Vornberg, 2002 Addressing the six standards created by the Interstate School Leaders Consortium (ISLLC), Seifert and Vornberg employ case studies to discuss those issues faced by practicing elementary and secondary principals. Each chapter concludes with student activities that address the concepts discussed in the chapter. An instructor's manual is also available as a separate purchase.

The Leader in Me Stephen R. Covey, 2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

It exemplifies a new and powerful approach to leadership in schools.

Breakthrough Principals Jean Desravines,Jaime Aquino,Benjamin Fenton,2016-03-17 Bridge the achievement gap with proven strategies for student success Breakthrough Principals debunks the myth of the 'superhero' principal by detailing the common actions and practices of leaders at our nation's fastest-gaining public schools. Based on the authors' Transformational Leadership Framework, which they developed through in-depth study of more than 100 high-gaining, high-poverty schools, the book distills findings into a practical, action-focused plan for diagnosing school needs and implementing structures, systems and practices that accelerate student achievement. Brought to life by case studies of principals who have led dramatic gains in student achievement, the book is a how-to guide for increasing the quality of teaching and learning; improving school culture; attracting and supporting high-performing teachers; and involving parents and community to help students achieve. You'll learn how breakthrough principals make the school's mission a real part of both strategy and practice, and set up sustainable systems that support consistent, ongoing improvement. High-impact practices are organized into five broad categories: learning and teaching, school-wide culture, aligned staff, operations and systems, and personal leadership. The primary job of school leadership is to help students succeed. It begins with first recognizing and prioritizing areas of need, then finding and implementing the most effective solutions. Whether you work in a turn around environment, or want to make a good school better, this book will give you a set of concrete practices—illustrated through examples of real principals in real schools—that have been proven to work. Discover the primary drivers of student achievement Work toward the school's vision in staffing, operations, and systems Set the tone for all relationships and practices with good leadership Closing the achievement gap is a major goal of educational leadership, and principals are forever searching for viable methods that help them better serve their students. Breakthrough Principals unveils the details behind the success stories

from across the nation to provide a roadmap to transformative gains.

Lead from the Start Tommy Reddicks, Tina Merriweather Seymour, 2019 In *Lead From the Start: How to Succeed as the New Principal of Your School*, authors Tommy Reddicks and Tina Merriweather Seymour condense their cumulative decades of experience as school leaders into a guide for both new and veteran leaders. The authors note that, while there is no perfect system, great leadership can be achieved through a pinpoint focus on simple, strategic systems. Thus, this book provides a deeply informative and experience-based look at how leaders coming into a school can quickly develop best practices, leverage their creativity, avoid reactive processes, and more. The book goes a step further, providing numerous personal accounts and first-hand experiences, times for reflection, and discussion questions that will allow the reader to better comprehend and implement these lessons. Using this book, readers will be able to develop a unique system of leadership best practices that will not only keep them in the leadership role through the tumultuous early years, but allow them to improve their schools and ensure better outcomes for students, staff, and the school--

On Becoming a School Leader Arthur Wright Combs, Ann B. Miser, Kathryn S. Whitaker, 1999 The work of educational leaders depends on relationships with people--faculty and staff members, students, other administrators, parents, and community members. This book presents a new way of viewing leadership: how to become person-centered leaders. Rather than relying on outdated ways of managing schools, principals and other leaders must take up the challenge of paying attention to the people issues of the school. Through many examples, the authors show how school leaders must * consciously seek the appropriate type of data to respond to; * increase their capacity for empathy; * develop healthy personal self-concepts; and * learn how to develop healthy self-concepts in others, both students and teachers. School leaders also should be committed to a broad purpose for schooling, should be informed about how their beliefs and behavior influence the organization of the school, and should be able to participate in interactions with authenticity. They also must be able to help create authenticity in their school organizations. In these ways, school leaders will create schools that are learning organizations for everyone. Universities that prepare future school leaders should spend more time developing leaders who are person centered in their approach to leading schools. This new way of thinking will require leader preparation programs to change their priorities for curriculum, academic activities, and field experiences.

