Collard Greens and Common Grounds Don Boekelheide, Lucy K. Bradley, 2017-08 Community gardens have been part of the American landscape since the mid-1700s. Today, community gardens continue to make positive contributions in neighborhoods across North Carolina. Winner of an American Society for Horticultural Science, Extension Division, 2017 Educational Materials Award, Collard Greens and Common Ground is a practical guide to community gardening. Based on experience and research, it is packed with best practices, tested strategies, and useful checklists. The guide covers every step in the community gardening process, from starting a new garden to sustainable long-term garden management and policy. Whether you are new to community gardening or a seasoned veteran, Collard Greens and Common Ground will help your community garden flourish.

School, Family, and Community Partnerships Joyce L. Epstein, Mavis G. Sanders, Steven B. Sheldon, Beth S. Simon, Karen Clark Salinas, Natalie Rodriguez Jansorn, Frances L. Van Voorhis, Cecelia S. Martin, Brenda G. Thomas, Marsha D. Greenfeld, Darcy J. Hutchins, Kenyatta J. Williams, 2018-07-19 Strengthen programs of family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, the fourth edition of the bestseller School, Family, and Community Partnerships: Your Handbook for Action, presents tools and guidelines to help develop more effective and more equitable programs of family and community engagement. Written by a team of well-known experts, it provides a theory and framework of six types of involvement for action; up-to-date research on school, family, and community collaboration; and new materials for professional development and on-going technical assistance. Readers also will find: Examples of best practices on the six types of involvement from preschools, and elementary, middle, and high schools Checklists, templates, and evaluations to plan goal-linked partnership programs and assess progress CD-ROM with slides and notes for two presentations: A new awareness session to orient colleagues on the major components of a research-based partnership program, and a full One-Day Team Training Workshop to prepare school teams to develop their partnership programs. As a foundational text, this handbook demonstrates a proven approach to implement and sustain inclusive, goal-linked programs of partnership. It shows how a good partnership program is an essential component of good school organization and school improvement for student success. This book will help every district and all schools strengthen

and continually improve their programs of family and community engagement.

Cruel Illusions Margie Fuston, 2022-11-01 "The perfect sinisterly magical escape...full of longing, desperation, and betrayal." —Stephanie Garber, New York Times bestselling author of the Caraval trilogy and Once Upon a Broken Heart Caraval meets Buffy the Vampire Slayer in this "beguiling" (Publishers Weekly, starred review) young adult fantasy about a girl who makes a deal with a magical secret society to enter a potentially deadly competition for the chance to avenge her mother's death. Ever since a vampire murdered her mother, Ava has been determined to get revenge. This all-encompassing drive has given her the fuel she needed to survive foster home after foster home. But it's been ten years since anyone's seen a vampire, and Ava has lost hope that she'll ever find one...until she stumbles across a hidden magic show where she witnesses impossible illusions. The magicians may not be the bloodsuckers she's hunting, but Ava is convinced something supernatural is at play, so she sneaks backstage and catches them in acts they can't explain. But they've been waiting for her. The magicians reveal they're part of an ancient secret society with true magic, and Ava has the same power in her blood that they do. If she joins them, they promise to teach her the skills she needs to hunt vampires and avenge her mother. But there's a catch: if she wants to keep the power they offer, she needs to prove she's worthy of it. And to do so, she must put on the performance of her life in a sinister and dangerous competition where illusion and reality blur, and the stakes are deadly.

How to Argue With a Racist: What Our Genes Do (and Don't) Say About Human Difference Adam Rutherford, 2021-09-14 This authoritative debunking of racist claims that masquerade as “genetics” is a timely weapon against the misuse of science to justify bigotry—now in paperback Race is not a biological reality. Racism thrives on our not knowing this. In fact, racist pseudoscience has become so commonplace that it can be hard to spot. But its toxic effects on society are plain to see: rising nationalism, simmering hatred, lost lives, and divisive discourse. Since cutting-edge genetics are difficult to grasp—and all too easy to distort—even well-intentioned people repeat stereotypes based on “science.” But the real science tells a different story: The more researchers learn about who we are and where we come from, the clearer it becomes that our racial divides have nothing to do with observable genetic differences. The bestselling author of *A Brief History of Everyone Who Ever Lived* explains in this explosive, essential guide to the DNA we all share.

Creation Adam Rutherford, 2013-06-13 What is life? Humans have been asking this question for thousands of years. But as technology has advanced and our understanding of biology has deepened, the answer has evolved. For decades, scientists have been exploring the limits of nature by modifying and manipulating DNA, cells and whole organisms to create new ones that could never have existed on their own. In *Creation*, science writer Adam Rutherford explains how we are now radically exceeding the boundaries of evolution and engineering entirely novel creatures—from goats that produce spider silk in their milk to bacteria that excrete diesel to genetic circuits that identify and destroy cancer cells. As strange as some of these creations may sound, this new, synthetic biology is helping scientists develop radical solutions to some of the world's most pressing crises—from food shortages to pandemic disease to climate change—and is paving the way for inventions once relegated to science fiction. Meanwhile, these advances are shedding new light on the biggest mystery of all—how did life begin? We know that every creature on Earth came from a single cell, sparked into existence four billion years ago. And as we come closer and closer to understanding the ancient root that connects all living things, we may finally be able to achieve a second genesis—the creation of new life where none existed before. *Creation* takes us on a journey four billion years in the making—from the very first cell to the ground-breaking biological inventions that will shape the future of our planet.

A Brief History of Everyone who Ever Lived Adam Rutherford, 2017 'A brilliant, authoritative, surprising, captivating introduction to human genetics. You'll be spellbound' Brian Cox This is a story about you. It is the history of who you are and

how you came to be. It is unique to you, as it is to each of the 100 billion modern humans who have ever drawn breath. But it is also our collective story, because in every one of our genomes we each carry the history of our species - births, deaths, disease, war, famine, migration and a lot of sex. In this captivating journey through the expanding landscape of genetics, Adam Rutherford reveals what our genes now tell us about human history, and what history can now tell us about our genes. From Neanderthals to murder, from redheads to race, dead kings to plague, evolution to epigenetics, this is a demystifying and illuminating new portrait of who we are and how we came to be. *** 'A thoroughly entertaining history of Homo sapiens and its DNA in a manner that displays popular science writing at its best' Observer 'Magisterial, informative and delightful' Peter Frankopan 'An extraordinary adventure...From the Neanderthals to the Vikings, from the Queen of Sheba to Richard III, Rutherford goes in search of our ancestors, tracing the genetic clues deep into the past' Alice Roberts
