and beyond, where they settled as a fog, the origin of which puzzled naturalists and laypersons. A Mist Connection is an environmental history that documents the Laki eruption and its consequences for Iceland and the wider world. The book combines methods of historical disaster research, climate history, global history, history of science, and geology in an interdisciplinary approach. Icelandic flood lava eruptions of this scale have a statistical recurrence period of 200 to 500 years; it is crucial to understand their nature so that we can prepare for the next one. An eruption of this magnitude would surely be disastrous for our modern, globalized, and interconnected world.

An Open Connection of the Heart Arwen Jayne, 2017-12-31 A metaphysical sci-fi fantasy set on Mars. A lost race

sleeps beneath the depths of an old city, a city protected by androids. Nearby a mining encampment eyes the old cities for further exploration. Into this mix is birthed a new life form, and it has a mind of its own. He might be intelligent and well liked but life hasn't gone the way Callan planned. A job that pays rather than the career he desired. His private life hasn't been what he planned for either. A moment in time brings him face to face with a decision, to continue on as he has or go boldly into a dangerous unknown but enticing future filled with possibilities. His best friend Harry faces decisions of his own, complicated when his sister Sam turns up on his doorstep in tears. Meanwhile on Mars sophisticated androids, some addicted to Earth TV, guard an ancient species that sleep in the catacombs below. Not far away an old enemy mines for wealth on what had seemed like a dead planet. Except the planet is coming to life. A secret alliance of the sentient species who inhabit Earth know it's only time before things come to a head so they hatch a plan to intervene, sending some of Earth's best and brightest to help with Mars' rebirthing aka planetary re-engineering, process.

Wired to Connect Amy Banks, Leigh Ann Hirschman, 2016-02-02 Research shows that people cannot reach their full potential unless they are in healthy connection with others. Dr. Amy Banks teaches us how to rewire our brains for healthier relationships and happier, more fulfilling lives. We all experience moments when we feel isolated and alone. A 2006 Purdue University study found that twenty-five percent of Americans cannot name a single person they feel close to. Yet every single one of us is hardwired for close relationships. The key to more satisfying relationships—be it with a significant other, a family member, or a colleague—is to strengthen the neural pathways in our brains that encourage closeness and connection. In this groundbreaking book, Dr. Banks give us a road map for developing the four distinct neural pathways in the brain that underlie the four most important ingredients for close relationships: calmness, acceptance, emotional resonance, and energy. *Wired to Connect* gives you the tools you need to strengthen the parts of your brain that encourage connection and to heal the neural damage that disconnection can cause.

Connecting People with Technology George Hayhoe, Helen Grady, 2020-11-25 This book explores five important areas where technology affects society, and suggests ways in which human communication can facilitate the use of that technology. Usability has become a foundational discipline in technical and professional communication that grows out of our rhetorical roots, which emphasize purpose and audience. As our appreciation of audience has grown beyond engineers and scientists to lay users of technology, our appreciation of the diversity of those audiences in terms of age, geography, and other factors has similarly expanded. We are also coming to grips with what Thomas Friedman calls the 'flat world,' a paradigm that influences how we communicate with members of other cultures and speakers of other languages. And because most of the flatteners are either technologies themselves or technology-driven, technical and professional

communicators need to leverage these technologies to serve global audiences. Similarly, we are inundated with information about world crises involving health and safety issues. These crises are driven by the effects of terrorism, the aging population, HIV/AIDS, and both human-made and natural disasters. These issues are becoming more visible because they are literally matters of life and death. Furthermore, they are of special concern to audiences that technical and professional communicators have little experience targeting - the shapers of public policy, seniors, adolescents, and those affected by disaster. Biotechnology is another area that has provided new roles for technical and professional communicators. We are only beginning to understand how to communicate the science accurately without either deceiving or panicking our audience. We need to develop a more sophisticated understanding of how communication can shape reactions to biotechnology developments. Confronting this complex network of issues, we're challenged to fashion both our message and the audience's perceptions ethically. Finally, today's corporate environment is being shaped by technology and the global nature of business. Technical and professional communicators can play a role in capturing and managing knowledge, in using technology effectively in the virtual workplace, and in understanding how language shapes organizational culture.