School District Leadership Matters Bruce Sheppard, Jean Brown, David Dibbon, 2009-08-29 School District Leadership Matters challenges policy makers, administrators, and academics in the field of educational leadership to reassess their traditional approaches to learning, working, and planning. The authors believe that government restructuring, standards-based reforms, and centrally imposed strategic planning have been painfully ineffective. As a consequence, student learning has become increasingly superficial and inauthentic. This book bridges the traditional divide between the generalizations of social science theory on the one hand and the world of educational practice on the other. It argues that a more promising approach to education reform is through effective school district leadership. Sheppard, Brown and Dibbon draw on their collective experience both as educational leaders and researchers of leadership, having spent five years researching and working in one school district. Here, they show how a district superintendent can successfully navigate the paradoxes and challenges of facilitating collaborative leadership in a school district with a traditionally hierarchical organizational structure. As a conclusion to their work, the authors highlight what they call five 'recognitions' that deepen readers' understanding of school district leadership. They illuminate, too, ways that senior level practitioners can apply theory to practice in order to break down the traditional hierarchical bureaucracies that inhibit learning, and create professional learning communities. School District Leadership Matters urges researchers, graduate students, practitioners, and policymakers to focus on improving authentic learning for all students and argues that the best hope rests with effective school district leadership. This empirically-based yet practical book provides new insights and questions for academic researchers and will inspire

policy makers and practitioners to imagine what could be and to work towards it.

New Primary Leaders Michael Cowie, 2011-08-11 New primary leaders face significant challenges worldwide and this book brings together the range of those experiences and challenges for the first time. It includes interviews with primary school leaders in the early years of leadership in 12 different countries. Each chapter begins with an introduction to the principal and the local context before the principal's own description of her or his experience as a new leader. The leaders discuss how they prepared for principalship, their experiences after taking up the post, the extent to which the job meets with their expectations and their hopes and fears for the future. The final chapter provides a comparative overview, exploring new principals' perceptions of key influences on schools and their communities, their reactions to the multiple, heightened and often-conflicting expectations, pressures and challenges they encounter and the implications for principal preparation internationally. The voices of principals from around the world provide a vivid and authentic picture of new school leaders in different contexts at the beginning of the 21st century.

A School Leaders Manual for Opening a New School Jane Garraux, 2019-10-28 A School Leader's Manual for Opening a New School is a blueprint for school administrators embarking on the challenge of opening a new school. Opening a new school is one of the most challenging, rewarding adventures any school leader can experience. This book is designed to assist in this endeavor by outlining best practices, while providing administrators the flexibility to adapt each suggestion to the needs of their school communities. Since opening a new school is not a scripted practice and varies with each school district, this book addresses the process from the time school leadership is assigned until the school year begins, providing insights on how to plan and prepare for the first day of school. Gain new understanding of funding, furniture, technology, instructional programs, policies, safety, staffing, professional development, and more! By using the tools presented in this book, school leaders can spend less time planning the minutiae and more time creating innovative programs to make their schools exceptional.

Real Leaders, Real Schools Gerald C. Leader, Amy F Stern, 2008-09-01 Real Leaders, Real Schools tells the stories of five urban public school principals who led their schools through profound and transformative changes. In each of these cases, their efforts resulted in dramatic improvements in student achievement—improvements that occurred within the current environment of high-stakes tests. The revealing and often gripping narratives that form the heart of this remarkable book offer unprecedented insights into the meaning and practice of effective school leadership. The stories themselves are often inspiring but they are never idealized. All of these principals met with frustrations as well as successes, setbacks as well as breakthroughs. All regularly reassessed their policies and practices, and all acknowledged—and learned from—their errors along the way. Yet all believed in their staffs and their students, and all found innovative ways to transform and improve their schools. These are true stories of successful leadership against enormous odds. They provide countless lessons

for today's school leaders and all who are committed to education reform.

Every Child, Every Classroom, Every Day Robert Peterkin, Deborah Jewell-Sherman, Laura Kelley, Leslie Boozer, 2011-03-21 Urban school superintendents face unprecedented challenges. They must ensure that all students achieve a high level of performance despite a lack of resources, the intractable problems of race and poverty, a chaotic governance structure, and the often conflicting demands of teachers, parents, unions, and the community. This important book, edited by the co-directors of the prestigious Harvard Urban Superintendents Program (USP), explores the ways in which superintendents can make a difference in the lives of each child, every day, by being knowledgeable about and driven by what happens in the classroom. The editors and distinguished contributors cover a wide range of vital topics that superintendents face from the day they are hired to the day they retire, such as how superintendents can most effectively communicate their vision, plan strategically, institute instructional reform, engage the community, and allocate resources. The book is filled with illustrative examples of well-known superintendents who are trailblazing new means to achieve educational fairness for all children and are changing the landscape of urban school systems today. In addition, Every Child,

Every Classroom, Every Day highlights the Urban Superintendents Program's Leadership Framework, which is designed to aid administrators and educators in decision making and achieving equity.
